Sunderland, Massachusetts U.S.A.

CONTENTS

CHAPTER 1

Studying the Nervous System 1

Overview 1

Genetics, Genomics, and the Brain 1

BOX 1A MODEL ORGANISMS IN NEUROSCIENCE 2

The Cellular Components of the Nervous System 4

Neurons 6

Glial Cells 7

Cellular Diversity in the Nervous System 10

Neural Circuits 10

The Organization of the Human Nervous System 13

Neural Systems 15

Structural Analysis of Neural Systems 15

Functional Analysis of Neural Systems 16

BOX 1B BRAIN IMAGING TECHNIQUES 18

Analyzing Complex Behavior 21

Summary 21

Additional Reading 21

UNIT I

NEURAL SIGNALING 23

Summary 40

Additional Reading 40

CHAPTER 2

Electrical Signals of Nerve Cells 25

Overview 25

Electrical Signals of Nerve Cells 25

Long-Distance Transmission of Electrical Signals 27

How Ion Movements Produce Electrical Signals 29

BOX 2A PASSIVE MEMBRANE PROPERTIES 30

Forces That Create Membrane Potentials 33

Electrochemical Equilibrium in an Environment with
More Than One Permeant Ion 34

The Ionic Basis of the Resting Membrane Potential 35

BOX 2B THE REMARKABLE GIANT NERVE CELLS OF SQUID 36

The Ionic Basis of Action Potentials 37

BOX 2C ACTION POTENTIAL FORM AND NOMENCLATURE 39

CHAPTER 3

Voltage-Dependent Membrane Permeability 41

Overview 41

Ionic Currents across Nerve Cell Membranes 41

BOX 3A THE VOLTAGE CLAMP METHOD 42

Two Types of Voltage-Dependent Ionic Currents 43

Two Voltage-Dependent Membrane Conductances 45

Reconstruction of the Action Potential 47

BOX 3B THRESHOLD 49

Long-Distance Signaling by Means of Action
Potentials 51

Increased Conduction Velocity as a Result of
Myelination 51

Summary 53

BOX 3C MULTIPLE SCLEROSIS 54

Additional Reading 55

CHAPTER 4

Ion Channels and Transporters 57

Overview 57

Ion Channels Underlying Action Potentials 57

BOX 4A THE PATCH CLAMP METHOD 59

BOX 4B TOXINS THAT POISON ION CHANNELS 62

The Diversity of Ion Channels 63

BOX 4C EXPRESSION OF ION CHANNELS IN *XENOPUS* OOCYTES 63

Voltage-Gated Ion Channels 64

Ligand-Gated Ion Channels 66

Stretch- and Heat-Activated Channels 66

The Molecular Structure of Ion Channels 66

Active Transporters Create and Maintain Ion Gradients 69

BOX 4D DISEASES CAUSED BY ALTERED ION CHANNELS 70

Functional Properties of the Na⁺/K⁺ Pump 72

The Molecular Structure of ATPase Pumps 72

Summary 74

Additional Reading 75

CHAPTER 5

Synaptic Transmission 77

Overview 77

Electrical Synapses 78

Signal Transmission at Chemical Synapses 80

Properties of Neurotransmitters 81

BOX 5A CRITERIA THAT DEFINE A NEUROTRANSMITTER 84

Quantal Release of Neurotransmitters 84

Release of Transmitters from Synaptic Vesicles 86

Local Recycling of Synaptic Vesicles 86

The Role of Calcium in Transmitter Secretion 88

Molecular Mechanisms of Synaptic Vesicle Cycling 90

BOX 5B DISEASES THAT AFFECT THE PRESYNAPTIC TERMINAL 93

Neurotransmitter Receptors 96

Postsynaptic Membrane Permeability Changes during Synaptic Transmission 97

Excitatory and Inhibitory Postsynaptic Potentials 101

Summation of Synaptic Potentials 102

BOX 5C THE "TRIPARTITE SYNAPSE" 104

Summary 105

Additional Reading 106

CHAPTER 6

Neurotransmitters and Their Receptors 109

Overview 109

Categories of Neurotransmitters 109

Acetylcholine 111

BOX 6A NEUROTOXINS THAT ACT ON POSTSYNAPTIC RECEPTORS 114

Glutamate 116

BOX 6B MYASTHENIA GRAVIS: AN AUTOIMMUNE DISEASE OF NEUROMUSCULAR SYNAPSES 117

BOX 6C EXCITOTOXICITY FOLLOWING ACUTE BRAIN INJURY 121

GABA and Glycine 122

BOX 6D EXCITATORY ACTIONS OF GABA IN THE DEVELOPING BRAIN 124

The Biogenic Amines 125

BOX 6E BIOGENIC AMINE NEUROTRANSMITTERS AND PSYCHIATRIC DISORDERS 126

BOX 6F ADDICTION 128

ATP and Other Purines 131

Peptide Neurotransmitters 132

Unconventional Neurotransmitters 135

BOX 6G MARIJUANA AND THE BRAIN 137

Summary 139

Additional Reading 139

CHAPTER 7

Molecular Signaling within Neurons 141

Overview 141

Strategies of Molecular Signaling 141

The Activation of Signaling Pathways 143

Receptor Types 144

G-Proteins and Their Molecular Targets 145

Second Messengers 147

BOX 7A DYNAMIC IMAGING OF INTRACELLULAR SIGNALING 149

Second Messenger Targets: Protein Kinases and Phosphatases 151

Nuclear Signaling 153

BOX 7B DENDRITIC SPINES 154

Examples of Neuronal Signal Transduction 157

Summary 159

Additional Reading 160

CHAPTER 8***Synaptic Plasticity 163***

Overview 163

Short-Term Synaptic Plasticity 163

Long-Term Synaptic Plasticity Underlies Behavioral Modification in *Aplysia* 166

Long-Term Potentiation at a Hippocampal Synapse 169

BOX 8A GENETICS OF LEARNING AND MEMORY IN THE FRUIT FLY 170

Mechanisms Underlying LTP 173

BOX 8B SILENT SYNAPSES 175

Mechanisms Underlying LTD 177

Spike-Timing Dependent Plasticity 181

BOX 8C EPILEPSY: THE EFFECT OF PATHOLOGICAL ACTIVITY ON NEURAL CIRCUITRY 182

Summary 183

Additional Reading 184

UNIT II**SENSATION AND SENSORY PROCESSING 187**

Beyond SI: Corticocortical and Descending Pathways 205

Plasticity in the Adult Cerebral Cortex 206

Summary 207

Additional Reading 207

CHAPTER 10***Pain 209***

Overview 209

Nociceptors 209

Transduction and Transmission of Nociceptive Signals 211

BOX 10A CAPSAICIN 212

Central Pain Pathways Are Distinct from Mechanosensory Pathways 213

BOX 10B REFERRED PAIN 214**BOX 10C** A DORSAL COLUMN PATHWAY FOR VISCERAL PAIN 215

Parallel Pain Pathways 217

Pain and Temperature Pathways for the Face 218

Other Modalities Mediated by the Anterolateral System 220

Sensitization 220

Descending Control of Pain Perception 223

BOX 10D PHANTOM LIMBS AND PHANTOM PAIN 222

The Placebo Effect 223

The Physiological Basis of Pain Modulation 224

Summary 226

Additional Reading 226

CHAPTER 9***The Somatic Sensory System: Touch and Proprioception 189***

Overview 189

Afferent Fibers Convey Somatic Sensory Information to the Central Nervous System 189

Somatic Sensory Afferents Exhibit Distinct Functional Properties 191

BOX 9A DERMATOMES 191

Mechanoreceptors Specialized to Receive Tactile Information 194

Mechanoreceptors Specialized for Proprioception 196

Central Pathways Conveying Tactile Information from the Body: The Dorsal Column–Medial Lemniscal System 198

Central Pathways Conveying Tactile Information from the Face: The Trigeminothalamic System 200

Central Pathways Conveying Proprioceptive Information from the Body 200

Central Pathways Conveying Proprioceptive Information from the Face 201

The Somatic Sensory Components of the Thalamus 201

Primary Somatic Sensory Cortex 202

BOX 9B PATTERNS OF ORGANIZATION WITHIN THE SENSORY CORTICES: BRAIN MODULES 203

CHAPTER 11

Vision: The Eye 229

- Overview 229
- Anatomy of the Eye 229
- The Formation of Images on the Retina 230
 - BOX 11A MYOPIA AND OTHER REFRACTIVE ERRORS 231**
- The Surface of the Retina 233
- Retinal Circuitry 233
 - BOX 11B THE BLIND SPOT 234**
 - BOX 11C MACULAR DEGENERATION 235**
 - BOX 11D RETINITIS PIGMENTOSA 237**
- Retinal Pigment Epithelium 238
- Phototransduction 238
- Functional Specialization of the Rod and Cone Systems 242
- Anatomical Distribution of Rods and Cones 244
- Cones and Color Vision 245
 - BOX 11E THE IMPORTANCE OF CONTEXT IN COLOR PERCEPTION 246**
- Retinal Circuits for Detecting Luminance Change 249
 - BOX 11F THE PERCEPTION OF LIGHT INTENSITY 250**
- Contribution of Retinal Circuits to Light Adaptation 253
- Summary 255
- Additional Reading 256

CHAPTER 12

Central Visual Pathways 257

- Overview 257
- Central Projections of Retinal Ganglion Cells 257
- The Retinotopic Representation of the Visual Field 259
- Visual Field Deficits 261
- Spatiotemporal Tuning Properties of Neurons in Primary Visual Cortex 263
- Primary Visual Cortex Architecture 265
- Combining Inputs from Two Eyes 267
- Division of Labor within the Primary Visual Pathway 269
 - BOX 12A RANDOM DOT STEREOGRAMS AND RELATED AMUSEMENTS 270**
- The Functional Organization of Extrastriate Visual Areas 272
- Summary 274
- Additional Reading 275

CHAPTER 13

The Auditory System 277

- Overview 277
- Sound 277
- The Audible Spectrum 278
- A Synopsis of Auditory Function 279
 - BOX 13A FOUR CAUSES OF ACQUIRED HEARING LOSS 279**
 - BOX 13B MUSIC 280**
- The External Ear 281
- The Middle Ear 282
 - BOX 13C SENSORINEURAL HEARING LOSS AND COCHLEAR IMPLANTS 283**
- The Inner Ear 284
- Hair Cells and the Mechanoelectrical Transduction of Sound Waves 287
- The Ionic Basis of Mechanotransduction in Hair Cells 290
- The Cochlear Amplifier 291
- Tuning and Timing in the Auditory Nerve 291
 - BOX 13D THE SWEET SOUND OF DISTORTION 292**
- How Information from the Cochlea Reaches Targets in the Brainstem 293
- Integrating Information from the Two Ears 294
- Monaural Pathways from the Cochlear Nucleus to the Nuclei of the Lateral Lemniscus 297
- Integration in the Inferior Colliculus 297
- The Auditory Thalamus 297
- The Auditory Cortex 298
 - BOX 13E REPRESENTING COMPLEX SOUNDS IN THE BRAINS OF BATS AND HUMANS 299**
- Summary 301
- Additional Reading 301

CHAPTER 14

The Vestibular System 303

- Overview 303
- The Vestibular Labyrinth 303
 - BOX 14A A PRIMER ON TERMINOLOGY 304**
- Vestibular Hair Cells 305
 - BOX 14B ADAPTATION AND TUNING OF VESTIBULAR HAIR CELLS 306**
- The Otolith Organs: The Utricle and Saccule 307
- How Otolith Neurons Sense Tilts and Linear Accelerations of the Head 309
- The Semicircular Canals 310
- How Semicircular Canal Neurons Sense Angular Accelerations 312

Central Pathways for Stabilizing Gaze, Head, and Posture 312

BOX 14C CLINICAL EVALUATION OF THE VESTIBULAR SYSTEM 314

BOX 14D MAUTHNER CELLS IN FISH 316

Vestibular Pathways to the Thalamus and Cortex 318

Spatial Orientation Perception and Multisensory Integration 318

Summary 319

Additional Reading 320

CHAPTER 15

The Chemical Senses 321

Overview 321

The Organization of the Olfactory System 321

Olfactory Perception in Humans 323

Assessing Olfactory Function in the Laboratory or Clinic 324

BOX 15A YOU ONLY GET ONE NOSE 326

Physiological and Behavioral Responses to Odorants 327

BOX 15B PHEROMONES, REPRODUCTION, AND THE VOMERONASAL SYSTEM 328

Olfactory Epithelium and Olfactory Receptor Neurons 329

Odor Transduction and Odorant Receptor Proteins 332

BOX 15C THE "DOGTOR" IS IN 333

Physiological Mechanisms of Odor Transduction 334

The Olfactory Bulb 336

Cortical Processing of Information Relayed from the Olfactory Bulb 340

The Organization of the Taste System 341

Taste Perception in Humans 343

Taste Receptor Proteins and Transduction 345

Neural Coding in the Taste System 347

Trigeminal Chemoreception 349

Summary 349

Additional Reading 350

UNIT III

MOVEMENT AND ITS CENTRAL CONTROL 351

CHAPTER 16

Lower Motor Neuron Circuits and Motor Control 353

Overview 353

Neural Centers Responsible for Movement 353

Motor Neuron–Muscle Relationships 355

The Motor Unit 357

The Regulation of Muscle Force 358

BOX 16A MOTOR UNIT PLASTICITY 359

The Spinal Cord Circuitry Underlying Muscle Stretch Reflexes 362

The Influence of Sensory Activity on Motor Behavior 364

Other Sensory Feedback Affecting Motor Performance 365

Flexion Reflex Pathways 367

BOX 16B LOCOMOTION IN THE LEECH AND THE LAMPREY 368

Spinal Cord Circuitry and Locomotion 369

BOX 16C THE AUTONOMY OF CENTRAL PATTERN GENERATORS: EVIDENCE FROM THE LOBSTER STOMATOGASTRIC GANGLION 370

The Lower Motor Neuron Syndrome 372

BOX 16D AMYOTROPHIC LATERAL SCLEROSIS 373

Summary 373

Additional Reading 374

CHAPTER 17

Upper Motor Neuron Control of the Brainstem and Spinal Cord 375

Overview 375

Organization of Descending Motor Control 375

The Corticospinal and Corticobulbar Tracts 377

BOX 17A PATTERNS OF FACIAL WEAKNESS AND THEIR IMPORTANCE FOR LOCALIZING NEUROLOGICAL INJURY 379

Functional Organization of the Primary Motor Cortex 380

BOX 17B WHAT DO MOTOR MAPS REPRESENT? 381

BOX 17C SENSORY MOTOR TALENTS AND CORTICAL SPACE 384

The Premotor Cortex 387

Motor Control Centers in the Brainstem: Upper Motor Neurons that Maintain Balance, Govern Posture, and Orient Gaze 389

BOX 17D THE RETICULAR FORMATION 391

Damage to Descending Motor Pathways: The Upper Motor Neuron Syndrome 395

BOX 17E MUSCLE TONE 397

Summary 397

Additional Reading 398

CHAPTER 18

Modulation of Movement by the Basal Ganglia 399

Overview 399

Projections to the Basal Ganglia 399

Projections from the Basal Ganglia to Other Brain Regions 402

Evidence from Studies of Eye Movements 404

Circuits within the Basal Ganglia System 405

Dopamine Modulates Basal Ganglia Circuits 407

Hypokinetic and Hyperkinetic Movement Disorders 408

BOX 18A PARKINSON'S DISEASE: AN OPPORTUNITY FOR NOVEL THERAPEUTIC APPROACHES 410

BOX 18B HUNTINGTON'S DISEASE 411

BOX 18C DEEP BRAIN STIMULATION 412

BOX 18D BASAL GANGLIA LOOPS AND NON-MOTOR BRAIN FUNCTIONS 414

Summary 416

Additional Reading 416

CHAPTER 19

Modulation of Movement by the Cerebellum 417

Overview 417

Organization of the Cerebellum 417

Projections to the Cerebellum 419

Projections from the Cerebellum 421

Circuits within the Cerebellum 423

Cerebellar Circuitry and the Coordination of Ongoing Movement 426

BOX 19A PRION DISEASES 427

Further Consequences of Cerebellar Lesions 429

BOX 19B GENETIC ANALYSIS OF CEREBELLAR FUNCTION 431

Summary 433

Additional Reading 433

CHAPTER 20

Eye Movements and Sensory Motor Integration 435

Overview 435

What Eye Movements Accomplish 435

The Actions and Innervation of Extraocular Muscles 436

BOX 20A THE PERCEPTION OF STABILIZED RETINAL IMAGES 437

Types of Eye Movements and Their Functions 438

Neural Control of Saccadic Eye Movements 440

BOX 20B SENSORY MOTOR INTEGRATION IN THE SUPERIOR COLLICULUS 443

BOX 20C FROM PLACE CODES TO RATE CODES 445

Neural Control of Smooth Pursuit Movements 449

Neural Control of Vergence Movements 449

Summary 450

Additional Reading 450

CHAPTER 21

The Visceral Motor System 451

Overview 451

Early Studies of the Visceral Motor System 454

Distinctive Features of the Visceral Motor System 454

The Sympathetic Division of the Visceral Motor System 456

BOX 21A THE HYPOTHALAMUS 456

The Parasympathetic Division of the Visceral Motor System 460

The Enteric Nervous System 461

Sensory Components of the Visceral Motor System 462

Central Control of Visceral Motor Functions 464

BOX 21B HORNER'S SYNDROME 465

Neurotransmission in the Visceral Motor System 466

BOX 21C OBESITY AND THE BRAIN 466

Autonomic Regulation of Cardiovascular Function 468

Autonomic Regulation of the Bladder 470

Autonomic Regulation of Sexual Function 472

Summary 473

Additional Reading 474

UNIT IV

THE CHANGING BRAIN 475

CHAPTER 22

Early Brain Development 477

Overview 477

Formation of the Nervous System: Gastrulation and Neurulation 477

BOX 22A STEM CELLS: PROMISE AND PERIL 479

Formation of the Major Brain Subdivisions 481

BOX 22B RHOMBOMERES 484

The Molecular Basis of Neural Induction 485

BOX 22C RETINOIC ACID: TERATOGEN AND INDUCTIVE SIGNAL 488

Integrated Inductive Signals Establish Neuron Identity 489

The Initial Differentiation of Neurons and Glia 489

BOX 22D NEUROGENESIS: WHERE, WHEN, AND WHAT 492

Molecular Regulation of Neurogenesis 493

The Generation of Neuronal Diversity 495

Molecular and Genetic Disruptions of Early Neural Development 496

BOX 22E TRIPLE JEOPARDY: DISEASES ASSOCIATED WITH SONIC HEDGEHOG 497

Neuronal Migration in the Peripheral Nervous System 499

BOX 22F MIXING IT UP: LONG-DISTANCE NEURONAL MIGRATION 501

Neuronal Migration in the Central Nervous System 502

Molecular Mechanisms of Neuronal Migration and Cortical Migration Disorders 503

Summary 503

Additional Reading 505

CHAPTER 23

Construction of Neural Circuits 507

Overview 507

Neuronal Polarization: The First Step in Neural Circuit Formation 507

The Axon Growth Cone 509

The Molecular Basis of Growth Cone Motility 510

BOX 23A CHOOSING SIDES: AXON GUIDANCE AT THE OPTIC CHIASM 512

Non-Diffusible Signals for Axon Guidance 513

BOX 23B HUMAN AXON GUIDANCE DISORDERS 515

Chemoattraction and Chemorepulsion 517

The Formation of Topographic Maps 519

Selective Synapse Formation 521

Regulation of Neuronal Connections by Trophic Interactions 523

Competitive Interactions and the Formation of Neuronal Connections 525

BOX 23C WHY DO NEURONS HAVE DENDRITES? 528

The Molecular Basis of Trophic Interactions 529

BOX 23D THE DISCOVERY OF BDNF AND THE NEUROTROPHIN FAMILY 530

Neurotrophin Signaling 533

Summary 535

Additional Reading 535

CHAPTER 24

Modification of Neural Circuits as a Result of Experience 537

Overview 537

Neural Activity and Brain Development 537

Critical Periods 538

BOX 24A BUILT-IN BEHAVIORS 540

BOX 24B BIRDSONG 541

Cellular and Molecular Correlates of Activity-Dependent Plasticity during Critical Periods 542

Critical Periods in Visual System Development 543

BOX 24C TRANSNEURONAL LABELING WITH RADIO-ACTIVE AMINO ACIDS 544

Effects of Visual Deprivation on Ocular Dominance 545

BOX 24D CORRELATION AS CAUSATION: LESSONS FROM A THREE-EYED FROG 549

Manipulating Competition 550

Amblyopia, Strabismus, and Critical Periods for Human Vision 551

Evidence for Critical Periods in Other Sensory Systems 552

The Development of Language: A Critical Period for a Distinctly Human Behavior 553
Human Brain Development, Activity-Dependent Plasticity, and Critical Periods 554
Summary 556
Additional Reading 557

CHAPTER 25

Repair and Regeneration in the Nervous System 559

Overview 559
The Damaged Brain 559
Functional Reorganization without Repair 560
Three Types of Neuronal Repair 561
Peripheral Nerve Regeneration 563
The Cellular and Molecular Basis of Peripheral Nerve Repair 564

Regeneration of Peripheral Synapses 567

BOX 25A SPECIFIC REGENERATION OF SYNAPTIC CONNECTIONS IN AUTONOMIC GANGLIA 568

Regeneration after Damage to the Central Nervous System 570

Cellular and Molecular Responses to Injury 570

BOX 25B CASUALTIES OF WAR AND SPORTS 571

Axon Growth after Brain Injury 574

Neurogenesis in the Mature Central Nervous System 575

Adult Neurogenesis in Non-Mammalian Vertebrates 576

Neurogenesis in the Adult Mammalian Brain 577

Cellular and Molecular Mechanisms of Adult Neurogenesis 578

Adult Neurogenesis, Stem Cells, and Brain Repair in Humans 580

BOX 25C NUCLEAR WEAPONS AND NEUROGENESIS 581

Summary 583

Additional Reading 583

UNIT V

COMPLEX BRAIN FUNCTIONS 585

“Planning Neurons” in the Monkey Frontal Cortex 603

Summary 605

Additional Reading 605

CHAPTER 26

Association Cortex and Cognition 587

Overview 587

The Association Cortices 587

An Overview of Cortical Structure 588

Unique Features of the Association Cortices 589

BOX 26A CORTICAL LAMINATION 590

The Parietal Association Cortex Mediates Attention 591

“Attention Neurons” in the Monkey Parietal Cortex 594

The Temporal Association Cortex Mediates Recognition 596

“Recognition Neurons” in the Monkey Temporal Cortex 598

The Frontal Association Cortex Mediates Planning and Decision Making 599

BOX 26B NEUROPSYCHOLOGICAL TESTING 600

BOX 26C PSYCHOSURGERY 602

CHAPTER 27

Speech and Language 607

Overview 607

Language Is Localized and Lateralized in the Brain 607

BOX 27A THE GENERATION OF SPEECH 608

Aphasias 610

BOX 27B DO OTHER ANIMALS HAVE LANGUAGE? 611

BOX 27C WORDS AND MEANING 613

Confirmation of Language Lateralization and Other Insights 615

BOX 27D LANGUAGE AND HANDEDNESS 617

The Search for Anatomical Differences between the Right and Left Hemispheres 618

Mapping Language Functions 619

The Role of the Right Hemisphere 622

Sign Language 622

Summary 623

Additional Reading 623

CHAPTER 28

Sleep and Wakefulness 625

Overview 625

Why Do Humans (and Many Other Animals) Sleep? 625

BOX 28A THE SLEEP STYLES OF DIFFERENT SPECIES 627

The Circadian Cycle of Sleep and Wakefulness 628

BOX 28B MOLECULAR MECHANISMS OF BIOLOGICAL CLOCKS 629

Stages of Sleep 631

BOX 28C ELECTROENCEPHALOGRAPHY 632

Physiological Changes in Sleep States 635

Other Possible Functions of Sleep and Dreaming 636

Neural Circuits Governing Sleep 637

BOX 28D CONSCIOUSNESS 638

Thalamocortical Interactions in Sleep 641

BOX 28E DRUGS AND SLEEP 641

Sleep Disorders 643

BOX 28F CHRONIC FATIGUE SYNDROME 644

Summary 645

Additional Reading 645

CHAPTER 29

Emotions 647

Overview 647

Physiological Changes Associated with Emotion 647

BOX 29A FACIAL EXPRESSIONS: PYRAMIDAL AND EXTRA-PYRAMIDAL CONTRIBUTIONS 648

The Integration of Emotional Behavior 650

The Limbic System 652

The Importance of the Amygdala 653

BOX 29B THE ANATOMY OF THE AMYGDALA 654

BOX 29C THE REASONING BEHIND AN IMPORTANT DISCOVERY 655

BOX 29D FEAR AND THE HUMAN AMYGDALA: A CASE STUDY 657

BOX 29E AFFECTIVE DISORDERS 659

The Relationship between Neocortex and Amygdala 660

Cortical Lateralization of Emotional Functions 661

Emotion, Reason, and Social Behavior 662

Emotional Reinforcement and Addiction 663

Summary 666

Additional Reading 667

CHAPTER 30

Sex, Sexuality, and the Brain 669

Overview 669

Sexual Dimorphisms and Sexually Dimorphic Behaviors 669

Sex, Gonads, Bodies, and Brains 671

BOX 30A THE SCIENCE OF LOVE (OR, LOVE IS A DRUG) 672

Hormonal Influences on Sexual Dimorphism 674

Primary Sexual Dimorphisms in the Brain 676

Brain Dimorphisms and the Control of Reproductive Behaviors 678

Structural and Functional Dimorphisms for Pregnancy and Parenting 680

BOX 30B THE GOOD MOTHER 683

Cellular and Molecular Basis of Sexually Dimorphic Structures and Behaviors 684

Steroid Receptors and Responses in the Adult Brain 686

Human Genetic Disorders of Genotypic and Phenotypic Sex 687

Sexual Orientation and the Brain: Molecular and Genetic Analysis 688

Sexual Orientation and Human Brain Structure 690

Sex-Based Differences in Cognitive Functions 691

Summary 693

Additional Reading 693

CHAPTER 31

Memory 695

Overview 695

Qualitative Categories of Human Memory 695

Temporal Categories of Memory 696

BOX 31A PHYLOGENETIC MEMORY 697

Memory Consolidation and Priming 698

The Importance of Association in Information Storage 698

Conditioned Learning 699

BOX 31B SAVANT SYNDROME 700

Forgetting 702

Brain Systems Underlying Declarative Memory Acquisition and Storage 703

BOX 31C CLINICAL CASES REVEAL AN ANATOMICAL SUBSTRATE FOR DECLARATIVE MEMORIES 703

Brain Systems Underlying Nondeclarative Memory Acquisition and Storage 711

Memory and Aging 712

BOX 31D ALZHEIMER'S DISEASE 713

Summary 714

Additional Reading 715

APPENDIX

***Survey of Human
Neuroanatomy 717***

Overview 717

Neuroanatomical
Terminology 717

Basic Subdivisions of the Central
Nervous System 718

External Anatomy of the Spinal
Cord 720

Internal Anatomy of the Spinal
Cord 721

Brainstem and Cranial Nerves 722

Lateral Surface of the Brain 728

Dorsal and Ventral Surfaces of the Brain 729

Midsagittal Surface of the Brain 730

Internal Anatomy of the Forebrain 731

**BOX A THALAMUS AND THALAMOCORTICAL
RELATIONS 732**

Blood Supply of the Brain and Spinal Cord 735

BOX B STROKE 735

The Blood–Brain Barrier 741

The Meninges 742

The Ventricular System 742

References 744
