Mauricio C. de Oliveira
Mihai Putinar
Editors

Mathematical Methods in Systems, Optimization, and Control

Festschrift in Honor of J. William Helton

 Birkhäuser

Contents

Part I: Biographical and Personal Notes

Helton's Bibliography	3
Personal Notes	13
After Dinner Biographical Notes	17
Bill's Early Work	23
List of Contributors	29

Part II: Technical Papers

<i>J. Agler</i>	
The Carathéodory-Julia Theorem and the Network Realization Formula in Two Variables	33
<i>J.A. Ball and Q. Fang</i>	
Nevanlinna-Pick Interpolation via Graph Spaces and Kreĭn-space Geometry: A Survey	43
<i>E. Basor</i>	
A Brief History of the Strong Szegő Limit Theorem	73
<i>P. Dewilde</i>	
Riccati or Square Root Equation? The Semi-separable Case	85
<i>R.G. Douglas and J. Eschmeier</i>	
Spectral Inclusion Theorems	113
<i>H. Dym</i>	
Tutorial on a Nehari Problem and Related Reproducing Kernel Spaces	129
<i>A.E. Frazho, S. ter Horst and M.A. Kaashoek</i>	
Optimal Solutions to Matrix-valued Nehari Problems and Related Limit Theorems	151

<i>P.A. Fuhrmann and U. Helmke</i>	
On Theorems of Halmos and Roth	173
<i>M. Harrison</i>	
Pfister's Theorem Fails in the Free Case	189
<i>J.W. Helton, I. Klep and S. McCullough</i>	
Free Analysis, Convexity and LMI Domains	195
<i>R. Howe</i>	
Traces of Commutators of Integral Operators – the Aftermath	221
<i>M.R. James</i>	
Information States in Control Theory: From Classical to Quantum	233
<i>J. Nie</i>	
Convex Hulls of Quadratically Parameterized Sets With Quadratic Constraints	247
<i>D. Plaumann, B. Sturmfels and C. Vinzant</i>	
Computing Linear Matrix Representations of Helton-Vinnikov Curves	259
<i>L. Rodman and H.J. Woerdeman</i>	
Positive Completion Problems Over C^* -algebras	279
<i>M.S. Takyar and T.T. Georgiou</i>	
Fractional-order Systems and the Internal Model Principle	295
<i>E. Tannenbaum, T. Georgiou and A. Tannenbaum</i>	
Optimal Mass Transport for Problems in Control, Statistical Estimation, and Image Analysis	311
<i>V. Vinnikov</i>	
LMI Representations of Convex Semialgebraic Sets and Determinantal Representations of Algebraic Hypersurfaces: Past, Present, and Future	325
<i>N.J. Young</i>	
Some Analysable Instances of μ -synthesis	351
