

10TH EDITION

DISEASES OF SWINE

EDITED BY

Jeffrey J. Zimmerman
Locke A. Karriker
Alejandro Ramirez
Kent J. Schwartz
Gregory W. Stevenson

 **WILEY-BLACKWELL**
A John Wiley & Sons, Inc., Publication

Contents

List of Tables	viii	
Contributing Authors	xiii	
Editors' Note	xxiii	
SECTION I VETERINARY PRACTICE		
1 Herd Evaluation	5	
Records, benchmarks, four-circle approach, diagnostic approaches, prioritizing interventions, reporting, blood sample collection, oral fluid collection		
2 Differential Diagnosis of Diseases	18	
Diarrhea, vomiting, rectal prolapses, respiratory distress, sneezing, skin, neurologic, lameness, reproductive, congenital, zoonotic		
3 Behavior and Welfare	32	
Definitions of welfare and cruelty, scientific approaches to study welfare, maternal behaviors, minimizing welfare impact of invasive procedures, feeding and drinking behaviors, human interactions, behavior responses due to disease, recognizing pain		
4 Longevity in Breeding Animals	50	
Assessment of longevity, causes of removal from the herd, causes of sow death, gilt development, boar longevity		
5 Effect of the Environment on Health	60	
Evaluation of the environment, recommended air temperatures, minimum ventilation rates, space recommendations, feeder space recommendations		
6 Optimizing Diagnostic Value and Sample Collection	67	
Developing the diagnostic plan, diagnostic sample selection, pig necropsy, necropsy safety, knife sharpening		
7 Diagnostic Tests, Test Performance, and Considerations for Interpretation	77	
Overview of how specific diagnostic tests are performed, advantages and disadvantages to each type of test, PCR testing considerations		
		including quantitative interpretation, appropriate uses of genetic sequencing
		8 Analysis and Use of Diagnostic Data 94
		Sources of variation in test results, sensitivity and specificity, testing in series or parallel, selecting test cutoff values, selecting appropriate sample size, detecting a difference in prevalence between two groups
		9 Drug Pharmacology, Therapy, and Prophylaxis 106
		Antimicrobial drug classes, considerations for treatment, residue avoidance, regulatory restrictions on treatment, parasiticides, probiotics, hormones, anti-inflammatory drugs
		10 Anesthesia and Surgical Procedures in Swine 119
		Injectable anesthetic agents, catheterization, epidural injection, surgical procedures
		11 Disease Transmission and Biosecurity 141
		Routes of transmission, ecology of disease, pathogen cycles, biological risk management, principles of biosecurity
		12 Preharvest Food Safety, Zoonotic Diseases, and the Human Health Interface 165
		Physical, chemical, and biological hazards; drug residues; MRSA; feed safety; certification programs
		13 Special Considerations for Show and Pet Pigs 179
		Dynamics of the show pig industry, behavior and training, ethics, miniature pigs, teeth trimming, hoof trimming, obesity
SECTION II BODY SYSTEMS		
		14 Cardiovascular and Hematopoietic Systems 189
		Anatomy, pathophysiology, mulberry heart disease, anemia, shock
		15 Digestive System 199
		Interactions of flora, nutrition, immune system, anatomy, pathophysiology, gastric

ulcers, hemorrhagic bowel syndrome, prolapses, hernias			
16 Immune System	227		
Innate and adaptive immunity; cellular, humoral, mucosal, and passive immune mechanisms; stress; nutrition; immunosuppression; vaccination			
17 Integumentary System: Skin, Hoof, and Claw	251		
Pathophysiology of skin, infectious conditions, ear necrosis, porcine dermatopathy and nephropathy syndrome, pathophysiology of foot and claw, traumatic and nutritional contributors to foot and claw lesions			
18 Mammary System	270		
Structure and development, physiology of lactation and colostral transfer, pathophysiology of lactation dysfunction, mastitis, dysgalactia and risk factors			
19 Nervous and Locomotor Systems	294		
Pathophysiology of nervous system, muscle, bone, joint, and eye; congenital abnormalities; splayleg; congenital tremor; myopathy; porcine stress syndrome; arthritis; metabolic bone disease; rickets; osteochondrosis			
20 Diseases of the Reproductive System	329		
Control of estrus, pregnancy, and parturition; pregnancy diagnosis; dystocia; prolapse; discharge; male reproductive function and semen quality; laboratory investigation of abortion and reproductive failure			
21 Respiratory System	348		
Anatomy, pathophysiology			
22 Urinary System	363		
Anatomy, pathophysiology, porcine dermatopathy and nephropathy syndrome			
SECTION III VIRAL DISEASES			
23 Overview of Viruses	383		
Virus taxonomy, characteristics of virus families, table of viral pathogens of swine			
24 Porcine Adenoviruses	392		
25 African Swine Fever Virus	396		
26 Porcine Circoviruses	405		
27 Porcine Anelloviruses	418		
Torque teno sus virus			
28 Herpesviruses	421		
Malignant catarrhal fever (ovine herpesvirus 2), porcine cytomegalovirus, porcine lymphotropic herpesviruses, pseudorabies (Aujeszky's disease) virus			
29 Porcine Parvovirus	447		
30 Swinepox Virus	456		
31 Porcine Reproductive and Respiratory Syndrome Virus (Porcine Arterivirus)	461		
32 Porcine Astroviruses	487		
33 Bunyaviruses	490		
Akabane virus, Lumbo virus, Oya virus, Tahyna virus			
34 Porcine Caliciviruses	493		
Porcine noroviruses, porcine sapoviruses, St-Valérien virus, vesicular exanthema of swine virus			
35 Coronaviruses	501		
Hemagglutinating encephalomyelitis virus, porcine epidemic diarrhea virus, porcine respiratory coronavirus, porcine torovirus, transmissible gastroenteritis virus			
36 Filovirus	525		
Ebolavirus			
37 Flaviviruses	528		
Japanese encephalitis virus, Murray Valley encephalitis virus, West Nile virus			
38 Pestiviruses	538		
Border disease virus, bovine viral diarrhea virus, Bungowannah virus, classical swine fever virus			
39 Hepatitis E Virus	554		
40 Influenza Virus	557		
41 Paramyxoviruses	572		
Menangle virus, Nipah virus, Rubulavirus (blue eye paramyxovirus)			
42 Picornaviruses	587		
Encephalomyocarditis virus, foot-and-mouth disease virus, porcine enteroviruses, porcine kobuvirus, porcine sapelovirus, porcine teschovirus, Seneca Valley virus, swine vesicular disease virus			
43 Reoviruses (Rotaviruses and Reoviruses)	621		
44 Retroviruses	635		
45 Rhabdoviruses	639		
Rabies virus, vesicular stomatitis viruses			
46 Togaviruses	644		
Eastern equine encephalitis virus, Getah virus, Ross River virus, Sagiyama virus			
SECTION IV BACTERIAL DISEASES			
47 Overview of Bacteria	649		
Characteristics of genera, disease mechanisms, table of bacterial diseases			
48 Actinobacillosis	653		
<i>Actinobacillus pleuropneumoniae</i> — pleuropneumonia; <i>Actinobacillus suis</i> — septicemia, pleuropneumonia; <i>Actinobacillus equuli</i> —septicemia			
49 Bordetellosis	670		
<i>Bordetella bronchiseptica</i> —nonprogressive atrophic rhinitis, bronchopneumonia			
50 Brachyspiral Colitis	680		
<i>Brachyspira hyodysenteriae</i> —swine dysentery; <i>Brachyspira pilosicoli</i> —intestinal (colonic) spirochetosis; <i>Brachyspira "suanatina,"</i> <i>intermedia, murdochii</i> —occasional colitis			

51	Brucellosis <i>Brucella suis</i> —infertility, abortion, perinatal mortality	697	subsp. <i>equisimilis</i> —arthritis, other streptococci—various conditions; <i>Enterococcus durans</i> and <i>hirae</i> —diarrhea	
52	Clostridiosis <i>Clostridium perfringens</i> type C—necrohemorrhagic enteritis; <i>Clostridium perfringens</i> type A—necrotizing enteritis; <i>Clostridium difficile</i> —necrotizing colitis; <i>Clostridium septicum</i> , <i>perfringens</i> type A; <i>novyi</i> , <i>chauvoei</i> —cellulitis and gas gangrene; <i>Clostridium tetani</i> —tetanus; <i>Clostridium botulinum</i> —botulism	709	63 Tuberculosis <i>Mycobacterium avium</i> complex; <i>M. bovis</i> ; <i>M. tuberculosis</i> —localized alimentary lymphadenitis, rare disseminated tuberculosis; <i>Mycobacterium kansasii</i> ; <i>M. zenopi</i> ; <i>M. fortuitum</i> ; <i>M. avium</i> subsp. <i>paratuberculosis</i> —uncertain significance	856
53	Colibacillosis Neonatal <i>E. coli</i> diarrhea, postweaning <i>E. coli</i> diarrhea and edema disease, <i>E. coli</i> causing fatal shock, systemic <i>E. coli</i> infections, coliform mastitis, nonspecific urinary tract infection	723	64 Miscellaneous Bacterial Infections <i>Actinobaculum (Eubacterium) suis</i> —cystitis, pyelonephritis; <i>Arcanobacterium pyogenes</i> —pyogenic sepsis; <i>Bacillus anthracis</i> —anthrax; <i>Burkholderia pseudomallei</i> —melioidosis; <i>Campylobacter</i> spp.—enterocolitis; <i>Chlamydia</i> —enteritis, pneumonia, abortion, etc.; <i>Listeria monocytogenes</i> —septicemia, encephalitis, abortion; <i>Rhodococcus equi</i> —granulomatous lymphadenitis; <i>Treponema pedis</i> —ear necrosis, other skin lesions; <i>Yersinia</i> spp.—enterocolitis	866
54	Erysipelas <i>Erysipelothrix rhusiopathiae</i> , <i>tonsillarum</i> —septicemia, arthritis, endocarditis	750		
55	Glässer's Disease <i>Haemophilus parasuis</i> —fibrinous polyserositis and arthritis	760		
56	Leptospirosis <i>Leptospira</i> spp. serovars Pomona, Kennewicki, Bratislava, Muenchen, Tarassovi, Canicola, Grippotyphosa, Hardjo, others—abortion and stillbirths	770	SECTION V PARASITIC DISEASES	
57	Mycoplasmosis <i>Mycoplasma hyopneumoniae</i> —pneumonia; <i>Mycoplasma hyorhinis</i> —polyserositis, arthritis; <i>Mycoplasma hyosynoviae</i> —arthritis; <i>Mycoplasma (Eperythrozoon) suis</i> —anemia, other mycoplasmas—mostly nonpathogenic	779	65 External Parasites Mange (<i>Sarcoptes</i> , <i>Demodex</i>), lice, fleas, mosquitoes, flies (myiasis), ticks	885
58	Pasteurellosis <i>Pasteurella multocida</i> —progressive atrophic rhinitis, pneumonia, septicemia	798	66 Coccidia and Other Protozoa Coccidia (<i>Isospora</i> , <i>Eimeria</i>), <i>Toxoplasma</i> , <i>Sarcocystis</i> , <i>Cryptosporidium</i> , <i>Giardia</i> , microsporidia (<i>Enterocytozoon</i> , <i>Encephalitozoon</i>), <i>Balantidium coli</i> , <i>Entamoeba</i>	895
59	Proliferative Enteropathy <i>Lawsonia intracellularis</i> —porcine proliferative enteropathy, proliferative hemorrhagic enteropathy	811	67 Internal Parasites: Helminths Nematodes— <i>Gongylonema</i> , <i>Hyostrongylus</i> , <i>Strongyloides</i> , <i>Ascaris</i> , <i>Trichinella</i> , <i>Trichuris</i> , <i>Oesophagostomum</i> , <i>Metastrongylus</i> , <i>Paragonimus</i> , <i>Stephanurus</i> , and others; Cestodes— <i>Echinococcus</i> , <i>Taenia</i> , and others; parasiticides	908
60	Salmonellosis <i>Salmonella choleraesuis</i> var. <i>kunzendorf</i> —septicemia, enterocolitis; <i>Salmonella typhimurium</i> , <i>heidelberg</i> , <i>typhisuis</i> —enterocolitis; <i>Salmonella dublin</i> , <i>enteritidis</i> —meningitis	821	SECTION VI NONINFECTIOUS DISEASES	
61	Staphylococcosis <i>Staphylococcus hyicus</i> —exudative epidermitis; <i>Staphylococcus aureus</i> —skin infections, mastitis, others	834	68 Nutrient Deficiencies and Excesses Factors contributing to nutritional diseases, clinical signs, investigation	923
62	Streptococcosis <i>Streptococcus suis</i> —septicemia, meningitis, others; <i>Streptococcus porcinus</i> —cervical lymphadenitis; <i>Streptococcus dysgalactiae</i>	841	69 Mycotoxins in Grains and Feeds Aflatoxin, ochratoxin, citrinin, trichothecenes (T-2 toxin, DON), zearalenone, and fumonisins	938
			70 Toxic Minerals, Chemicals, Plants, and Gases Minerals, feed additives, pesticides, toxic plants, nitrite, effects of water quality, toxic gases, and ventilation failure	953
			Index	968
