

Nutrition, Immunity and Infection

Prakash Shetty

*School of Medicine
University of Southampton, UK*

Contents

Preface	ix
Foreword	xi
Glossary	xiii
1 Nutrition, Immunity and Infection	1
1.1 Introduction	1
1.2 Interaction and Synergism of Nutrition, Immunity and Infection	1
1.3 Historical Background to the Study of the Interactions of Nutrition and Infection	2
1.4 Rationale for the Book	4
1.5 Structure of the Book	5
2 Immune Systems: The Defence Mechanisms of the Body	6
2.1 Introduction	6
2.2 The Defence Mechanisms of the Body	6
2.3 Physical Barriers to Infectious Agents or Pathogens	10
2.4 Inflammation and Innate Immunity	11
2.5 Adaptive or Acquired Immunity	15
2.6 Immunization	21
3 Role of Nutrients in Immune Functions	23
3.1 Introduction	23
3.2 Energy and Protein	23
3.3 Fats and Fatty Acids	29
3.4 Vitamin A and the Immune Response	30
3.5 Iron and the Immune Response	33
3.6 Zinc and the Immune Response	35
3.7 Other Micronutrients and Immune Function	36
3.8 Nutrients and Cytokines	38
4 Undernutrition, Host Defence Mechanisms and Risk of Infection	40
4.1 Introduction	40
4.2 Severe Undernutrition and Changes in the Host's Defence Systems	43
4.3 Changes in Immune Function in Intrauterine Growth Retardation	47
4.4 Changes in Immune Function seen in Protein-Energy Malnutrition in Children	49
4.5 Undernutrition and the Increased Risk of Infection	51
4.6 Undernutrition, Morbidity and Mortality	52
4.7 Tests of Immunocompetence in Undernutrition	52
5 Infections and Undernutrition: Causation and Consequences	57
5.1 Introduction	57
5.2 Infection and Immediate Causation of Undernutrition in Children	57
5.3 Effect of Infection on the Nutritional Status of the Host	58
5.4 Infections that Predispose to Poor Nutrition Status and Undernutrition	64

6	Vitamin A Deficiency and Risk of Infection	73
6.1	Introduction	73
6.2	Vitamin A and Its Role in Immune Function	74
6.3	Vitamin A Deficiency and Risk of Morbidity and Mortality due to Infections	77
6.4	Vitamin A Supplementation on Mortality, Morbidity and Resistance to Infections	79
6.5	Vitamin A Supplementation during Acute Illness	81
6.6	Effects of Infections on Vitamin A Status	82
7	Iron Status and Risk of Infection	88
7.1	Introduction	88
7.2	Iron Deficiency and Immune Function	90
7.3	Iron Deficiency and Increased Risk of Infection	92
7.4	Iron Deficiency and Reduced Risk of Infection	93
7.5	Iron Deficiency, Iron Supplementation and Risk of Infection	95
7.6	Iron Overload and Immunity	97
8	Zinc Deficiency and Infections	101
8.1	Introduction	101
8.2	Zinc and Immune Function	104
8.3	Zinc Deficiency and Risk of Infection	106
8.4	Zinc Supplementation and Its Effects on Infectious Disease Risk	107
8.5	Zinc as an Adjunct in the Treatment of Infections	109
8.6	Zinc Toxicity	110
9	Nutrition, HIV/AIDS and Tuberculosis	114
9.1	Introduction	114
9.2	HIV Infection and the Immune System	114
9.3	Nutrition and HIV Infections and AIDS	117
9.4	Nutrition and Tuberculosis	124
10	Nutrition, Immunity and Infections of Infants and Children	131
10.1	Introduction	131
10.2	Undernutrition, Micronutrient Deficiencies and Infections in Infancy and Childhood	132
10.3	Nutritional Interventions and Infections in Childhood	136
11	Maternal Nutrition, Infections and Birth Outcomes	141
11.1	Introduction	141
11.2	Intrauterine Growth Restriction and Low Birth Weight	141
11.3	Nutrition, Maternal Mortality and Morbidity	148
12	Nutrition, Immunity and Infections in the Elderly	153
12.1	Introduction	153
12.2	Changes in Immune Function with Ageing	154
12.3	Changes in Nutritional Status with Ageing	156
12.4	Effects of Nutrient Supplementation on Immune Function in the Elderly	158
12.5	Nutritional Interventions and Risk of Infections in the Elderly	160
12.6	Immune Function in Severe Malnutrition in the Elderly	160
13	Nutrition, Immunity and Chronic Diseases	164
13.1	Introduction	164
13.2	Nutrition, Immunity and Cancer	164
13.3	Nutrition and Autoimmune Diseases	168
13.4	Nutrition, Immunity and Other Chronic Diseases	170

14	Probiotics, Prebiotics and Immunity	172
14.1	Introduction	172
14.2	Probiotics	173
14.3	Prebiotics	178
14.4	Synbiotics	179
15	Food Allergy	181
15.1	Introduction	181
15.2	Mechanism of Immune-mediated Food Allergy	182
15.3	Manifestations of Food Allergy	184
15.4	Foods that Cause Allergic Reactions and Their Properties	185
15.5	Factors that Influence Susceptibility to Food Allergies	187
15.6	Diagnosis and Management of Food Allergy	187
	Source Material	191
	Index	199
