Table of contents

Preface	13
1. Herd management factors that influence whole herd feed efficiency	15
<i>A.M. Gaines, B.A. Peterson and O.F. Mendoza</i>	
Introduction	15
Are we measuring feed conversion correctly?	16
How do we measure ourselves over time?	17
Is it time to shift our thinking?	20
What is the best way to measure feed efficiency in the sow herd?	20
Factors in a production system that could impact whole herd feed efficiency	23
Sow replacement rate	23
Timing of mortality	24
Impact of birth weight on feed efficiency	26
The effects of weaning weight on feed efficiency	28
Harvest weight	29
Pig removal strategies at marketing	31
Floor and feeder space impacts on feed efficiency	32
Conclusion	35
References	36
2. Feeding and barn management strategies that maximize feed efficiency	41
<i>M.D. Tokach, R.D. Goodband, J.M. DeRouchey, S.S. Dritz and J.L. Nelssen</i>	
Introduction	41
Prior to entry	42
Loading the barn	46
Daily chores	48
Unloading the barn	55
Conclusions	58
References	59
3. Liquid feeding corn-based diets to growing pigs: practical considerations and use of co-products	63
<i>C.F.M. de Lange and C.H. Zhu</i>	
Introduction	63
Design of liquid feeding systems	64
Liquid feeding practices	66
Effects of liquid feeding corn-based feeds on growth performance and carcass characteristics	68
Use of liquid co-products: corn distillers solubles and corn steep water	71
Use of dry high-fiber co-products: wheat shorts and dried distillers grains with solubles	75
Conclusions and implications	76
Acknowledgements	78
References	78

Table of contents

4. Amino acid nutrition and feed efficiency	81
<i>C.F.M. de Lange, C.L. Levesque and B.J. Kerr</i>	
Introduction	81
Whole body protein deposition and pig growth performance	82
Biology of amino acid utilization in growing pigs	84
Effect of between-animal variability on optimum dietary amino acid levels for groups of pigs	88
Implications of phase-feeding and compensatory growth for establishing optimum dietary amino acid levels	90
NRC approach to estimating amino acid requirements of growing-finishing pigs	93
Conclusions and implications	97
References	98
5. The influence of dietary energy on feed efficiency in grow-finish swine	101
<i>J.F. Patience</i>	
Introduction	101
Defining and expressing feed efficiency	102
Definition of dietary energy	105
Dietary sources of energy	108
Energy systems	110
Dietary energy used for maintenance and for gain	116
Daily energy intake	120
Other considerations	122
Practical approaches to improving feed efficiency	122
Conclusion and implications	125
References	125
6. Feed processing to maximize feed efficiency	131
<i>C.R. Stark</i>	
Introduction	131
Ingredient selection and least cost formulation	132
Feed manufacturing quality assurance	135
Feed manufacturing	138
Feed ordering and delivery	148
Conclusion	149
References	149
7. The genetic and biological basis of residual feed intake as a measure of feed efficiency	153
<i>J.M. Young and J.C.M. Dekkers</i>	
Introduction	153
The genetic basis of residual feed intake	154
Physiological basis of residual feed intake	154
Selection experiment in Yorkshire pigs to create lines divergent in residual feed intake	156
Conclusions	163
Acknowledgements	163
References	164

8. Pig breeding for improved feed efficiency	167
<i>P.W. Knap and L. Wang</i>	
Feed efficiency: past developments	167
Feed efficiency: biological backgrounds	169
Genetic change in production traits and feed efficiency	173
Breeding for improved feed efficiency	175
Implications	178
References	179
9. Effect of climatic environment on feed efficiency in swine	183
<i>D. Renaudeau, H. Gilbert, and J. Noblet</i>	
Introduction	183
General aspects	184
Consequences of thermal stress on feed efficiency	187
Strategies for alleviating the effects of thermal stress on feed efficiency	196
Conclusion	203
References	205
10. Fueling the immune response: what's the cost?	211
<i>R.W. Johnson</i>	
Introduction	211
Relationship between disease and growth performance	212
How does the immune system sense the pathogenic environment?	215
How does the immune system affect growth?	218
What does it cost to nourish the immune response?	220
Acknowledgements	220
References	220
11. Influence of health on feed efficiency	225
<i>S.S. Dritz</i>	
Introduction	225
Direct effects of mortality	226
Chronic immune stimulation	227
Production responses to in-feed antimicrobials in multi-site production	228
Field data	229
Future advances	234
Conclusion	235
References	235
12. Physiology of feed efficiency in the pig: emphasis on the gastrointestinal tract and specific dietary examples	239
<i>J.R. Pluske</i>	
Introduction	239
Secretions from the lactating sow and piglet growth efficiency	239
Growth factors in colostrum and milk	242
Changes in feed efficiency associated with weaning	243

Table of contents

Relationships between dietary protein source and post-weaning diarrhea	247
ZnO as a growth-promoting compound to enhance feed efficiency after weaning	250
Conclusions	251
References	253
13. Emerging technologies with the potential to improve feed efficiency in swine	259
<i>F.R. Dunshea</i>	
Introduction	259
Porcine somatotropin	260
Ractopamine	261
Cysteamine	263
Chromium	264
Betaine	266
Dietary neuroleptics	266
Immunization against GnRF	268
Conclusions	269
References	269
