

OCCUPATIONAL SAFETY AND HEALTH

for Technologists, Engineers, and Managers

SIXTH EDITION

DAVID L. GOETSCH

President and CEO, The Institute for Workforce Transformation

Pearson Education International

CONTENTS

PART 1 HISTORICAL PERSPECTIVE AND OVERVIEW 1

- 1 Safety and Health Movement, Then and Now 3**
 - Developments Before the Industrial Revolution 4
 - Milestones in the Safety Movement 5
 - Tragedies That Have Changed the Safety Movement 7
 - Role of Organized Labor 10
 - Role of Specific Health Problems 11
 - Development of Accident Prevention Programs 13
 - Development of Safety Organizations 14
 - Safety and Health Movement Today 17
 - Integrated Approach to Safety and Health 17
 - New Materials, New Processes, and New Problems 18
 - Rapid Growth in the Profession 19
- 2 Accidents and Their Effects 22**
 - Costs of Accidents 23
 - Accidental Deaths in the United States 24
 - Accidents versus Other Causes of Death 25
 - Work Accident Costs and Rates 26
 - Time Lost Because of Work Injuries 27
 - Deaths in Work Accidents 27
 - Work Injuries by Type of Accident 27
 - Death Rates by Industry 28
 - Parts of the Body Injured on the Job 29
 - Chemical Burn Injuries 29
 - Heat Burn Injuries 30
 - Repetitive Strain/Soft-Tissue Injuries 31

Estimating the Cost of Accidents	32
Global Impact of Accidents and Injuries	35

3 Theories of Accident Causation 40

Domino Theory of Accident Causation	41
Human Factors Theory of Accident Causation	43
Accident/Incident Theory of Accident Causation	46
Epidemiological Theory of Accident Causation	48
Systems Theory of Accident Causation	50
Combination Theory of Accident Causation	54
Behavioral Theory of Accident Causation	55
Drugs and Accident Causation	57
Depression and Accident Causation	58
Management Failures and Accident Causation	59
Obesity and Accident Causation	61

4 Roles and Professional Certifications for Safety and Health Professionals 65

Modern Safety and Health Teams	65
Safety and Health Manager	66
Engineers and Safety	75
Industrial Hygienist	83
Health Physicist	83
Occupational Physician	84
Occupational Health Nurse	86
Risk Manager	87
Certification of Safety and Health Professionals	88
Certified Professional Ergonomist	91
Certified Occupational Health Nurse	93

5 Safety, Health, and Competition in the Global Marketplace 88

Competitiveness Defined	99
Productivity and Competitiveness	100
Quality and Competitiveness	103
How Safety and Health Can Improve Competitiveness	104

PART 2 LAWS AND REGULATIONS

6 The OSH Act, Standards, and Liability 111

Rationale for the OSH Act	112
OSHA's Mission and Purpose	112

OSH Act Coverage	113
OSHA Standards	114
OSHA's Record Keeping and Reporting	120
Keeping Employees Informed	128
Workplace Inspections and Enforcement	128
OSHA's Enhanced Enforcement Policy	129
Citations and Penalties	131
Appeals Process	133
State-Level OSHA Programs	134
Services Available from OSHA	137
Employer Rights and Responsibilities	140
Employee Rights and Responsibilities	142
Keeping Up-to-Date on OSHA	143
Problems with OSHA	144
Other Agencies and Organizations	145
OSHA's General Industry Standards	150
OSHA's Maritime Standards	159
OSHA's Construction Standards	162
Standards and Codes	163
Laws and Liability	163

7 Workers' Compensation 174

Overview of Workers' Compensation	174
Historical Perspective	177
Workers' Compensation Legislation	179
Modern Workers' Compensation	180
Workers' Compensation Insurance	183
Resolution of Workers' Compensation Disputes	185
Injuries and Workers' Compensation	186
Disabilities and Workers' Compensation	188
Monetary Benefits of Workers' Compensation	193
Medical Treatment and Rehabilitation	193
Medical Management of Workplace Injuries	196
Administration and Case Management	197
Cost Allocation	198
Problems with Workers' Compensation	198
Spotting Workers' Compensation Fraud and Abuse	199
Future of Workers' Compensation	200
Cost-Reduction Strategies	202

8	Accident Investigation and Reporting	211
	Types of Accident Investigations	212
	When to Investigate	212
	What to Investigate	213
	Who Should Investigate	216
	Conducting the Investigation	216
	Interviewing Witnesses	219
	Reporting Accidents	222
	Ten Accident Investigation Mistakes to Avoid	227
9	Product Safety and Liability	232
	Product Liability and the Law	233
	Developing a Product Safety Program	238
	Evaluating the Product Safety Program	240
	Role of the Safety and Health Professional	241
	Quality Management and Product Safety	242
	Product Safety Program Record Keeping	244
	User Feedback Collection and Analysis	246
	Product Literature and Safety	246

PART 3 THE HUMAN ELEMENT

10	Ergonomic Hazards: Musculoskeletal Disorders (MSDs) and Cumulative Trauma Disorders (CTDs)	255
	Ergonomics Defined	256
	Human Factors and Ergonomic Hazards	257
	Factors Associated with Physical Stress	258
	Ergonomics: A Political Football	260
	OSHA's Voluntary Ergonomics Guidelines	261
	Worksite Analysis Program for Ergonomics	266
	Hazard Prevention and Control	270
	Medical Management Program	271
	Training and Education	275
	Common Indicators of Problems	276
	Identifying Specific Ergonomic Problems	277
	Ergonomic Problem-Solving Strategies	279
	Economics of Ergonomics	285
	Cumulative Trauma Disorders (CTDs)	287
	Participatory Ergonomics	292

11 Stress and Safety 296

- Workplace Stress Defined 296
- Sources of Workplace Stress 297
- Human Reactions to Workplace Stress 300
- Measurement of Workplace Stress 301
- Shift Work, Stress, and Safety 302
- Improving Safety by Reducing Workplace Stress 303
- Stress in Safety Managers 305
- Stress and Workers' Compensation 306

12 Safety and Health Training 000

- Rationale for Safety and Health Training 311
- Education and Training Requirements 315
- Safety and Health Professionals as Trainers 319
- Preparing Safety and Health Instruction 321
- Presenting Safety and Health Instruction 324
- Applying Safety and Health Instruction 331
- Evaluating Safety and Health Instruction 331
- Training Supervisors 333
- Training New and Transferred Employees 335
- Job Safety Analysis as a Training Technique 338
- Training Opportunities Available 340
- Illiteracy and Safety 342
- English as a Second Language Training 345
- OSHA Standards and Training 347

13 Violence in the Workplace 352

- Occupational Safety and Workplace Violence:
The Relationship 353
- Workplace Violence: Definitions 353
- Workplace Violence: Cases 354
- Size of the Problem 356
- Legal Considerations 358
- Risk-Reduction Strategies 360
- Contributing Social and Cultural Factors 362
- OSHA's Voluntary Guidelines 364
- Conflict Resolution and Workplace Violence 373
- Do's and Don'ts for Supervisors 377
- Emergency Preparedness Plan 378

PART 4 HAZARD ASSESSMENT, PREVENTION, AND CONTROL

- 14 Mechanical Hazards and Machine Safeguarding 385**
- Common Mechanical Injuries 386
 - Safeguarding Defined 389
 - OSHA's Requirements for Machine Guarding 390
 - Risk Assessment in Machine Operation 390
 - Requirements for All Safeguards 392
 - Point-of-Operation Guards 393
 - Point-of-Operation Devices 397
 - Machine Guarding Self-Assessment 399
 - Feeding and Ejection Systems 399
 - Robot Safeguards 400
 - Control of Hazardous Energy (Lockout/Tagout Systems) 400
 - General Precautions 406
 - Basic Program Content 407
 - Taking Corrective Action 407
- 15 Falling, Impact, Acceleration, Lifting, and Vision Hazards 411**
- Causes of Falls 411
 - Kinds of Falls 412
 - Walking and Slipping 412
 - Slip and Fall Prevention Programs 416
 - OSHA Fall Protection Standards 418
 - Ladder Safety 421
 - What to Do After a Fall 423
 - Monitor Fall Protection Equipment and Know Why It Fails 424
 - Impact and Acceleration Hazards 424
 - Lifting Hazards 433
 - Standing Hazards 437
 - Hand Protection 439
 - Personal Protective Equipment 442
 - Forklift Safety (Powered Industrial Trucks) 444
- 16 Hazards of Temperature Extremes 452**
- Thermal Comfort 452
 - Heat Stress and Strain 453
 - Cold Stress 458
 - Burns and Their Effects 462
 - Chemical Burns 465

17 Pressure Hazards 470

- Pressure Hazards Defined 470
- Sources of Pressure Hazards 472
- Boilers and Pressure Hazards 473
- High-Temperature Water Hazards 473
- Hazards of Unfired Pressure Vessels 474
- Hazards of High-Pressure Systems 475
- Cracking Hazards in Pressure Vessels 475
- Nondestructive Testing of Pressure Vessels 477
- Pressure Dangers to Humans 478
- Decompression Procedures 479
- Measurement of Pressure Hazards 480
- Reduction of Pressure Hazards 482

18 Electrical Hazards 487

- Electrical Hazards Defined 487
- Sources of Electrical Hazards 491
- Electrical Hazards to Humans 495
- Detection of Electrical Hazards 496
- Reduction of Electrical Hazards 497
- OSHA's Electrical Standards 501
- Electrical Safety Program 502
- Electrical Hazards Self-Assessment 503
- Prevention of Arc Flash Injuries (NFPA 70E) 505

19 Fire Hazards and Life Safety 511

- Fire Hazards Defined 512
- Sources of Fire Hazards 516
- Fire Dangers to Humans 520
- Detection of Fire Hazards 521
- Reduction of Fire Hazards 521
- Development of Fire Safety Standards 527
- OSHA Fire Standards 528
- Life Safety 529
- Flame-Resistant Clothing 532
- Fire Safety Programs 533
- Explosive Hazards 535
- OSHA's Firefighting Options 537
- Self-Assessment in Fire Protection 539

20 Industrial Hygiene Confined Spaces 544

Overview of Industrial Hygiene	545
Industrial Hygiene Standards	545
OSH Act and Industrial Hygiene	546
Hazards in the Workplace	551
Toxic Substances Defined	553
Entry Points for Toxic Agents	553
Effects of Toxic Substances	556
Relationship of Doses and Responses	557
Airborne Contaminants	558
Effects of Airborne Toxics	559
Effects of Carcinogens	561
Asbestos Hazards	561
Indoor Air Quality and “Sick-Building” Syndrome	565
Toxic Mold and Indoor Air Quality	567
Threshold Limit Values	569
Hazard Recognition and Evaluation	572
Prevention and Control	573
NIOSH and Industrial Hygiene	577
NIOSH Guidelines for Respirators	578
Standards and Regulations	581
General Safety Precautions	584
Confined Spaces Hazards	585
OSHA Confined Space Standard	587
Confined Space Management Policy	592
OSHA Standards for Toxic and Hazardous Materials	595
OSHA’s Hazard Communication Standard	596

21 Radiation Hazards 604

Ionizing Radiation: Terms and Concepts	605
Exposure of Employees to Radiation	606
Precautions and Personal Monitoring	607
Caution Signs and Labels	608
Evacuation Warning Signal	609
Instructing and Informing Personnel	609
Storage and Disposal of Radioactive Material	610
Notification of Incidents	611
Reports and Records of Overexposure	611
Notice to Employees	612
Nonionizing Radiation	615

Electromagnetic Fields in the Workplace	618
OSHA Standards for Health and Environmental Controls	621

22 Noise and Vibration Hazards 626

Hearing Loss Prevention Terms	626
Characteristics of Sound	628
Hazard Levels and Risks	630
Standards and Regulations	631
Workers' Compensation and Noise Hazards	638
Identifying and Assessing Hazardous Noise Conditions	639
Noise Control Strategies	640
Vibration Hazards	646
Other Effects of Noise Hazards	649
Corporate Policy	649
Evaluating Hearing Loss Prevention Programs	651

23 Computers, Automation, and Robots 659

Impact of Automation on the Workplace	659
VDTs in Offices and Factories	660
Human–Robot Interaction	663
Safety and Health Problems Associated with Robots	664
Safety and Health in Office Automation	667
Industrial Medicine and Robots	670
Technological Alienation in the Automated Workplace	671
Minimizing the Problems of Automation	672
Challenge for the Future	675

24 Bloodborne Pathogens in the Workplace 681

Facts about AIDS	681
Symptoms of AIDS	682
AIDS in the Workplace	683
Legal Concerns	686
AIDS Education	690
Counseling Infected Employees	692
Easing Employees' Fears about AIDS	693
Protecting Employees from AIDS	693
Hepatitis B (HBV) and Hepatitis C (HCV) in the Workplace	695
OSHA's Standard on Occupational Exposure to Bloodborne Pathogens	699
Preventing and Responding to Needlestick Injuries	704

PART 5 MANAGEMENT OF SAFETY AND HEALTH 709

25 Preparing for Emergencies and Terrorism 711

- Rationale for Emergency Preparation 712
- Emergency Planning and Community Right-to-Know Act 712
- Organization and Coordination 714
- OSHA Standards 715
- First Aid in Emergencies 716
- How to Plan for Emergencies 719
- Planning for Workers with Disabilities 724
- Evacuation Planning 728
- Customizing Plans to Meet Local Needs 730
- Emergency Response 731
- Computers and Emergency Response 732
- Dealing with the Psychological Trauma of Emergencies 733
- Recovering from Disasters 735
- Terrorism in the Workplace 737
- Resuming Business after a Disaster 741

26 Ethics and Safety 747

- An Ethical Dilemma 748
- Ethics Defined 749
- Ethical Behavior in Organizations 750
- Safety and Health Professionals' Role in Ethics 751
- Company's Role in Ethics 753
- Handling of Ethical Dilemmas 756
- Questions to Ask When Making Decisions 757
- Ethics and Whistle-Blowing 758

27 Hazard Analysis/Prevention and Safety Management 765

- Overview of Hazard Analysis 766
- Preliminary Hazard Analysis 767
- Detailed Hazard Analysis 769
- Hazard Prevention and Deterrence 778
- OSHA Process Safety Standard 780
- Risk Assessment 783
- Safety Management Concerns 784
- Best Practices in Safety Management 788
- Occupational Health and Safety Management Systems 790

28 Promoting Safety 795

- Company Safety Policy 796
- Safety Rules and Regulations 797
- Employee Participation in Promoting Safety 798
- Safety Training 798
- Suggestion Programs 799
- Visual Awareness 799
- Safety Committees 802
- Personal Commitment to Workplace Safety 804
- Employee–Management Participation 805
- Incentives 806
- Competition 808
- Company-Sponsored Wellness Programs 808
- Teamwork Approach to Promoting Safety 809
- Persuasion as a Promotional Tool 814

29 Environmental Safety and ISO 14000 (Environmental Management) 819

- Safety, Health, and the Environment 819
- Legislation and Regulation 820
- Types of Environments 823
- Role of Safety and Health Professionals 824
- Hazards of the Environment 825
- Hazardous Waste Reduction 830
- Environmental Management System (EMS) 835
- International Organization for Standardization (ISO) 841
- ISO 14000 842
- ISO 14000 Series of Standards 842
- ISO 14001 Standard 844
- ISO 14000 Success Story 856

30 TSM: Safety Management in a Quality Management Setting 861

- What Is QM? 862
- How Does QM Relate to Safety? 863
- Safety Management in a QM Setting 865
- What Is TSM? 865
- Translating TSM into Action 867
- Fundamental Elements of TSM 869
- Rationale for TSM 874
- Implementing TSM: The Model 874

31 Establishing a Safety-Friendly Corporate Culture	878
Safety-Friendly Corporate Culture Defined	878
Importance of Having a Safety-Friendly Corporate Culture	879
Globalization of Competition and Safety	880
How Corporate Cultures Are Created	882
What a Safety-Friendly Corporate Culture Looks Like	883
Ten Steps for Establishing a Safety-Friendly Corporate Culture	884
 Glossary	 893
 Index	 915
