

Corporate Social Responsibility,
Corporate Governance
and Economic Performance

Dissertation

for the Faculty of Economics, Business Administration
and Information Technology of the University of Zurich

to achieve the title of
Doctor of Economics

presented by
Urs Peter von Arx
von Stüsslingen (SO)

approved at the request of
Prof. Dr. L. Bretschger
Prof. Dr. H. Geiger

| List of Figures | V |
| List of Tables | VII |
| List of Variables | IX |
| List of Abbreviations | XI |
| | |
| 1 Introduction | 1 |
| | |
| 2 Corporate Governance and Corporate Social Responsibility | 17 |
| 2.1 Introduction | 18 |
| 2.2 Complexities of Corporate Governance | 20 |
| 2.2.1 Scope for dysfunctional management actions | 20 |
| 2.2.2 Countervailing powers and instruments | 21 |
| 2.2.3 Corporate objective: Short term or long term profits/cash flow | 24 |
| 2.2.4 Firm value and shareholder value | 27 |
| 2.2.5 Empirical evidence on corporate governance | 29 |
| 2.3 Aspects of Corporate Social Responsibility | 30 |
| 2.3.1 Definitions of CSR | 31 |
| 2.3.2 Motivations and possibilities to undertake “CSR” | 33 |
| 2.3.3 Conclusions on integrating CSR issues | 38 |
| 2.4 The problem of welfare maximisation | 39 |
| 2.5 Summary and Conclusion | 40 |

| | | |
|----------|---|------------|
| 3 | Principle Guided Investing | 45 |
| 3.1 | Introduction | 46 |
| 3.2 | Exclusionary environmental screens | 50 |
| 3.3 | The basic model | 53 |
| 3.4 | Equilibrium and comparative statics | 55 |
| 3.5 | Numerical Examples | 58 |
| 3.5.1 | Baseline set of parameters | 59 |
| 3.5.2 | Different abatement costs | 61 |
| 3.5.3 | Different risk characteristics: Clean firms as a different asset class | 62 |
| 3.5.4 | Positive externalities on expected value of clean firms | 65 |
| 3.6 | Expected and required return | 67 |
| 3.7 | Implications for the Application of EES | 72 |
| 3.8 | Summary and conclusions | 74 |
| 4 | The Influence of Pension Funds on Corporate Governance | 77 |
| 4.1 | Introduction | 78 |
| 4.2 | Model for coalition building | 83 |
| 4.2.1 | The Model - voice only | 84 |
| 4.2.2 | Exit option | 93 |
| 4.3 | Coalition of "universal owners" and externalities in profits | 98 |
| 4.4 | Concluding Comments | 99 |
| 4.5 | Appendix | 101 |
| 4.5.1 | Hazard Rate | 101 |
| 4.5.2 | Solution Algorithm | 102 |
| 4.5.3 | MatLab - solution routine | 104 |
| 5 | CSR and the Stock Performance of European Corporations | 105 |
| 5.1 | Introduction | 106 |
| 5.2 | Literature Review | 108 |
| 5.3 | Data and Variables | 111 |

| | | |
|-------------------|---|------------|
| 5.3.1 | Sustainability performance data and variables | 111 |
| 5.3.2 | Financial data and variables | 114 |
| 5.4 | Model structure | 116 |
| 5.4.1 | Time-series regressions of baseline models | 116 |
| 5.4.2 | Final cross-sectional regressions | 120 |
| 5.5 | Results | 121 |
| 5.5.1 | Descriptive statistics | 121 |
| 5.5.2 | Econometric analysis | 122 |
| 5.6 | Discussion and robustness checks | 127 |
| 5.7 | Concluding Comments | 129 |
| References | | 133 |

List of Figures

| | | |
|-----|---|----|
| 3.1 | Ratio of clean firms to all firms with abatement costs of 1.0 . . . | 61 |
| 3.2 | Ratio of clean firms to all firms in dependence of abatement costs | 62 |
| 3.3 | Different levels of covariances | 63 |
| 3.4 | Case where clean (polluting) firms have less (more) risk . . . | 65 |
| 3.5 | Case where shares of clean firms have higher expected values due to positive externalities: $\lambda = 0$ (base case) and $\lambda = 0.1$. . | 67 |
| 3.6 | Required return per annum of polluting firms when abatement costs are 0% resp. 10% of expected value | 69 |
| 3.7 | Required return per annum of clean firms when abatement costs are 0% or 10% of expected value | 71 |
| 3.8 | Required return of clean firms when abatement costs are 10% of expected value and in the presence of positive externalities $\lambda = 0.1$ | 72 |
| 4.1 | Determination of the endogenous probability, P | 89 |
| 4.2 | Graphical presentation of the Baseline Scenario (Table 1a). . . | 93 |
| 4.3 | Graphical presentation of the effects of a reduction in the coordination costs compared to the Baseline Scenario (Table 1c). . | 94 |

List of Tables

| | | |
|-----|---|-----|
| 3.1 | Baseline set of parameters | 60 |
| 4.1 | Endogenous probability P and cumulative probability Q . . . | 92 |
| 5.1 | Allocation of dummy variables | 114 |
| 5.2 | Descriptive statistics on the financial variables | 122 |
| 5.3 | OLS parameter estimates for one factor model (CAPM-based) | 125 |
| 5.4 | OLS parameter estimates for Carhart-4 factor based model . . | 126 |
