

Natural history data for species distribution modelling: opportunities and challenges

Inauguraldissertation
der Philosophisch-naturwissenschaftlichen Fakultät
der Universität Bern

vorgelegt von
Heather A. Cole
aus Kanada

Leiter der Arbeit:
Prof. Dr. C. Scheidegger
Dr. A. Bergamini
Eidgenössische Forschungsanstalt WSL, Birmensdorf ZH

Von der Philosophisch-naturwissenschaftlichen Fakultät angenommen.

Bern, 09.03.2011

Der Dekan:
Prof. Dr. S. Decurtins

Contents

Synthesis3

 Presence-only Data 4

Georeferencing Error and Resolution 5

Bias 6

Lack of Absences..... 7

 Modelling Techniques and Accuracy Measures..... 7

 Shifts in Species’ Ranges..... 8

 Species Groups..... 9

 Aims of this Study..... 9

 References 13

Chapter 1:

Natural history data for species distribution modelling: regional effects of spatial error on model success.....19

 Summary..... 21

 Introduction 22

 Methods 24

 Results 29

 Discussion 35

 Acknowledgements..... 39

 References 40

 Supporting Information 44

Chapter 2:

Natural history data for species distribution modelling: Effects of resolution on models from spatially imprecise data55

 Summary..... 57

 Introduction 58

 Methods 60

 Results 63

 Discussion 70

 Acknowledgements..... 74

 References 75

 Supporting Information 79

Chapter 3:

Biased data for species distribution modelling: a test and an application with historical data83

 Summary 85

 Introduction..... 86

 Methods 89

Part 1: Model type, bias and cross-validation..... 89

Part 2: Historical and recent natural history data 91

 Results 95

Part 1: Model type, bias and cross-validation..... 95

Part 2: Historical and recent natural history data 97

 Discussion 100

 Acknowledgements..... 108

 References 109

 Supporting Information..... 114

Summary129

Acknowledgements132

Erklärung133
