List of Tables and Figures

Tables

3.1	Country-specific features of employment policies	43
3.2	Statutory leave arrangements for parents in January 2009	46
3.3	Institutional context for integrating work and family life	53
4.1	Sample size and response rate	60
4.2	Variables used in the analysis (Means)	66
4.3	Case study organizations and number of interviews in each	68
5.1	Public hospitals, workforce characteristics and organizational change at the time of the study	79
5.2	Bank/insurance companies, workforce characteristics and organizational change at the time of the study	82
5.3	IT and telecom companies, workforce characteristics and organizational change at the time of the study	83
5.4	Retail companies, workforce characteristics and organizational change at the time of the study	85
6.1	Satisfaction with work–life balance: Items and the SWLB scale (per cent ‘very satisfied’ or ‘satisfied’ and scale means)	106
6.2	Satisfaction with life: Items and the SWLS scale (per cent ‘strongly agree’, ‘agree’ or ‘slightly agree’ and scale means)	107
6.3	Least squares regression analysis of satisfaction with work–life balance for men and women (standardized OLS coefficients)	110
6.4	Least squares regression analysis of life satisfaction for men and women (standardized OLS coefficients)	113
7.1	Sample composition	125
7.2	Occupational status	126
7.3	Mean scores of study variables	127
7.4	Linear regressions – satisfaction with work–life balance (pooled sample)	130

7.5	Linear regressions – satisfaction with work–life balance, all employees	131
8.1	Correlation matrix	145
8.2	Regression results	146
9.1	Percentage of women in each country and in each company	152
9.2	Means and percentages to describe working hours	152
9.3	Quality of work and quality of life	155
9.4	Relationship between life course, work engagement and quality of life of men and women in eight European countries	157
9.5	Regression analysis to explain work engagement and quality of life, unstandardized coefficients (standard errors in brackets)	159
11.1	Factors making up the axes	190
11.2	Future scenarios, by country	195

Figures

2.1	Conceptual model and hypothesized relationships	19
3.1	Countries grouping according to macro-economic indicators	36
3.2	Women's activity rates, part-time work and fertility in 2006	39
5.1	Subjective measures of quality of work (adjusted means)	87
5.2	Overall life satisfaction by country (adjusted means)	91
5.3	Overall life satisfaction by organization	92
6.1	Conceptual model for the empirical analysis	100
6.2	Correlation between satisfaction with work–life balance (SWLB) and life satisfaction (SWLS) across organizations and countries	108
7.1	Country variation in satisfaction with work–life balance (mean scores) for professionals and non-professionals	127
7.2	Country variation in satisfaction with work–life balance (mean scores) for part-time and full-time employees	128
7.3	Country variation in satisfaction with work–life balance (mean scores) for older and younger employees	128
7.4	Interaction between age and level of state support predicting satisfaction with work–life balance	132
8.1	Family meal frequency by country	137

11.1	The position of the various countries in the trend quadrants	192
11.2	Chains of events	198
12.1	The structure of the Social Quality Instrument	211
12.2	Screenshot	213
