# List of figures and tables

## Figures

1.1	Retail Price Index (annual percentage change) 1979–99	6
1.2	Example of the presentation of results	9
2.1	Hierarchy of needs based on Maslow's theory of self-actualisation	13
3.1	Subjective well-being (%) in Great Britain 1991–99	44
3.2	Subjective well-being by satisfaction with life overall 1996–99	54
3.3	Factors associated with high subjective well-being 1991–93: females	60
3.4	Factors associated with high subjective well-being 1994–96: females	61
3.5	Factors associated with high subjective well-being 1997–99: females	62
3.6	Factors associated with high subjective well-being 1991–93: males	63
3.7	Factors associated with high subjective well-being 1994–96: males	64
3.8	Factors associated with high subjective well-being 1997–99: males	65
4.1	Factors associated with stable high subjective well-being 1991–99: females	80
4.2	Factors associated with stable high subjective well-being 1991–99: males	81
4.3	Factors associated with improved subjective well-being 1993–96: females	83
4.4	Factors associated with improved subjective well-being 1996–99: females	84
4.5	Factors associated with improved subjective well-being 1993 to 1996: males	85
4.6	Factors associated with improved subjective well-being 1996 to 1999: males	86
5.1	The Echo model	105
6.1	Economic growth and subjective well-being	116

## Tables

2.1	Changes in perception of necessities 1979–99	17
3.1	General health questionnaire	42
3.2	Demographic variations in subjective well-being 1991–99	45
3.3	Economic variations in subjective well-being 1991–99	47
3.4	Spatial distribution of subjective well-being 1991–99	48
3.5	Demographic variations in high and low subjective well-being 1991–99	49
3.6	Economic variations in high and low subjective well-being 1991–99	51
3.7	Independent variables by themes	57
3.8	Regression models (variables and process)	59
