Walter de Gruyter · Berlin · New York

Contents

Preface	v
J.-F. POMMARET Gröbner Bases in Algebraic Analysis: New Perspectives for Applications	1
U. OBERST, F. PAUER Solving Systems of Linear Partial Difference and Differential Equations with Constant Coefficients Using Gröbner Bases	23
A. LEVIN Computation of the Strength of Systems of Difference Equations via Generalized Gröbner Bases	43
Editors' Note in Memory of Giuseppa Carrà Ferro	75
G. CARRÀ FERRO A Survey on Differential Gröbner Bases	77
F. BOULIER Differential Elimination and Biological Modelling	109
D. ROBERTZ Janet Bases and Applications	139
W. M. SEILER Spencer Cohomology, Differential Equations, and Pommaret Bases	169
P. OLVER, J. POHJANPELTO Differential Invariants for Lie Pseudo-groups	217
W. N. TRAVES Invariant Theory and Differential Operators	245
K. KRUPCHYK, J. TUOMELA Compatibility Complexes for Overdetermined Boundary Problems	267
F. L. PRITCHARD, W. Y. SIT On Initial Value Problems for Ordinary Differential-Algebraic Equations	283
Index	341
