

Molecular Exercise Physiology

An introduction

Edited by
Henning Wackerhage

Contents

List of figures	vii
List of tables	x
Foreword	xi
Contributors	xiii
1 Introduction to molecular exercise physiology	1
<i>Henning Wackerhage</i>	
2 Genetics, sport and exercise: background and methods	24
<i>Stephen M Roth and Henning Wackerhage</i>	
3 Signal transduction and adaptation to exercise: background and methods	52
<i>Jatin G Burniston, Mhairi Towler and Henning Wackerhage</i>	
4 Molecular adaptation to endurance exercise and skeletal muscle fibre plasticity	79
<i>Keith Baar and Henning Wackerhage</i>	
5 Genetics and endurance sports	112
<i>Stephen M Roth and Henning Wackerhage</i>	
6 Molecular adaptation to resistance exercise	133
<i>Keith Baar and Henning Wackerhage</i>	
7 Genetics, muscle mass and strength	156
<i>Arimantas Lionikas and Henning Wackerhage</i>	
8 Molecular sport nutrition	174
<i>D Lee Hamilton, Stuart Galloway, Oliver Witard and Henning Wackerhage</i>	
9 Human evolution, type 2 diabetes mellitus and exercise	205
<i>Kian-Peng Goh, Angela Koh and Henning Wackerhage</i>	

10	Molecules, ageing and exercise	228
	<i>Henning Wackerhage</i>	
11	Molecular neuroscience and exercise	251
	<i>Peer Wulff and Henning Wackerhage</i>	
12	Molecular exercise immunology	277
	<i>Stuart Gray and Henning Wackerhage</i>	
	Glossary	305
	Index	312
