## PART I THE MICROBES

### 1

#### The Microbial World 2

##### 1.1 The Microbes 4

**Toolbox 1.1** POLYMERASE CHAIN REACTION AMPLIFICATION OF rRNA GENES 12

**Mini-Paper: A Focus on the Research**

THE THREE DOMAINS OF LIFE 14

##### 1.2 Microbial Genetics 16

**Perspective 1.1** CREATING LIFE IN THE LABORATORY: THE MILLER-UREY EXPERIMENT 18

**Perspective 1.2** RIBOZYMES: EVIDENCE FOR AN RNA-BASED WORLD 19

##### 1.3 Microbial Metabolism and Ecology 24

##### 1.4 Microbes and Disease 27

### 2

#### Bacteria 36

##### 2.1 Morphology of Bacterial Cells 38

##### 2.2 The Cytoplasm 41

##### 2.3 The Bacterial Cytoskeleton 44

##### 2.4 The Cell Envelope 45

**Perspective 2.1** MARVELOUS MAGNETOSOMES! 46

**Toolbox 2.1** THE GRAM STAIN 55

**Perspective 2.2** THE PROTECTIVE SHELLS OF ENDOSPORES 57

**Mini-Paper: A Focus on the Research**

NEW MICROSCOPY METHODS REVEAL A PERIPLASM IN GRAM-POSITIVE BACTERIAL CELLS 60

##### 2.5 The Bacterial Cell Surface 62

##### 2.6 Bacterial Taxonomy 68

### 3

#### Eukaryal Microbes 72

##### 3.1 The Morphology of Typical Eukaryal Cells 74

**Mini-Paper: A Focus on the Research** LIPID RAFTS: ORGANIZED CLUSTERING OF LIPIDS WITHIN A MEMBRANE 80

**Toolbox 3.1** USING MICROSCOPY TO EXAMINE CELL STRUCTURE 82

**Perspective 3.1** HIJACKING THE CYTOSKELETON 86

##### 3.2 Diversity of Eukaryal Microbes 87

##### 3.3 Replication of Eukaryal Microbes 92

##### 3.4 The Origin of Eukaryal Cells 95

**Perspective 3.2** EXPLOITING A SHARED EVOLUTIONARY HISTORY WITH PLANTS IN THE TREATMENT OF MALARIA 99

##### 3.5 Interactions Between Eukaryal Microbes and Animals, Plants, and the Environment 100

# 4

## Archaea 106

**4.1** Distinct Properties of Archaea 108

**4.2** Archaeal Cell Structure 110

**Toolbox 4.1** VACCINE DELIVERY STRATEGIES 115

**4.3** Diversity of Archaea 119

**Perspective 4.1** EXTREMOPHILES AND BIOTECHNOLOGY 121

**Mini-Paper: A Focus on the Research** THE ROLE OF ARCHAEOONS IN OUR DIGESTIVE SYSTEM 126

# 5

## Viruses 130

**5.1** A Basic Overview of Viruses 132

**5.2** Origins of Viruses 140

**5.3** Cultivation, Purification, and Quantification of Viruses 142

**Toolbox 5.1** CELL CULTURE TECHNIQUES 143

**Perspective 5.1** MEASUREMENT OF HIV VIRAL LOAD 147

**5.4** Diversity of Viruses 149

**Toolbox 5.2** REVERSE TRANSCRIPTASE POLYMERASE CHAIN REACTION (RT-PCR) 154

**5.5** Virus-Like Particles 155

**5.6** Virology Today 157

**Mini-Paper: A Focus on the Research** NEW FINDINGS IN THE PACKAGING OF DNA BY THE MODEL BACTERIOPHAGE T4 158

# 6

## Cultivating Microorganisms 164

**6.1** Nutritional Requirements of Microorganisms 166

**6.2** Factors Affecting Microbial Growth 168

**Toolbox 6.1** PHENOTYPE MICROARRAYS FOR EXAMINING MICROBIAL GROWTH 169

**6.3** Growing Microorganisms in the Laboratory 173

**Perspective 6.1** THE DISCOVERY OF *HELIOBACTER PYLORI* 178

**Toolbox 6.2** FISHING FOR UNCULTIVATED MICROBES 180

**Mini-Paper: A Focus on the Research** BRINGING TO LIFE THE PREVIOUSLY UNCULTURABLE USING THE SOIL SUBSTRATE MEMBRANE SYSTEM (SSMS) 182

**6.4** Measuring Microbial Population Growth 184

**Perspective 6.2** *MYCOBACTERIUM LEPRAE*, AN EXTRAORDINARILY SLOW-GROWING PATHOGEN 190

**Perspective 6.3** THE HUMAN INTESTINE—A CONTINUOUS CULTURE 192

**6.5** Eliminating Microbes and Preventing Their Growth 192

---

## PART II MICROBIAL GENETICS

# 7

## DNA Replication and Gene Expression 202

**7.1** The Role of DNA 204

**7.2** DNA Replication 210

**7.3** Transcription 216

**Toolbox 7.1** USING A GEL SHIFT ASSAY TO IDENTIFY DNA-BINDING PROTEINS 219

**7.4** Translation 233

**7.5** The Effects of Mutations 229

**Mini-Paper: A Focus on the Research** TELOMERES WITH PROMOTER ACTIVITY 232

**Perspective 7.1** USING MUTATIONS TO CONTROL VIRAL INFECTIONS 234

## 8

### Viral Replication Strategies 238

**8.1** Recognition of Host Cells 240

**Toolbox 8.1** THE WESTERN BLOT 242

**8.2** Viral Entry and Uncoating 244

**8.3** Viral Replication 248

**8.4** Viral Assembly and Egress 256

**8.5** Antiviral Drugs 258

**Perspective 8.1** DNA MICROARRAYS AND THE SARS VIRUS 258

**Mini-Paper: A Focus on the Research** THE DISCOVERY  
OF REVERSE TRANSCRIPTASE 262

## 9

### Bacterial Genetic Analysis 266

**9.1** Bacteria as Subjects of Genetic Research 268

**9.2** Mutations, Mutants, and Strains 271

**Toolbox 9.1** ISOLATING NUTRITIONAL MUTANTS 274

**9.3** Restriction Enzymes, Vectors, and Cloning 278

**9.4** Recombination and DNA Transfer 285

**Perspective 9.1** PLASMIDS THAT PRODUCE PATHOGENS 290

**Mini-Paper: A Focus on the Research**  
THE DISCOVERY OF TRANSDUCTION 299

## 10

### Microbial Genomics 302

**10.1** Genome Sequencing 304

**Perspective 10.1** RATE OF DNA SEQUENCING 307

**Toolbox 10.1** GENOME DATABASES 310

**10.2** Genomic Analysis of Gene Expression 312

**10.3** Comparative Genomics 318

**Perspective 10.2** THE MINIMAL GENOME 319

## 11

### Regulation of Gene Expression 328

**11.1** Differential Gene Expression 330

**11.2** The Operon 332

**11.3** Global Gene Regulation 337

**Mini-Paper: A Focus on the Research** TUNING PROMOTERS  
FOR USE IN SYNTHETIC BIOLOGY 338

**Perspective 11.1** THE USE OF LACTOSE ANALOGS  
IN GENE EXPRESSION STUDIES 342

**11.4** Post-Initiation of Gene Expression 346

**Toolbox 11.1** USING RNA MOLECULES  
TO DECREASE GENE EXPRESSION 347

**11.5** Quorum Sensing 350

**11.6** Two-Component Regulatory Systems 352

**11.7** Chemotaxis 355

## 12

### Microbial Biotechnology 362

**12.1** Microbes for Biotechnology 365

**Perspective 12.1** BIOPROSPECTING: WHO OWNS  
THE MICROBES? 366

**12.2** Molecular Genetic Modification 368

**Toolbox 12.1** SITE-DIRECTED MUTAGENESIS 370

**Toolbox 12.2** FUSION PROTEIN PURIFICATION 375

**Mini-Paper: A Focus on the Research** MAKING  
A SYNTHETIC GENOME 378

**Perspective 12.2** THE INTERNATIONAL GENETICALLY  
ENGINEERED MACHINE (IGEM) COMPETITION,  
STANDARD BIOLOGICAL PARTS, AND SYNTHETIC BIOLOGY 380

**12.3** Red Biotechnology 381

**12.4** White Biotechnology 382

**Perspective 12.3** BIOFUELS: BIODIESEL AND ALGAE 386

**12.5** Green Biotechnology 391

**Toolbox 12.3** PLANT TRANSFORMATION USING BACTERIA 394

## PART III MICROBIAL PHYSIOLOGY AND ECOLOGY

### 13 Metabolism 400

#### 13.1 Energy, Enzymes, and ATP 402

**Perspective 13.1** WHO NEEDS VITAMINS? 405

#### 13.2 Central Processes in ATP Synthesis 406

#### 13.3 Carbon Utilization in Microorganisms 412

#### 13.4 Respiration and the Electron Transport System 422

**Perspective 13.2** ELECTRICIGENIC BACTERIA AND MICROBIAL FUEL CELLS 426

#### 13.5 Metabolism of Non-Glucose Carbon Sources 429

**Toolbox 13.1** METABOLISM AND RAPID BACTERIAL IDENTIFICATION SYSTEMS 432

#### 13.6 Phototrophy and Photosynthesis 433

#### 13.7 Nitrogen and Sulfur Metabolism 443

#### 13.8 Biosynthesis of Cellular Components 447

**Mini-Paper: A Focus on the Research** GENOME SEQUENCE OF A DEEP SEA SYMBIONT 450

### 14 Biogeochemical Cycles 456

#### 14.1 Nutrient Cycling 459

**Toolbox 14.1** USING MICROARRAYS TO EXAMINE MICROBIAL COMMUNITIES: THE GEOCHIP 461

#### 14.2 Cycling Driven by Carbon Metabolism 463

**Perspective 14.1** CO<sub>2</sub> AS A GREENHOUSE GAS AND ITS INFLUENCE ON CLIMATE CHANGE 464

#### 14.3 Cycling Driven by Nitrogen Metabolism 472

**Mini-Paper: A Focus on the Research** THE FIRST ISOLATION AND CULTIVATION OF A MARINE ARCHAEON 476

#### 14.4 The Interconnectedness of Cycles 478

**Perspective 14.2** THE MICROBIOLOGY OF ENVIRONMENTALLY TOXIC ACID MINE DRAINAGE 479

### 15 Microbial Ecosystems 484

#### 15.1 Microbes in the Environment 486

#### 15.2 Microbial Community Structure 490

**Toolbox 15.1** FLOW CYTOMETRY 494

**Mini-Paper: A Focus on the Research** A METHOD FOR THE IDENTIFICATION OF CATABOLIC GENES FROM METAGENOMIC LIBRARIES BASED ON THEIR GENE EXPRESSION CHARACTERISTICS 496

**Perspective 15.1** NAMING THE UNCULTURABLE AND UNCHARACTERIZED 498

#### 15.3 Aquatic Ecosystems 498

**Perspective 15.2** DEAD ZONES 499

#### 15.4 Terrestrial Ecosystems 406

#### 15.5 Deep Subsurface and Geothermal Ecosystems 512

### 16 The Microbiology of Food and Water 522

#### 16.1 Food Spoilage 524

#### 16.2 Food Preservation 528

#### 16.3 Food Fermentation 534

**16.4** Foodborne and Waterborne Illness 541

**16.5** Microbiological Aspects  
of Water Quality 543

**Perspective 16.1** IMPLICATION OF SLUDGE BULKING 549

**Toolbox 16.1** MEASURING BIOCHEMICAL OXYGEN  
DEMAND (BOD) 550

**Mini-Paper: A Focus on the Research** ENHANCED  
BIOLOGICAL REMOVAL OF PHOSPHORUS 552

**17.2** Symbionts of Plants 564

**17.3** Lichens 569

**17.4** Symbionts of Vertebrates 571

**Toolbox 17.1** GERMFREE AND GNOTOBIOTIC ANIMALS 571

**Perspective 17.1** PROBIOTICS—DO THEY WORK? 577

**Mini-Paper: A Focus on the Research** DO MICROBES  
CAUSE OBESITY? 579

**Perspective 17.2** COWS CONTRIBUTE  
TO CLIMATE CHANGE 586

**17.5** Symbionts of Invertebrates 587

**Perspective 17.3** MIDICHLORIANS—NOT JUST FOR JEDI 592

**Perspective 17.4** DEATH OF CORAL REEFS 595

## 17

Microbial Symbionts 560

**17.1** Types of Microbe–Host Interactions 563

## PART IV MICROBES AND DISEASE

## 18

Introduction  
to Infectious Diseases 600

**18.1** Pathogenic Microbes 603

**Toolbox 18.1** MEASURING THE VIRULENCE OF PATHOGENS 606

**18.2** Virulence Strategies 608

**Perspective 18.1** HOST DEFENSES IN BACTERIA 612

**18.3** The Transmission of Infectious Diseases 613

**18.4** Proving Cause and Effect  
in Microbial Infections 621

**Perspective 18.2** THE ARMADILLO—  
AN IDEAL ANIMAL MODEL? 624

**18.5** The Evolution of Pathogens 625

**Mini-Paper: A Focus on the Research** EPIDEMIOLOGY  
OF AN INFECTIOUS DISEASE 626

## 19

Innate Host Defenses  
Against Microbial Invasion 636

**19.1** Immunity 638

**19.2** Barriers to Infection 639

**Perspective 19.1** MESSY MUCUS 642

**19.3** The Inflammatory Response 643

**19.4** The Molecules of Innate Immunity 644

**Toolbox 19.1** THE COMPLEMENT FIXATION TEST 650

**19.5** The Cells of Innate Immunity 653

**Perspective 19.2** NATURAL BORN KILLERS 659

**19.6** Invertebrate Defenses 663

**Mini-Paper: A Focus on the Research** MAMMALIAN CELLS  
CAN RECOGNIZE BACTERIAL DNA 664

**Toolbox 19.2** THE *LIMULUS* AMOEOCYTE ASSAY FOR LPS 667

# 20

## Adaptive Immunity 672

**20.1** Features of Adaptive Immunity 674

**20.2** T Cells 677

**20.3** Antigen Processing 681

**20.4** Antigen-Presenting Cells 686

**20.5** Humoral and Cell-Mediated Immune Responses 690

**Perspective 20.1** TOO MUCH OF A GOOD THING 693

**Mini-Paper: A Focus on the Research** ATTEMPTING TO ENGINEER A VIRUS TO IMPROVE IMMUNOCONTRACEPTION 694

**20.6** B Cells and the Production of Antibody 694

**Perspective 20.2** VACCINES AGAINST T-INDEPENDENT ANTIGENS 699

**Toolbox 20.1** MONOCLONAL ANTIBODY (mAb) PRODUCTION 702

**Toolbox 20.2** ENZYME-LINKED IMMUNOSORBENT ASSAY (ELISA) 706

**Perspective 20.3** TURNING ANTIBODY UPSIDE DOWN 708

# 21

## Bacterial Pathogenesis 714

**21.1** Bacterial Virulence Factors 716

**Mini-Paper: A Focus on the Research** *E. COLI* INJECTS ITS OWN RECEPTOR 722

**Toolbox 21.1** SEROTYPING 724

**Perspective 21.1** THE GOOD, THE BAD, AND THE UGLY SIDE OF BOTULINUM TOXIN 730

**Perspective 21.2** SUPERABSORBENT TAMPONS AND SUPERANTIGENS 736

**Perspective 21.3** IRON, VAMPIRES, FASHION, AND THE WHITE PLAGUE 742

**21.2** Survival in the Host: Strategies and Consequences 743

**Toolbox 21.2** THE TUBERCULIN TEST FOR TUBERCULOSIS 750

**21.3** Evolution of Bacterial Pathogens 751

**Perspective 21.4** ANTIBIOTICS TRIGGER TOXINS? 754

# 22

## Viral Pathogenesis 760

**22.1** Recurring Themes in Viral Pathogenesis 762

**Perspective 22.1** VERTICAL TRANSMISSION OF HIV 767

**22.2** Interactions with the Host: Strategies and Consequences 770

**Perspective 22.2** VIRAL INDUCTION OF APOPTOSIS 772

**22.3** Viral Infections and Cancer 775

**Toolbox 22.1** IMMUNOPRECIPITATION 778

**Perspective 22.3** SV40 AND HUMAN CANCERS 779

**Mini-Paper: A Focus on the Research** VIRUSES THAT CAUSE CANCER BY AFFECTING CELLULAR PROLIFERATION 782

**22.4** Evolution of Viral Pathogens 785

**Perspective 22.4** ETHICAL CONCERNS ABOUT AVIAN FLU RESEARCH 789

# 23

## Eukaryal Microbe Pathogenesis 792

**23.1** Mechanisms of Eukaryal Microbe Pathogenesis 794

**Mini-Paper: A Focus on the Research** AN EXPERIMENTAL SYSTEM FOR THE GENOMIC STUDY OF DUTCH ELM DISEASE 798

**Perspective 23.1** *PNEUMOCYSTIS JIROVECI* OR *CARINII*: THE EVOLVING FIELD OF TAXONOMY 801

**Perspective 23.2** MAGIC MUSHROOMS 807

**23.2** Pathogen Study:  
*Plasmodium falciparum* 808

**Toolbox 23.1** TESTING FOR MALARIA 812

**23.3** Macroscopic Eukaryal Pathogens 814

**23.4** Evolution of Eukaryal Pathogens 816

**Perspective 23.3** CHYTRID FUNGUS:  
AN EMERGING FUNGAL PATHOGEN 817

**Perspective 24.1** THE PURSUIT OF NEW ANTIBIOTICS:  
WHY BOTHER? 847

**Perspective 24.2** HEALTH CARE-ASSOCIATED INFECTIONS:  
A RECIPE FOR RESISTANCE 848

**Perspective 24.3** PHAGE THERAPY:  
BIOCONTROL FOR INFECTIONS 849

**24.4** Predicting and Controlling Epidemics 850

**Perspective 24.4** VARIOLATION: DELIBERATE INFECTION  
WITH SMALLPOX VIRUS 853

**24.5** Immunization and Vaccines 853

# 24

## Control of Infectious Diseases 822

**24.1** Historical Aspects of Infectious Disease  
Treatment and Control 824

**24.2** Antimicrobial Drugs 825

**24.3** Antimicrobial Drug Resistance 836

**Toolbox 24.1** DRUG SUSCEPTIBILITY TESTING AND MIC 842

**Mini-Paper: A Focus on the Research** SOIL MICROBES  
POSSESS EXTENSIVE RESISTANCE TO ANTIBIOTICS 844

Appendix A Reading and Understanding  
the Primary Literature A-1

Appendix B Microscopy A-9

Appendix C Classification of Bacteria A-13

Appendix D Classification of Eukarya A-14

Appendix E Classification of Archaea A-15

Appendix F Classification of Viruses A-16

Appendix G Origin of Blood Cells A-17

GLOSSARY G-1

INDEX I-1
