

An Anthropology of Biomedicine

Second Edition

Margaret Lock and Vinh-Kim Nguyen

Contents

Acknowledgements	xiii
Introduction	1
<i>The Argument</i>	1
<i>Interwoven Themes</i>	2
<i>Improving Global Health: The Challenge</i>	4
<i>Biomedicine as Technology</i>	5
<i>Does Culture Exist?</i>	7
<i>A word About Ethnography</i>	10
Section 1	
1 Biomedical Technologies in Practice	15
<i>Technological Mastery of the Natural World and Human Development</i>	16
<i>Technology and Boundary Crossings</i>	17
<i>Biomedicine as Technology: Some Implications</i>	19
<i>Technologies of Bodily Governance</i>	21
<i>Technologies of the Self</i>	24
<i>The Power of Biological Reductionism</i>	25
<i>Techno/Biologicals</i>	26
2 The Normal Body	29
<i>Cholera in the Nineteenth Century</i>	30
<i>Representing the Natural Order</i>	31
<i>Truth to Nature</i>	32
<i>The Natural Body</i>	34
<i>A Numerical Approach</i>	35
<i>Other Natures</i>	36
<i>Interpreting the Body</i>	38
<i>How Normal Became Possible</i>	39
<i>When Normal Does not Exist</i>	42
<i>Problems with Assessing Normal</i>	43
<i>Pathologizing the 'Normal'</i>	46
<i>Limitations to Biomedical 'Objectivity'</i>	48
<i>Better than Well?</i>	49

3	Anthropologies of Medicine	51
	<i>The Body Social</i>	51
	<i>Contextualizing Medical Knowledge</i>	53
	<i>Medical Pluralism</i>	55
	<i>The Modernization of 'Traditional' Medicine</i>	56
	<i>Medical Hybridization</i>	57
	<i>Biodiversity and Indigenous Medical Knowledge</i>	58
	<i>Self-medication</i>	59
	<i>A Short History of Medicalization</i>	60
	<i>Opposition to Medicalization</i>	62
	<i>The Social Construction of Illness and Disease and Beyond</i>	64
	<i>The Politics of Medicalization</i>	68
	<i>Beyond Medicalization?</i>	71
	<i>In Pursuit of Health</i>	71
	<i>In Summary</i>	74
	 Section 2	
4	Colonial Disease and Biological Commensurability	79
	<i>An Anthropological Perspective on Global Biomedicine</i>	79
	<i>Biomedicine as a Tool of Empire</i>	81
	<i>Acclimatization and Racial Difference</i>	82
	<i>Colonial Epidemics: Microbial Theories Prove their Worth</i>	83
	<i>Fear of Biomedicine</i>	85
	<i>Microbiology as a Global Standard</i>	87
	<i>Infertility and Childbirth as Critical Events</i>	89
	<i>Birthing in the Belgian Congo</i>	90
	<i>A Global Practice of Fertility Control</i>	91
	<i>Intimate Colonialism: The Biomedicalization of Domesticity</i>	92
	<i>Biomedicine, Evangelism and Consciousness</i>	93
	<i>The Biological Standardization of Hunger</i>	94
	<i>The Colonial Discovery of Malnutrition</i>	95
	<i>Albumin as Surplus</i>	97
	<i>The Biologization of Salvation</i>	98
	<i>In Summary</i>	100
5	Grounds for Comparison: Biology and Human Experiments	103
	<i>The Laboratory as the Site of Comparison</i>	103
	<i>The Colonial Laboratory</i>	104
	<i>Experimental Bodies</i>	106
	<i>Rise of the Clinical Trial</i>	107
	<i>Taming Chance</i>	109
	<i>The Alchemy of the Randomized Controlled Trial</i>	110
	<i>The Problem of Generalizability</i>	110
	<i>Medical Standardization and Contested Evidence</i>	112
	<i>Anthropological Perspectives on Clinical Trials: The West African Ebola Epidemic</i>	114
	<i>'Jiki': A Clinical Trial Amidst the Ebola Epidemic</i>	116
	<i>Context of the Clinical Trial</i>	117

<i>Globalizing Clinical Research</i>	118
<i>What Should Count as Evidence?</i>	120
<i>Economies of Blood</i>	121
<i>Experimental Communities: Social Relations</i>	122
<i>In Summary</i>	124
6 The Right Population	127
<i>The Origins of Population as a 'Problem'</i>	129
<i>Addressing the 'Problem' of Population</i>	130
<i>Improving the Stock of Nations</i>	131
<i>Contraceptive Technologies and Family Planning</i>	133
<i>Indian Family Planning – meeting Quotas</i>	135
<i>Increasing Fertility with Contraceptive Use</i>	139
<i>The One-child Policy</i>	140
<i>Biomedical Technology and Sex Selection</i>	145
<i>Contextualizing Sex Selection: India and 'Family Balancing'</i>	146
<i>Contextualizing Sex Selection: Disappeared Girls in China</i>	148
<i>Sex Selection in a Global Context</i>	151
<i>Ghost Children, Little Emperors, Burgeoning Elders</i>	153
<i>Reproducing Nationalism</i>	155
<i>In Summary</i>	157
 Section 3	
7 Who Owns the Body?	161
<i>Commodification of Human Biological Material</i>	162
<i>Objects of Worth and their Alienation</i>	164
<i>The Wealth of Inalienable Goods</i>	164
<i>A Bioeconomy of Human Biological Materials</i>	165
<i>Who Owns the Body?</i>	167
<i>Gifting Life</i>	168
<i>Commodification of Eggs and Sperm</i>	169
<i>Medical Tourism</i>	171
<i>Immortalized Cell Lines</i>	171
<i>The Exotic Other</i>	174
<i>Biological Databases</i>	177
<i>Concluding Comments</i>	182
 8 The Social Life of Human Organs	185
<i>Bioavailability – Who Becomes a Donor?</i>	186
<i>The Biopolitics of Organ Transplants</i>	187
<i>A Shortage of Organs</i>	190
<i>Inventing a New Death</i>	192
<i>The Good-as-dead</i>	194
<i>Struggling for National Consensus</i>	197
<i>A Rapacious Need for Organs</i>	199
<i>The Social Life of Human Organs</i>	200
<i>When Resources are in Short Supply</i>	204

	<i>Liminal Lives</i>	206
	<i>Does the Body Belong to God?</i>	207
	<i>Altruism, Entitlement and Commodification</i>	209
9	Making Kinship: Infertility and Assisted Reproduction	213
	<i>Assisted Reproductive Technologies</i>	214
	<i>Problematizing Infertility Figures</i>	215
	<i>From Underfertility to Overfertility</i>	216
	<i>Reproducing Culture</i>	222
	<i>Assisted Reproduction in the United States</i>	224
	<i>Assisted Reproduction in Egypt</i>	227
	<i>Assisted Reproduction in Israel</i>	230
	<i>ART and the Reproduction of Normalcy</i>	234
	<i>Global Hubs of Conception</i>	237
	 Section 4	
10	The Sociotechnical Self	241
	<i>The Biological Boundary Between Self and Other</i>	241
	<i>The Sociotechnical Self</i>	242
	<i>Technologies of the Self</i>	243
	<i>Technologies of the Self in Biomedicine</i>	244
	<i>The Unconscious as Technology of the Self</i>	245
	<i>The Discovery of an Unconscious Self</i>	246
	<i>Unlocking the Pathogenic Secret</i>	247
	<i>The Pathogenic Secret as a Mode of Subjection</i>	248
	<i>The Making of Posttraumatic Stress Disorder</i>	248
	<i>The Practitioner-self</i>	251
	<i>Producing the Self Through Talking Technologies: Technologies of Health Promotion</i>	252
	<i>Technologies of Empowerment</i>	253
	<i>Technologies of Self-help</i>	254
	<i>Confessional Technologies</i>	255
	<i>The Globalization of the Unconscious</i>	257
	<i>Beyond Freud to the Neurosciences</i>	259
	<i>The Psychiatric Self</i>	259
	<i>Psychopharmaceuticals</i>	260
	<i>Addiction and the Lie</i>	263
	<i>Conclusion</i>	264
11	Genes as Embodied Risk	265
	<i>From Hazard to Embodied Risk</i>	266
	<i>From Generation to Rewriting Life</i>	267
	<i>Genomic Hype</i>	269
	<i>Geneticization</i>	271
	<i>Genetic Testing and Human Contingency</i>	272
	<i>Genetic Citizenship and Future Promise in America</i>	275
	<i>Biosociality and the Affiliation of Genes</i>	276

	<i>Community-based Participatory Research</i>	277
	<i>Genetic Information and Hybrid Causality</i>	277
	<i>Genetic Testing in the Era of Personalized Medicine</i>	279
	<i>Genetic Screening</i>	280
	<i>Screening as a Collective Endeavour</i>	282
	<i>Race and Genetic Testing</i>	284
	<i>Preimplantation Genetic Diagnosis</i>	286
	<i>Is a Neo-Eugenics Looming on the Horizon?</i>	287
12	Global Health	291
	<i>What is Global Health, and How is it Different from International Health?</i>	292
	<i>Metrics and the Global Clinic</i>	296
	<i>Botswana's Cancer Ward</i>	297
	<i>Leukaemia in the Indian Ocean</i>	298
	<i>Value in Global Health: A Global Market for Diagnostics and Drugs</i>	300
	<i>When Markets don't Work</i>	301
	<i>Medical Humanitarianism and 'Philanthrocapitalism'</i>	303
	<i>Regimes of Anticipation in Global Health: Epidemics Fast and Slow</i>	304
	<i>An Anthropology of Preparedness</i>	305
	<i>The Politics of Anticipation</i>	307
	<i>Conclusion</i>	309
	Section 5	
13	From Local to Situated Biologies	313
	<i>The End of Menstruation</i>	314
	<i>Local Biologies</i>	319
	<i>Kuru and Endocannibalism</i>	320
	<i>Racism and Birth Weight</i>	323
	<i>Agent Orange and Foetal Abnormalities in Vietnam</i>	324
	<i>An Abundance of Local Biologies</i>	326
	<i>Local Biology and the Erosion of Universal Bodies</i>	328
	<i>Rethinking Biology in the Midst of Life's Complexity</i>	329
	<i>Is Biology Real?</i>	330
	<i>In Summary</i>	332
14	Of Microbes and Humans	335
	<i>The Microbial Arms Race</i>	337
	<i>Warfare and Iraqibacter</i>	339
	<i>Debates About the Origin of HIV</i>	340
	<i>From Versus to Commensals: Microbiomes and Metagenomes</i>	345
	<i>The Human Ecosystem</i>	346
15	Genomics, Epigenomics and Uncertain Futures	349
	<i>Divining the Contemporary</i>	349
	<i>Amassing and Systematizing DNA</i>	350
	<i>The APOE Gene and Alzheimer's Disease</i>	351

<i>Genetic Testing for Late-onset Alzheimer's Disease</i>	353
<i>Interpretations of Risk Estimates</i>	355
<i>Dethroning the Gene?</i>	356
<i>Eclipse of the Genotype-phenotype Dogma</i>	357
<i>Does a Programme for Life Exist?</i>	358
<i>Learning (Again) to Live with Uncertainty</i>	359
<i>Epigenetics: Overtaking Genetic Determinism</i>	360
<i>From Epigenesis to Epigenetics</i>	361
<i>Molecular Epigenetics and the Reactive Genome</i>	362
<i>Miniaturization of the Environment</i>	364
<i>Embedded Bodies</i>	365
<i>Epigenetics and the Womb</i>	366
<i>Food as Environment</i>	367
<i>Social Deprivation</i>	367
<i>Ageing and Epigenetics</i>	368
<i>From Causality to Contingency</i>	368
16 Molecularizing Racial Difference	371
<i>Molecular Biology and Racial Politics</i>	375
<i>The Molecularization of Race</i>	377
<i>Bioethnic Conscription</i>	377
<i>Racialized Allelic Variation</i>	379
<i>Mexican Genomics</i>	380
<i>Discordant Genomic Knowledge</i>	381
<i>Commodifying 'Race' and Ancestry</i>	382
<i>Looping Effects</i>	383
Epilogue	385
Notes	389
Bibliography	467
Index	529
