

Essential Biological Psychology

Jim Barnes

Los Angeles | London | New Delhi
Singapore | Washington DC

CONTENTS

<i>About the author</i>	xix
<i>Preface</i>	xx
<i>Companion Website</i>	xxii
<i>Acknowledgements</i>	xxiii
1 Neurons, Neurotransmission and Communication	1
How the nervous system is organised	2
Cells of the nervous system	3
The neuron	3
Neuroglial cells	7
Information exchange in the nervous system	9
The resting membrane potential	10
The action potential and nerve impulse	10
Summation effects	12
Synaptic transmission	13
The synaptic vesicle	14
Modulation of synaptic transmission	15
Non-synaptic chemical communication	15
Postsynaptic receptors and receptor types	17
Neurotransmitters	18
The amino acids	19
Monoamines	20
Acetylcholine	23
Neuropeptides and neuromodulators	23
Soluble gases	24
Summary	24
Further reading	25
Key questions	25
2 Neuroanatomy and Brain Mapping	26
Anatomical terms of location	27
Brodmann areas	27
Planes of section	28
The central nervous system	29
Basic brain structure	29

ESSENTIAL BIOLOGICAL PSYCHOLOGY

The hindbrain	30
The midbrain	30
The forebrain	30
Cerebral cortex or neocortex	31
Ventricular system	34
Spinal cord	35
The peripheral nervous system	35
Spinal nerves	35
Cranial nerves	36
The autonomic nervous system	37
Brain mapping techniques	39
Lesion techniques	40
Electrical recording	42
Structural imaging techniques	43
Functional imaging techniques	44
Neurochemical techniques	48
Behavioural genetic techniques	49
Neuropsychological techniques	51
Summary	51
Further reading	53
Key questions	53

3 Genes and Evolution 54

Deoxyribonucleic acid (DNA)	55
Ribonucleic acid (RNA)	57
DNA replication	58
Cell division	59
Mitosis	59
Meiosis	60
Protein synthesis	63
Pre-initiation complex and promoters	63
RNA synthesis	64
Transcription regulation	66
Translation	66
Genetic mutations	66
Sex cells	66
Influence of the environment on gene expression	68
The evolution of the nervous system	71
Diffuse nervous systems	71
Centralised nervous systems: cephalised	72
Centralised nervous systems: compartmentalised	73
Centralised nervous systems: complex compartmentalised	74

The vertebrate system	75
The primitive state	76
Encephalisation	76
Dominance of the cerebrum	77
Summary	77
Further reading	78
Key questions	78
4 Development and Plasticity of the Brain	79
The emergence of the nervous system	80
Induction	81
Proliferation	84
Migration	85
Aggregation	85
Differentiation and axon growth	87
Synaptogenesis	89
Selective cell death	89
Functional validation	90
Developmental abnormalities	90
Spina bifida	91
Anencephaly	91
Microcephaly	91
Macrocephaly	92
Down syndrome	92
Phenylketonuria (PKU)	93
Fragile X syndrome	93
Foetal alcohol syndrome (FAS)	94
Neural plasticity	94
Effects of visual deprivation on ocular dominance	94
The critical period	97
Neuronal regeneration	98
Contralateral sprouting	98
Denervation supersensitivity	99
Reorganisation of sensory representations	99
Regenerating the nervous system: cell transplantations	99
Summary	100
Further reading	102
Key questions	102
5 Visual System	103
The eye	104
The retina	105
Photoreceptors: rods and cones	106

ESSENTIAL BIOLOGICAL PSYCHOLOGY

Transduction of visual information	108
Major types of ganglion cell	108
Horizontal cells	111
Amacrine cells	111
Pathways of the eye and brain	111
Analysis of information: the visual cortex	112
Dorsal and ventral streams	113
Recognition of objects	115
Secondary visual cortex	118
The perception of colour, motion and depth	120
Colour vision	120
Motion perception	122
The binding problem	123
Disorders of object perception	124
Visual agnosia	124
Apperceptive agnosia	124
Associative agnosia	124
Blindsight	125
Hemispatial neglect	125
Summary	126
Further reading	128
Key questions	128

6 Non-Visual Sensory Systems 129

Sensory processing	130
The somatosenses	132
Skin receptors	133
Spinal cord	135
Dermatome	136
Somatosensory pathways	136
Conscious sensation	136
Unconscious sensation	142
Gate theory of pain	142
Somatosensory cortex	143
Auditory system	145
The ear	145
Transduction of sound wave to nerve signal	147
Neural connections and the pathway to auditory cortex	148
Primary auditory cortex	148
Detection of frequency	150
Perception of amplitude	151
Music perception	151

CONTENTS

Hearing loss: deafness	152
Balance: the vestibular system	153
Chemical senses	154
Taste	154
Olfaction	158
Summary	159
Further reading	161
Key questions	161
7 Motor Control and Movement	162
The mechanics of movement control	164
Striated or skeletal muscle	165
Smooth muscle and cardiac muscle	166
Structure of striated or skeletal muscle	166
Tendon organs	168
Muscle spindles	169
Spinal reflexes	170
Renshaw cells	172
Gamma motor system	172
Movement controlled by the cortex	173
Primary motor cortex (M1)	174
Secondary motor cortex	175
Posterior parietal cortex	176
Motor pathways	176
Pathways originating in cortex	177
Pathways originating in subcortex	179
Cerebellum	181
The structure of the cerebellum	182
Inputs and outputs to the cerebellum	184
The cerebellum circuits	185
Basal ganglia	186
Summary	189
Further reading	191
Key questions	191
8 The Biopsychology of Motivation	192
Motives	193
Eating	194
The role of the hypothalamus in hunger and satiety	197
Paraventricular and arcuate nuclei	198
Glucostatic principle	199
Ghrelin	200

ESSENTIAL BIOLOGICAL PSYCHOLOGY

Environmental factors in eating	200
The lipostatic theory	204
Set point theory	204
Genetics and obesity	205
Eating disorders	205
Anorexia nervosa	205
Bulimia nervosa	206
Drinking	207
Dry mouth theory	207
Osmotic thirst	207
Hypovolemic thirst	209
Reproductive behaviour	210
Development of the reproductive organs	210
Sex differences in the brain	211
Role of SDN in the management of male sexual behaviours	212
Summary	212
Further reading	214
Key questions	214
9 Sleep and Biological Rhythms	215
Biological rhythms	216
The suprachiasmatic nucleus (SCN)	216
Influence of light-dark cycle	218
How much sleep do people require?	218
Measuring sleep	219
Sleep stages	219
REM sleep	221
Ponto-geniculo-occipital (PGO) waves	222
Sequences of NREM and REM sleep	222
Neural mechanisms of sleep	222
Passive sleep theory	222
Active reticular activation system theory	223
Hypothalamus	225
Basal forebrain	225
Raphe nucleus	225
Theories regarding reasons for sleep	225
Evolutionary theory of sleep	226
Repair and restoration theory of sleep	227
Information consolidation theory of sleep	228
Sleep disorders	228
Insomnia	229

CONTENTS

Sleep-related breathing disorders: sleep apnoea	230
Hypersomnia: narcolepsy	231
Circadian rhythm sleep disorders	231
Parasomnias	231
Summary	233
Further reading	235
Key questions	235
10 Biopsychology of Emotions, Stress and Health	236
Biopsychology of emotions	237
Darwin's theory	237
James-Lange theory	238
Cannon-Bard theory	239
Schachter-Singer theory	240
Sham rage	241
Anatomy of emotions: the limbic system	242
Limbic system and Papez circuit	242
Hippocampus	243
Amygdala	244
Thalamus	244
Hypothalamus	244
Cingulate gyrus	245
Ventral tegmental area	245
Septum	245
Prefrontal area	245
Insula	245
Cerebral hemispheres and emotion	247
Emotions and facial expressions	247
Primary and secondary facial emotions	248
Facial feedback hypothesis	248
Duchenne smile	248
Fear, attack and escape behaviours	249
Attack behaviours	249
Heredity and aggression	249
Neurotransmitters and hormones	250
Testosterone	250
Glucocorticoids	251
Dehydroepiandrosterone (DHEA)	251
Serotonin	252
Stress and health theories relating to stress	252
General adaptation model	253

ESSENTIAL BIOLOGICAL PSYCHOLOGY

How the body reacts to stress	254
The immune system	255
Psychoneuroimmunology (PIN)	257
Post-traumatic stress disorder (PTSD)	257
Summary	258
Further reading	260
Key questions	260
11 Memory, Learning and Amnesia	261
Processing of information	262
Sensory memory	263
Short-term memory	264
Working memory	265
Long-term memory	266
Reinforcement	267
Classical conditioning	267
Instrumental or operant conditioning	269
Neural mechanisms of reinforcement	269
Hebbian theory	270
Learning in <i>Aplysia</i>	270
Brain areas involved in memory	271
The hippocampus	271
Second messenger systems and memory	278
The cellular basis of memory: long-term potentiation	278
Other brain structures associated with memory	280
Disorders of memory: amnesia	284
Anterograde amnesia	284
Retrograde amnesia	286
Psychogenic or functional amnesia	286
Case study: Clive Wearing	286
Case study: Henry Gustav Molaison	287
Summary	287
Further reading	290
Key questions	290
12 Lateralisation and Language	291
Lateralisation of brain function	292
Split-brain patients	293
Language	295
Involvement of the right hemisphere in language	297
Is language innate or do we learn it?	297
Speech production	299
Broca's aphasia	301

Speech comprehension	301
Wernicke's aphasia	301
The Wernicke–Geschwind model	302
The bilingual brain	304
Other disorders of speech production	305
Fluent aphasias	305
Non-fluent aphasias	305
Apraxia of speech	306
Verbal auditory agnosia	306
Reading	306
Writing	307
Disorders of reading and writing	307
Alexia and agraphia	307
Dysgraphia	308
Dyslexia	308
Summary	310
Further reading	312
Key questions	312
13 Biological Basis of Behaviour Disorders	313
Diagnosis of affective disorders	314
Depression	315
Major depression	316
Dysthymia	316
Bipolar disorders	317
Cyclothymia	317
Causes of depression	317
Genetics	318
Neurochemistry and depression	318
Neuroanatomy of depression	318
The role of the HPA system in depression	319
Treatment of depression	320
Schizophrenia	320
Course of schizophrenia	321
The dopamine hypothesis of schizophrenia	324
The NMDA and glutamate hypothesis of schizophrenia	324
Brain damage and schizophrenia	325
Neurological disorders	325
The neurological examination	325
Dementia: Alzheimer's disease	326
Classification of Alzheimer's disease	327
Assessment of Alzheimer's disease	327

ESSENTIAL BIOLOGICAL PSYCHOLOGY

Neurotransmitters and ACH hypothesis	328
APP and amyloid-beta hypothesis	329
Tau hypothesis	329
Presenilins	329
Apolipoprotein E hypothesis	330
Movement disorder: Parkinson's disease	330
Signs and symptoms	331
Assessment of Parkinson's disease	332
Causes of Parkinson's disease	332
Neural structures involved in Parkinson's disease	333
Motor circuit in Parkinson's disease	333
Management of Parkinson's disease	334
Summary	335
Further reading	336
Key questions	336
<i>Glossary</i>	337
<i>References</i>	348
<i>Name Index</i>	375
<i>Subject Index</i>	380
