Frontiers of Dynamic Games

Game Theory and Management,
St. Petersburg, 2018

 Birkhäuser

Contents

| | | |
|----------|---|------------|
| 1 | An Example of Reflexive Analysis of a Game in Normal Form | 1 |
| | Denis Fedyanin | |
| 2 | Differential-Game-Based Driver Assistance System for Fuel-Optimal Driving | 13 |
| | Michael Flad | |
| 3 | On the Selection of the Nash Equilibria in a Linear-Quadratic Differential Game of Pollution Control | 37 |
| | Ekaterina Gromova and Yulia Lakhina | |
| 4 | Endogenous Formation of Cooperation Structure in TU Games | 49 |
| | Anna Khmelnitskaya, Elena Parilina, and Artem Sedakov | |
| 5 | Analysis of Competitive and Cooperative Solutions in Dynamic Auction Games | 65 |
| | Nikolay A. Krasovskii and Alexander M. Tarasyev | |
| 6 | A-Subgame Concept and the Solutions Properties for Multistage Games with Vector Payoffs | 85 |
| | Denis Kuzytin, Yaroslavna Pankratova, and Roman Svetlov | |
| 7 | A Dynamic Model of Bertrand Competition for an Oligopolistic Market | 103 |
| | Zeng Lian and Jie Zheng | |
| 8 | Pure and Mixed Stationary Nash Equilibria for Average Stochastic Positional Games | 131 |
| | Dmitrii Lozovanu | |
| 9 | Variational Inequalities, Nash Equilibrium Problems and Applications: Unification Dynamics in Networks | 157 |
| | Vladimir Matveenکو, Maria Garmash, and Alexei Korolev | |

| | | |
|-----------|---|------------|
| 10 | About the Looking Forward Approach in Cooperative Differential Games with Transferable Utility | 175 |
| | Ovanes Petrosian and Ildus Kuchkarov | |
| 11 | Dynamically Consistent Bi-level Cooperation of a Dynamic Game with Coalitional Blocs | 209 |
| | Leon A. Petrosyan and David W. K. Yeung | |
| 12 | Optimal Incentive Strategy in a Markov Game with Multiple Followers..... | 231 |
| | Dmitry B. Rokhlin and Gennady A. Ougolnitsky | |
| 13 | How Oligopolies May Improve Consumers' Welfare? R&D Is No Longer Required! | 245 |
| | Alexander Sidorov | |
| 14 | Guaranteed Deterministic Approach to Superhedging: Lipschitz Properties of Solutions of the Bellman–Isaacs Equations | 267 |
| | Sergey N. Smirnov | |
| 15 | Evaluation of Portfolio Decision Improvements by Markov Modulated Diffusion Processes: A Shapley Value Approach | 289 |
| | Benjamin Vallejo-Jimenez and Mario A. Garcia-Meza | |
| 16 | Conditionally Coordinating Contracts in Supply Chains | 303 |
| | Nikolay A. Zenkevich, Irina Berezinets, Natalia Nikolchenko, and Alina Rucheva | |
