Operator Theory in Harmonic and Non-commutative Analysis

23rd International Workshop in Operator Theory
and its Applications, Sydney, July 2012

Contents

Introduction vii

A. Amenta
Tent Spaces over Metric Measure Spaces under Doubling
and Related Assumptions 1

P. Auscher and S. Stahlhut
Remarks on Functional Calculus for Perturbed First-order
Dirac Operators 31

W. Bauer, C. Herrera Yañez and N. Vasilevski
(m, λ)-Berezin Transform and Approximation of Operators on
Weighted Bergman Spaces over the Unit Ball 45

C.C. Cowen, S. Jung and E. Ko
Normal and Cohyponormal Weighted Composition
Operators on H^2 69

R.E. Curto, I.S. Hwang and W.Y. Lee
A Subnormal Toeplitz Completion Problem 87

S. Dey and K.J. Haria
Generalized Repeated Interaction Model and Transfer Functions 111

F. Gesztesy and R. Weikard
Some Remarks on the Spectral Problem Underlying the
Camassa–Holm Hierarchy 137

G. Godefroy
Remarks on Spaces of Compact Operators between Reflexive
Banach Spaces 189

B. Jefferies
Harmonic Analysis and Stochastic Partial Differential Equations:
The Stochastic Functional Calculus 195

S. Patnaik and G. Weiss
Subideals of Operators – A Survey and Introduction
to Subideal-Traces 221

W.J. Ricker
Multipliers and L^p -operator Semigroups 235

A. Skripka
Taylor Approximations of Operator Functions 243
