Topics in Algebra and Analysis

Preparing for the Mathematical Olympiad

Contents

Introduction	v
1 Preliminaries	
1.1 Numbers	1
1.2 Absolute value	10
1.3 Integer part and fractional part of a number	12
1.4 Notable products	15
1.5 Matrices and determinants	17
1.6 Inequalities	21
1.7 Factorization	25
2 Progressions and Finite Sums	
2.1 Arithmetic progressions	31
2.2 Geometric progressions	36
2.3 Other sums	38
2.4 Telescopic sums	40
3 Induction Principle	
3.1 The principle of mathematical induction	43
3.2 Binomial coefficients	53
3.3 Infinite descent	57
3.4 Erroneous induction proofs	60
4 Quadratic and Cubic Polynomials	
4.1 Definition and properties	63
4.1.1 Vieta's formulas	65
4.2 Roots	66
5 Complex Numbers	
5.1 Complex numbers and their properties	75
5.2 Quadratic polynomials with complex coefficients	79
5.3 The fundamental theorem of algebra	81
5.4 Roots of unity	82
5.5 Proof of the fundamental theorem of algebra ★	85

6 Functions and Functional Equations

6.1	Functions	89
6.2	Properties of functions	94
6.2.1	Injective, surjective and bijective functions	94
6.2.2	Even and odd functions	96
6.2.3	Periodic functions	97
6.2.4	Increasing and decreasing functions	98
6.2.5	Bounded functions	99
6.2.6	Continuity	99
6.3	Functional equations of Cauchy type	102
6.3.1	The Cauchy equation $f(x + y) = f(x) + f(y)$	102
6.3.2	The other Cauchy functional equations \star	105
6.4	Recommendations to solve functional equations	108
6.5	Difference equations. Iterations	111

7 Sequences and Series

7.1	Definition of sequence	115
7.2	Properties of sequences	118
7.2.1	Bounded sequences	118
7.2.2	Periodic sequences	119
7.2.3	Recursive or recurrent sequences	120
7.2.4	Monotone sequences	124
7.2.5	Totally complete sequences	125
7.2.6	Convergent sequences	126
7.2.7	Subsequences	127
7.3	Series	129
7.3.1	Power series	131
7.3.2	Abel's summation formula	133
7.4	Convergence of sequences and series \star	135

8 Polynomials

8.1	Polynomials in one variable	139
8.2	The division algorithm	140
8.3	Roots of a polynomial	145
8.3.1	Vieta's formulas	145
8.3.2	Polynomials with integer coefficients	145
8.3.3	Irreducible polynomials	146
8.4	The derivative and multiple roots \star	150
8.5	The interpolation formula	151
8.6	Other tools to find roots	153
8.6.1	Parameters	153

8.6.2	Conjugate	154
8.6.3	Descartes' rule of signs \star	155
8.7	Polynomials that commute	157
8.8	Polynomials of several variables	161
9	Problems	165
10	Solutions to Exercises and Problems	
10.1	Solutions to exercises of Chapter 1	179
10.2	Solutions to exercises of Chapter 2	190
10.3	Solutions to exercises of Chapter 3	199
10.4	Solutions to exercises of Chapter 4	214
10.5	Solutions to exercises of Chapter 5	220
10.6	Solutions to exercises of Chapter 6	229
10.7	Solutions to exercises of Chapter 7	239
10.8	Solutions to exercises of Chapter 8	248
10.9	Solutions to problems of Chapter 9	261
	Notation	305
	Bibliography	307
	Index	309
