

Brian Hall

Lie Groups, Lie Algebras, and Representations

An Elementary Introduction

Second Edition

 Springer

Contents

Part I General Theory

1	Matrix Lie Groups	3
1.1	Definitions	3
1.2	Examples	5
1.3	Topological Properties	16
1.4	Homomorphisms	21
1.5	Lie Groups	25
1.6	Exercises	26
2	The Matrix Exponential	31
2.1	The Exponential of a Matrix	31
2.2	Computing the Exponential	34
2.3	The Matrix Logarithm	36
2.4	Further Properties of the Exponential	40
2.5	The Polar Decomposition	42
2.6	Exercises	46
3	Lie Algebras	49
3.1	Definitions and First Examples	49
3.2	Simple, Solvable, and Nilpotent Lie Algebras	53
3.3	The Lie Algebra of a Matrix Lie Group	55
3.4	Examples	57
3.5	Lie Group and Lie Algebra Homomorphisms	60
3.6	The Complexification of a Real Lie Algebra	65
3.7	The Exponential Map	67
3.8	Consequences of Theorem 3.42	70
3.9	Exercises	73
4	Basic Representation Theory	77
4.1	Representations	77
4.2	Examples of Representations	81
4.3	New Representations from Old	84

4.4	Complete Reducibility	90
4.5	Schur's Lemma	94
4.6	Representations of $\mathfrak{sl}(2; \mathbb{C})$	96
4.7	Group Versus Lie Algebra Representations	101
4.8	A Nonmatrix Lie Group.....	103
4.9	Exercises	105
5	The Baker–Campbell–Hausdorff Formula and Its Consequences	109
5.1	The “Hard” Questions.....	109
5.2	An Illustrative Example	110
5.3	The Baker–Campbell–Hausdorff Formula	113
5.4	The Derivative of the Exponential Map	114
5.5	Proof of the BCH Formula.....	117
5.6	The Series Form of the BCH Formula	118
5.7	Group Versus Lie Algebra Homomorphisms	119
5.8	Universal Covers	126
5.9	Subgroups and Subalgebras.....	128
5.10	Lie's Third Theorem	135
5.11	Exercises	135
 Part II Semisimple Lie Algebras		
6	The Representations of $\mathfrak{sl}(3; \mathbb{C})$	141
6.1	Preliminaries.....	141
6.2	Weights and Roots	142
6.3	The Theorem of the Highest Weight	146
6.4	Proof of the Theorem	148
6.5	An Example: Highest Weight $(1, 1)$	153
6.6	The Weyl Group	154
6.7	Weight Diagrams	158
6.8	Further Properties of the Representations	159
6.9	Exercises	165
7	Semisimple Lie Algebras	169
7.1	Semisimple and Reductive Lie Algebras	169
7.2	Cartan Subalgebras	174
7.3	Roots and Root Spaces.....	176
7.4	The Weyl Group	182
7.5	Root Systems	183
7.6	Simple Lie Algebras	185
7.7	The Root Systems of the Classical Lie Algebras	188
7.8	Exercises	193
8	Root Systems	197
8.1	Abstract Root Systems	197
8.2	Examples in Rank Two.....	201
8.3	Duality	204

8.4	Bases and Weyl Chambers	206
8.5	Weyl Chambers and the Weyl Group	212
8.6	Dynkin Diagrams	216
8.7	Integral and Dominant Integral Elements	218
8.8	The Partial Ordering	221
8.9	Examples in Rank Three	228
8.10	The Classical Root Systems	232
8.11	The Classification	236
8.12	Exercises	238
9	Representations of Semisimple Lie Algebras	241
9.1	Weights of Representations	241
9.2	Introduction to Verma Modules	244
9.3	Universal Enveloping Algebras	246
9.4	Proof of the PBW Theorem	250
9.5	Construction of Verma Modules	254
9.6	Irreducible Quotient Modules	257
9.7	Finite-Dimensional Quotient Modules	260
9.8	Exercises	263
10	Further Properties of the Representations	265
10.1	The Structure of the Weights	265
10.2	The Casimir Element	269
10.3	Complete Reducibility	273
10.4	The Weyl Character Formula	275
10.5	The Weyl Dimension Formula	281
10.6	The Kostant Multiplicity Formula	287
10.7	The Character Formula for Verma Modules	294
10.8	Proof of the Character Formula	295
10.9	Exercises	303
 Part III Compact Lie Groups		
11	Compact Lie Groups and Maximal Tori	307
11.1	Tori	308
11.2	Maximal Tori and the Weyl Group	312
11.3	Mapping Degrees	315
11.4	Quotient Manifolds	321
11.5	Proof of the Torus Theorem	326
11.6	The Weyl Integral Formula	330
11.7	Roots and the Structure of the Weyl Group	333
11.8	Exercises	339
12	The Compact Group Approach to Representation Theory	343
12.1	Representations	343
12.2	Analytically Integral Elements	346
12.3	Orthonormality and Completeness for Characters	351

12.4	The Analytic Proof of the Weyl Character Formula	357
12.5	Constructing the Representations.....	361
12.6	The Case in Which δ is Not Analytically Integral	366
12.7	Exercises	369
13	Fundamental Groups of Compact Lie Groups	371
13.1	The Fundamental Group	371
13.2	Fundamental Groups of Compact Classical Groups	373
13.3	Fundamental Groups of Noncompact Classical Groups.....	377
13.4	The Fundamental Groups of K and T	377
13.5	Regular Elements.....	383
13.6	The Stiefel Diagram.....	389
13.7	Proofs of the Main Theorems.....	394
13.8	The Center of K	399
13.9	Exercises	403
A	Linear Algebra Review	407
A.1	Eigenvectors and Eigenvalues	407
A.2	Diagonalization.....	408
A.3	Generalized Eigenvectors and the SN Decomposition.....	409
A.4	The Jordan Canonical Form	411
A.5	The Trace	411
A.6	Inner Products	412
A.7	Dual Spaces.....	414
A.8	Simultaneous Diagonalization	415
B	Differential Forms	419
C	Clebsch–Gordan Theory and the Wigner–Eckart Theorem.....	425
C.1	Tensor Products of $\mathfrak{sl}(2; \mathbb{C})$ Representations.....	425
C.2	The Wigner–Eckart Theorem	428
C.3	More on Vector Operators	432
D	Completeness of Characters.....	435
	References.....	443
	Index.....	445
