Editor

Interconnected Networks

 Springer

Contents

1	A Tipping Point in the Structural Formation of Interconnected Networks	1
	Alex Arenas and Filippo Radicchi	
1.1	Introduction	1
1.2	Mathematical Modeling	4
1.3	Conclusions	11
	References	13
2	Multilayer Networks: Metrics and Spectral Properties	17
	Emanuele Cozzo, Guilherme Ferraz de Arruda, Francisco A. Rodrigues, and Yamir Moreno	
2.1	Introduction	17
2.2	Notation, Basic Definitions and Properties	19
2.3	Multiplex Networks Related Matrices	20
2.4	The Coarse-Grained Representation of a Multiplex Network	23
2.5	Spectral Properties	24
2.6	Applications	30
2.7	Conclusion	32
	References	34
3	An Ensemble Perspective on Multi-layer Networks	37
	Nicolas Wider, Antonios Garas, Ingo Scholtes, and Frank Schweitzer	
3.1	Introduction	37
3.2	Methods and Definitions	39
3.3	Mean-Field Approximation of Ensemble Properties	44
3.4	Conclusion	52
	References	58

4	Interconnecting Networks: The Role of Connector Links	61
	Javier M. Buldú, Ricardo Sevilla-Escoboza, Jacobo Aguirre, David Papo, and Ricardo Gutiérrez	
4.1	Introduction.....	62
4.2	The Influence of Interconnectivity on the Spectral Properties of an Interconnected Network	63
4.3	Identifying Successful Strategies	65
4.4	Applications	66
4.5	Conclusions.....	73
	References.....	76
5	Vulnerability of Interdependent Networks and Networks of Networks	79
	Michael M. Danziger, Louis M. Shekhtman, Amir Bashan, Yehiel Berezin, and Shlomo Havlin	
5.1	Background: From Single Networks to Networks of Networks ...	79
5.2	Interdependence: Connectivity and Dependency Links	81
5.3	Interdependent Random Networks	83
5.4	Critical Dynamics and the Cascade “Plateau”	87
5.5	Spatially Embedded Interdependent Networks	89
5.6	Attack and Defense of Interdependent Networks.....	92
5.7	Applications of Networks of Networks	94
	References.....	95
6	A Unified Approach to Percolation Processes on Multiplex Networks	101
	Gareth J. Baxter, Davide Cellai, Sergey N. Dorogovtsev, Alexander V. Goltsev, and José F.F. Mendes	
6.1	Introduction.....	102
6.2	Multiplex Percolation	104
6.3	Weak Multiplex Percolation	111
6.4	Conclusions.....	121
	References.....	122
7	How Much Interconnected Should Networks be for Cooperation to Thrive?	125
	Zhen Wang, Attila Szolnoki, and Matjaž Perc	
7.1	Introduction.....	125
7.2	Methods.....	127
7.3	Results	128
7.4	Discussion	135
	References.....	137
8	The Cacophony of Interconnected Networks	141
	Vitor H.P. Louzada, Nuno A.M. Araújo, José S. Andrade Jr., and Hans J. Herrmann	
	References.....	146

9	Several Multiplexes in the Same City: The Role of Socioeconomic Differences in Urban Mobility	149
	Laura Lotero, Alessio Cardillo, Rafael Hurtado, and Jesús Gómez-Gardeñes	
9.1	Introduction	150
9.2	Urban Mobility and Socioeconomic Status	151
9.3	The Adiabatic Projection of a Multiplex	155
9.4	Results	158
9.5	Conclusions	162
	References	163
10	The Weak Core and the Structure of Elites in Social Multiplex Networks	165
	Bernat Corominas-Murtra and Stefan Thurner	
10.1	Introduction	166
10.2	Identification of the Weak Core	167
10.3	Results	172
10.4	Discussion	175
	References	176
11	Interbank Markets and Multiplex Networks: Centrality Measures and Statistical Null Models	179
	Leonardo Bargigli, Giovanni di Iasio, Luigi Infante, Fabrizio Lillo, and Federico Pierobon	
11.1	Introduction	179
11.2	Data Description	181
11.3	The Multiplex Structure of the Italian Interbank Market	182
11.4	Centrality Measures	184
11.5	Conclusions	192
	References	193
12	The Financial System as a Nexus of Interconnected Networks	195
	Stefano Battiston, Guido Caldarelli, and Marco D'Errico	
12.1	Introduction	195
12.2	Multi-level Financial Networks and Leverage	199
12.3	Networks of Networks: Effects <i>Within</i> and <i>Between</i>	201
12.4	Network of Financial Networks: Selected Models	206
12.5	Network of Financial Networks: Selected Empirical Works	217
12.6	Common Asset Exposures: A Novel Approach Based on DebtRank	223
12.7	Conclusions and Future Research	227
	References	227
