

Étienne Pardoux

Probabilistic Models of Population Evolution

Scaling Limits, Genealogies and Interactions

1	Introduction	1
2	Branching Processes	5
2.1	Discrete Time Bienaymé–Galton–Watson Processes	5
2.2	Continuous Time Markov Branching Process	9
2.2.1	The General Case	9
2.2.2	The Binary Branching Case	11
3	Convergence to a Continuous State Branching Process	13
3.1	Convergence of Discrete Time Branching Processes	13
3.2	The Individuals with an Infinite Line of Descent	18
3.3	Convergence of Continuous Time Branching Processes	18
3.4	Convergence of Continuous Time Binary Branching Processes	20
3.5	Convergence to an ODE	21
4	Continuous State Branching Process (CSBP)	23
4.1	Space-Time White Noise, Dawson–Li SDE, and the Branching Property	24
4.2	Laplace Functional of a CSBP	27
4.3	The Individuals Whose Progeny Survives During tN Generations	31
4.4	Consequence for the CSBP	33
4.5	The Prolific Individuals	34
4.6	A More General Dawson–Li SDE	38
5	Genealogies	45
5.1	Preliminaries	46
5.2	Correspondence of Laws	49
5.2.1	Preliminary Results	49
5.2.2	Basic Theorem	50
5.2.3	A Discrete Ray–Knight Theorem	52
5.2.4	Renormalization	53

5.3	Weak Convergence	55
5.3.1	Tightness of $H^{a,N}$	55
5.3.2	Weak Convergence of $H^{a,N}$	56
5.4	A Ray–Knight Theorem	59
6	Models of Finite Population with Interaction	63
6.1	The Model	63
6.2	Coupling over Ancestral Population Size	65
6.3	The Associated Contour Process in the Discrete Model	66
6.4	The Effect of Interactions for Large Population	68
6.5	Renormalized Discrete Model	77
6.6	Renormalization of the Contour Process	80
7	Convergence to a Continuous State Model	83
7.1	Convergence of $Z^{N,x}$	83
7.1.1	Tightness of $Z^{N,x}$	84
7.1.2	Proof of Theorem 13	87
7.2	Convergence of the Contour Process H^N	91
7.2.1	The Case Where f' Is Bounded	91
7.2.2	The General Case ($f \in C^1$ and $f' \leq \beta$)	95
8	Continuous Model with Interaction	99
8.1	Genealogy in Continuous Population with Interaction	99
8.2	The Effect of the Interaction for Large Population	100
8.2.1	Preliminary Results	101
8.2.2	Height of the Continuous Forest of Trees	104
8.2.3	Total Mass of the Continuous Forest of Trees	107
Appendix		109
A.1	Some Elements of Stochastic Calculus	109
A.2	A Martingale Representation Theorem	112
A.3	Martingale Problems and SDEs	113
A.4	Local Time and the Occupation Times Formula	114
A.5	Two Girsanov Theorems	115
A.6	The Lévy–Khintchine Formula	117
A.7	Tightness and Weak Convergence in $D([0, +\infty))$	118
