Contents

1	An L^1-Product-Integration Method in Astrophysics.....	1
	M. Ahues Blanchait and H. Kaboul	
1.1	Introduction.....	1
1.2	A Product-Integration Method in $L^1([a, b], \mathbb{C})$	2
1.3	Iterative Refinement.....	4
1.4	Numerical Evidence.....	5
	References.....	7
2	Differential Operators and Approximation Processes	
	Generated by Markov Operators	9
	F. Altomare, M. Cappelletti Montano, V. Leonessa, and I. Raşa	
2.1	Introduction.....	9
2.2	Canonical Elliptic Second-Order Differential Operators and Bernstein-Schnabl Operators.....	10
2.3	Other Classes of Differential Operators and Approximation Processes.....	16
2.4	Final Remarks	17
	References.....	18
3	Analysis of Boundary-Domain Integral Equations	
	for Variable-Coefficient Neumann BVP in 2D.....	21
	T.G. Ayele, T.T. Dufera, and S.E. Mikhailov	
3.1	Preliminaries.....	21
3.2	Parametrix-Based Potential Operators	23
3.3	BDIEs for Neumann BVP	26
3.4	Equivalence and Invertibility Theorems.....	27
3.5	Perturbed BDIE Systems for the Neumann Problem	30
3.6	Conclusion.....	32
	References.....	33

4	A Measure of the Torsional Performances of Partially Hinged Rectangular Plates	35
	E. Berchio, D. Buoso, and F. Gazzola	
4.1	Introduction.....	35
4.2	Variational Setting and Gap Function Definition.....	36
4.3	Proof of Theorem 1.....	40
4.4	Proof of Theorem 2.....	41
4.5	Proofs of Theorems 3 and 4.....	43
	References.....	45
5	On a Class of Integral Equations Involving Kernels of Cosine and Sine Type	47
	L.P. Castro, R.C. Guerra, and N.M. Tuan	
5.1	Introduction.....	47
5.2	Integral Equations Generated by an Integral Operator with Cosine and Sine Kernels.....	48
5.3	Operator Properties.....	53
5.3.1	Invertibility and Spectrum.....	53
5.3.2	Parseval-Type Identity and Unitary Properties.....	54
5.3.3	Involution.....	55
5.3.4	New Convolution.....	55
	References.....	56
6	The Simple-Layer Potential Approach to the Dirichlet Problem: An Extension to Higher Dimensions of Muskhelishvili Method and Applications	59
	A. Cialdea	
6.1	Introduction.....	59
6.2	Muskhelishvili's Method and Its Extension to \mathbb{R}^n	61
6.2.1	Muskhelishvili's Method.....	61
6.2.2	Conjugate Differential Forms.....	61
6.2.3	The Extension to Higher Dimensions of Muskhelishvili Method.....	63
6.3	The Multiple-Layer Approach.....	65
	References.....	68
7	Bending of Elastic Plates: Generalized Fourier Series Method	71
	C. Constanda and D. Doty	
7.1	Introduction.....	71
7.2	The Boundary Value Problem.....	72
7.3	Numerical Example.....	73
7.4	Graphical Illustrations.....	74
7.5	The Classical Gram-Schmidt Procedure (CGS).....	75
7.6	The Modified Gram-Schmidt Procedure (MGS).....	77
7.7	The Householder Reflection Procedure (HR).....	78
	References.....	81

8	Existence and Uniqueness Results for a Class of Singular Elliptic Problems in Two-Component Domains	83
	P. Donato and F. Raimondi	
8.1	Introduction	83
8.2	Setting of the Problem	84
8.3	A Priori Estimates	87
8.4	Main Results	90
	References	93
9	Fredholmness of Nonlocal Singular Integral Operators with Slowly Oscillating Data	95
	G. Fernández-Torres and Yu.I. Karlovich	
9.1	Introduction	95
9.2	Invertibility Criteria for Wiener Type Functional Operators	98
9.3	Mellin Pseudodifferential Operators	100
9.4	Fredholmness of the Operator N	101
	References	104
10	Multidimensional Time Fractional Diffusion Equation	107
	M. Ferreira and N. Vieira	
10.1	Introduction	107
10.2	Preliminaries	108
10.3	Fundamental Solution of the Multidimensional Time Fractional Diffusion-Wave Equation	110
10.4	Fractional Moments	111
10.5	Graphical Representations of the Fundamental Solution	112
	10.5.1 Case $n = 1$	112
	10.5.2 Case $n = 2$	113
10.6	Application to Diffusion in Thermoelasticity	114
	References	116
11	On Homogenization of Nonlinear Robin Type Boundary Conditions for the n-Laplacian in n-Dimensional Perforated Domains	119
	D. Gómez, E. Pérez, A.V. Podol'skii, and T.A. Shaposhnikova	
11.1	Introduction	119
11.2	Setting of the Problem and Homogenized Problems	122
	11.2.1 Table of Homogenized Problems	125
11.3	Preliminary Results	126
11.4	Critical Relation for the Adsorption	128
11.5	Critical Size for Perforations	131
11.6	Extreme Cases	134
	References	137
12	Interior Transmission Eigenvalues for Anisotropic Media	139
	A. Kleefeld and D. Colton	
12.1	Introduction	139

12.2	Problem Formulation.....	140
12.3	Boundary Integral Equations	141
12.4	Numerical Results	143
12.5	Summary and Outlook	146
	References.....	146
13	Improvement of the Inside-Outside Duality Method	149
	A. Kleefeld and E. Reichwein	
13.1	Introduction and Motivation	149
13.2	Problem Formulation.....	150
13.3	The Inside-Outside Duality Method.....	151
13.4	Improvement and Numerical Results.....	152
	13.4.1 Lebedev Quadrature	153
	13.4.2 Spherical t -Design	154
	13.4.3 Numerical Results	155
13.5	Summary and Outlook	157
	References.....	158
14	A Note on Optimal Design for Thin Structures in the Orlicz–Sobolev Setting	161
	P.A. Kozarzewski and E. Zappale	
14.1	Introduction.....	161
14.2	Preliminaries.....	164
14.3	Proof of Theorem 1	167
	References.....	170
15	On the Radiative Conductive Transfer Equation: A Heuristic Convergence Criterion by Stability Analysis	173
	C.A. Ladeia, J.C.L. Fernandes, B.E.J. Bodmann, and M.T. Vilhena	
15.1	Introduction.....	173
15.2	The Radiative Conductive Transfer Equation in Cylinder Geometry	174
15.3	Solution by the Decomposition Method	175
15.4	A Heuristic Convergence Criterion by Stability Analysis.....	179
15.5	Numerical Results	180
15.6	Conclusions.....	181
	References.....	182
16	An Indirect Boundary Integral Equation Method for Boundary Value Problems in Elastostatics	183
	A. Malaspina	
16.1	Preliminaries.....	183
16.2	Indirect Method	185
	References.....	190

17	An Instability Result for Suspension Bridges	193
	C. Marchionna and S. Panizzi	
17.1	Introduction.....	193
17.2	The Isoenergetic Poincaré Map and the Asymptotic Behavior of Its Linearization \mathcal{L}_k	196
17.3	Some Related Problems and Questions	198
17.4	Numerical Examples	199
	References.....	202
18	A New Diffeomorph Conformal Methodology to Solve Flow Problems with Complex Boundaries by an Equivalent Plane Parallel Problem	205
	A. Meneghetti, B.E.J. Bodmann, and M.T. Vilhena	
18.1	Introduction.....	205
18.2	Coordinate Transformations	205
18.3	Transformation by Invariance	207
18.4	Application to a Navier-Stokes Problem	208
18.5	Application to an Advection-Diffusion Problem	209
18.6	A Numerical Example	209
18.7	Conclusion.....	213
	References.....	214
19	A New Family of Boundary-Domain Integral Equations for the Mixed Exterior Stationary Heat Transfer Problem with Variable Coefficient	215
	S.E. Mikhailov and C.F. Portillo	
19.1	Introduction.....	215
19.2	Preliminaries.....	216
19.3	Boundary Value Problem	218
19.4	Parametrices and Remainders	218
19.5	Surface and Volume Potentials	219
19.6	Third Green Identities and Integral Relations.....	221
19.7	Boundary-Domain Integral Equation System.....	222
19.8	Invertibility	224
	References.....	225
20	Radiation Conditions and Integral Representations for Clifford Algebra-Valued Null-Solutions of the Iterated Helmholtz Operator	227
	D. Mitrea and N. Okamoto	
20.1	Introduction.....	227
20.2	Fundamental Solutions.....	229
20.3	Integral Representations	233
	References.....	235

21	A Wiener-Hopf System of Equations in the Steady-State Propagation of a Rectilinear Crack in an Infinite Elastic Plate	237
	A. Nobili, E. Radi, and L. Lanzoni	
21.1	Introduction.....	237
21.2	Boundary Conditions.....	240
21.3	Wiener-Hopf Factorization	243
	References.....	247
22	Mono-Energetic Neutron Space-Kinetics in Full Cylinder Symmetry: Simulating Power Decrease	249
	F.R. Oliveira, B.E.J. Bodmann, M.T. Vilhena, and F. Carvalho da Silva	
22.1	Introduction.....	249
22.2	The Model	250
22.3	Variable Separation.....	251
22.4	A Closed Form Solution in Cylinder Geometry	251
22.5	Numerical Results	254
22.6	Conclusion.....	257
	References.....	257
23	Asymptotic Solutions of Maxwell's Equations in a Layered Periodic Structure	259
	M.V. Perel and M.S. Sidorenko	
23.1	Introduction.....	259
23.2	Maxwell's Equations and the Floquet–Bloch Solutions.....	260
23.3	Two-Scale Solutions of the Maxwell Equations	261
23.4	Boundary Value Problem in a Half-Space	262
23.5	Conclusions.....	264
	References.....	264
24	Some Properties of the Fractional Circle Zernike Polynomials	265
	M.M. Rodrigues and N. Vieira	
24.1	Introduction.....	265
24.2	Preliminaries.....	266
24.3	Fractional Circle Zernike Polynomials.....	268
24.4	Graphical Representation of Fractional Circle Zernike Polynomials	272
	References.....	275
25	Double Laplace Transform and Explicit Fractional Analogue of 2D Laplacian	277
	S. Rogosin and M. Dubatovskaya	
25.1	Introduction.....	277
25.2	Double Laplace Transforms. Definition and Main Properties.....	279

25.3	Application of the Double Laplace Transform to Explicit Fractional Laplacian.....	283
25.3.1	Power Type Fractional Laplacian $\Delta^{\alpha,\beta}$	283
25.3.2	Skewed Fractional Laplacian $\Delta_{-+}^{\alpha,\beta;Q}$ in the Quarter-Plane	284
25.4	Discussion and Outlook.....	291
	References.....	292
26	Stability of the Laplace Single Layer Boundary Integral Operator in Sobolev Spaces	293
	O. Steinbach	
26.1	Introduction.....	293
26.2	Strong Domain Variational Formulation	295
26.3	Ultra-Weak Domain Variational Formulation.....	298
26.4	Single Layer Potential.....	299
	References.....	303
27	Spectral Lanczos' Tau Method for Systems of Nonlinear Integro-Differential Equations	305
	P.B. Vasconcelos, J. Matos, and M.S. Trindade	
27.1	Introduction.....	305
27.2	Preliminaries.....	306
27.3	The Tau Method for Integro-Differential Problems	308
27.4	Nonlinear Approach for Integro-Differential Problems	309
27.5	Contributions to Stability	310
27.6	Numerical Results.....	311
27.7	Conclusions.....	314
	References.....	314
28	Discreteness, Periodicity, Holomorphy, and Factorization	315
	V.B. Vasilyev	
28.1	Introduction.....	315
28.2	Discreteness	316
28.3	Periodicity	317
28.4	Holomorphy	318
28.5	Factorization	318
	28.5.1 Conical Case	320
	References	324
29	Modes Coupling Seismic Waves and Vibrating Buildings: Existence	325
	D. Volkov and S. Zheltukhin	
29.1	Introduction.....	325

29.2	Low Frequency Analysis.....	327
29.3	High Frequency Asymptotic Analysis	330
	References.....	333

1	On a Continuous Energy Monte Carlo Simulator for Neutron Transport: Optimisation with Fission, Intermediate and Thermal Distributions	1
	L.F.F. Chaves Barcellos, B.E.J. Bodmann, S.Q. Bogado Leite, and M.T. Vilhena	
1.1	Introduction	1
1.2	Neutron Transport by a Monte Carlo Method	2
1.3	Program Description	2
1.4	Nuclear Reactions	4
1.5	Coupled Distributions	7
1.6	Results	7
1.7	Conclusions and Future Work	9
	References	10
2	The Use of Similarity Indices in the Analysis of Temporal Distribution of Mammals	11
	M. Belmaker	
2.1	Introduction	11
2.2	The Case Study	12
2.3	The Statistical Model	14
2.4	Results	17
2.5	Discussion and Conclusion	17
	References	19
3	The Method of Superposition for Near-Field Acoustic Holography in a Semi-anechoic Chamber	21
	D.J. Chappell and N.M. Abusag	
3.1	Introduction	21
3.2	Method of Superposition	21
3.3	Near-Field Acoustic Holography in a Half-Space	23
3.4	Regularisation and Sparse Reconstruction	23

3.5	Numerical Results	24
3.6	Conclusions	29
	References	29
4	Application of Stochastic Dynamic Programming in Demand Dispatch-Based Optimal Operation of a Microgrid	31
	F. Daburi Farimani and H. Rajabi Mashhadi	
4.1	Introduction	31
4.2	Problem Description	33
4.3	Stochastic Dynamic Programming	35
4.4	Inventory Control Model	35
4.5	Problem Formulation by SDP (Inventory Control Model)	35
4.6	Lemma	37
4.7	Solution Approach: Step by Step	38
4.8	Summary and Conclusion	41
	References	42
5	Spectral Boundary Element Algorithms for Multi-Length Interfacial Dynamics	43
	P. Dimitrakopoulos	
5.1	Introduction	43
5.2	Mathematical Formulation	43
5.3	Interfacial Spectral Boundary Element Algorithms	46
5.4	Multi-Length Interfacial Dynamics Problems	48
	References	51
6	Kinect Depth Recovery Based on Local Filters and Plane Primitives	53
	M.A. Esfahani and H. Pourreza	
6.1	Introduction	53
6.2	Proposed Method	56
6.3	Experimental Results	58
6.4	Conclusion	61
	References	62
7	On the Neutron Point Kinetic Equation with Reactivity Decomposition Based on Two Time Scales	65
	C.E. Espinosa, B.E.J. Bodmann, and M.T. Vilhena	
7.1	Introduction	65
7.2	Neutron Poisons	66
7.3	Point Kinetics with Poisons	66
7.4	Solution by Decomposition	67
7.5	Numerical Results	68
7.6	Algorithm Stability	70
7.7	Conclusions	72

11	An Acceleration Approach for Fracture Problems in the Extended Boundary Element Method (XBEM) Framework	105
	G. Hattori, S.H. Kettle, L. Campos, J. Trevelyan, and E.L. Albuquerque	
11.1	Introduction	105
11.2	Extended Boundary Element Method	106
11.3	Adaptive Cross Approximation	107
11.4	Results	110
11.5	Conclusions	112
	References	112
12	Flux Characterization in Heterogeneous Transport Problems by the Boundary Integral Method	115
	R.D. Hazlett	
12.1	Introduction	115
12.2	Boundary Integral Method for Coupled Analytic Solutions	116
12.3	Numerical Boundary Integral Evaluation	117

12.4	Piecewise Continuous Solutions	120
12.5	Parametric Methods	120
12.6	Prolongation	120
12.7	Conclusions.....	121
	References.....	124
13	GPU Based Mixed Precision PWR Depletion Calculation	127
	A. Heimlich, A.C.A. Alvim, F.C. Silva, and A.S. Martinez	
13.1	Introduction.....	127
13.2	Theory	128
13.3	Exponential Matrix.....	130
13.4	Runge-Kutta Methods.....	131
	13.4.1 Runge-Kutta-Fehlberg.....	131
13.5	Adams-Moulton-Bashford Method.....	133
13.6	Results	135
13.7	Conclusions and Further Developments.....	136
	References.....	136
14	2D Gauss-Hermite Quadrature Method for Jump-Diffusion PIDE Option Pricing Models	137
	L. Jódar, M. Fakharany, and R. Company	
14.1	Introduction.....	137
14.2	Mixed Derivative Elimination	139
14.3	Numerical Scheme Construction and Properties.....	140
14.4	Numerical Example	144
	References.....	145
15	Online Traffic Prediction Using Time Series: A Case study	147
	M. Karimpour, A. Karimpour, K. Kompany, and Ali Karimpour	
15.1	Introduction.....	147
15.2	Traffic Modeling by Mixed Logic Dynamic	148
15.3	In-Flow Rate Prediction.....	152
15.4	Experimental Results.....	153
15.5	Conclusion and Discussion	155
	References.....	156
16	Mathematical Modeling of One-Dimensional Oil Displacement by Combined Solvent-Thermal Flooding	157
	T. Marotto, A. Pires, and F. Forouzanfar	
16.1	Introduction.....	157
16.2	Physical and Mathematical Model	158
16.3	Example of Solution	162
16.4	Conclusions.....	165
	References.....	167

17 Collocation Methods for Solving Two-Dimensional Neural Field Models on Complex Triangulated Domains..... 169
R. Martin, D.J. Chappell, N. Chuzhanova, and J.J. Crofts
17.1 Introduction..... 169
17.2 A Two-Dimensional Neural Field Model 170
17.3 The Collocation Method 171
17.4 Results 173
17.5 Conclusions..... 175
References..... 177

18 Kulkarni Method for the Generalized Airfoil Equation..... 179
A. Mennouni
18.1 Mathematical Background 179
18.2 Description of the Method 181
18.3 Convergence Analysis..... 182
18.4 Numerical Example 185
References..... 185

19 Droplet Deposition and Coalescence in Curved Pipes..... 187
H. Nguyen, R. Mohan, O. Shoham, and G. Kouba
19.1 Introduction..... 187
19.2 Experimental Program 188
19.2.1 Test Facility 188
19.2.2 Experimental Results..... 190
19.3 Modeling and Results 194
19.3.1 Physical Model 194
19.3.2 Conservation of Angular Momentum..... 195
19.3.3 Droplet Size Distribution..... 196
19.3.4 Droplet Deposition Criterion..... 197
19.3.5 Results and Discussion 198
