

Jürgen Jost

Riemannian Geometry and Geometric Analysis

Seventh Edition

Springer

Contents

| | | |
|----------|--|------------|
| 1 | Riemannian Manifolds | 1 |
| 1.1 | Manifolds and Differentiable Manifolds | 1 |
| 1.2 | Tangent Spaces | 8 |
| 1.3 | Submanifolds and Foliations..... | 13 |
| 1.4 | Riemannian Metrics | 16 |
| 1.5 | Existence of Geodesics on Compact Manifolds | 36 |
| 1.6 | The Heat Flow and the Existence of Geodesics..... | 39 |
| 1.7 | Existence of Geodesics on Complete Manifolds..... | 43 |
| | Basic Exercises for Chap. 1 | 46 |
| | Further Exercises for Chap. 1..... | 48 |
| 2 | Lie Groups and Vector Bundles | 51 |
| 2.1 | Vector Bundles | 51 |
| 2.2 | Complex and Holomorphic Vector Bundles: Almost Complex and Complex Manifolds..... | 61 |
| 2.3 | Integral Curves of Vector Fields: Lie Algebras | 65 |
| 2.4 | Symplectic Structures | 76 |
| 2.5 | Lie Groups | 82 |
| 2.6 | Spin Structures | 88 |
| | Basic Exercises for Chap. 2..... | 112 |
| | Further Exercises for Chap. 2..... | 114 |
| 3 | The Laplace Operator and Harmonic Differential Forms | 115 |
| 3.1 | The Laplace Operator on Functions | 115 |
| 3.2 | The Spectrum of the Laplace Operator..... | 121 |
| 3.3 | The Laplace Operator on Forms | 131 |
| 3.4 | Representing Cohomology Classes by Harmonic Forms..... | 143 |
| 3.5 | The Heat Flow and Harmonic Forms..... | 153 |
| | Basic Exercises for Chap. 3..... | 159 |
| | Further Exercises for Chap. 3..... | 161 |

| | | |
|----------|--|-----|
| 4 | Connections and Curvature | 163 |
| 4.1 | Connections in Vector Bundles | 163 |
| 4.2 | Metric Connections. The Yang–Mills Functional | 176 |
| 4.3 | The Levi-Civita Connection | 193 |
| 4.4 | Connections for Spin Structures and the Dirac Operator | 213 |
| 4.5 | The Bochner Method | 220 |
| 4.6 | Eigenvalue Estimates by the Method of Li–Yau | 227 |
| | Basic Exercises for Chap. 4 | 232 |
| | Further Exercises for Chap. 4 | 232 |
| 5 | Geometry of Submanifolds | 233 |
| 5.1 | The Second Fundamental Form | 233 |
| 5.2 | The Curvature of Submanifolds | 236 |
| 5.3 | The Volume of Submanifolds | 240 |
| 5.4 | Minimal Submanifolds | 243 |
| | Basic Exercises for Chap. 5 | 248 |
| | Further Exercises for Chap. 5 | 248 |
| 6 | Geodesics and Jacobi Fields | 251 |
| 6.1 | First and Second Variation of Arc Length and Energy | 251 |
| 6.2 | Jacobi Fields | 257 |
| 6.3 | Conjugate Points and Distance Minimizing Geodesics | 267 |
| 6.4 | Riemannian Manifolds of Constant Curvature | 276 |
| 6.5 | The Rauch Comparison Theorems and Other Jacobi Field Estimates | 279 |
| 6.6 | The Hessian of the Squared Distance Function | 285 |
| 6.7 | Volume Comparison | 288 |
| 6.8 | Approximate Fundamental Solutions and Representation Formulas | 293 |
| 6.9 | The Geometry of Manifolds of Nonpositive Sectional Curvature | 295 |
| | Basic Exercises for Chap. 6 | 313 |
| | Further Exercises for Chap. 6 | 313 |
| | A Short Survey on Curvature and Topology | 317 |
| 7 | Symmetric Spaces and Kähler Manifolds | 327 |
| 7.1 | Complex Projective Space | 327 |
| 7.2 | Kähler Manifolds | 334 |
| 7.3 | The Geometry of Symmetric Spaces | 346 |
| 7.4 | Some Results About the Structure of Symmetric Spaces | 358 |
| 7.5 | The Space $Sl(n, \mathbb{R})/SO(n, \mathbb{R})$ | 365 |
| 7.6 | Symmetric Spaces of Noncompact Type as Examples of Nonpositively Curved Riemannian Manifolds | 385 |
| | Basic Exercises for Chap. 7 | 390 |
| | Further Exercises for Chap. 7 | 390 |

| | | |
|-----------|---|-----|
| 8 | Morse Theory and Floer Homology | 391 |
| 8.1 | Preliminaries: Aims of Morse Theory | 391 |
| 8.2 | Compactness: The Palais–Smale Condition and the Existence of Saddle Points | 396 |
| 8.3 | Local Analysis: Nondegeneracy of Critical Points, Morse Lemma, Stable and Unstable Manifolds | 399 |
| 8.4 | Limits of Trajectories of the Gradient Flow | 415 |
| 8.5 | The Morse–Smale–Floer Condition: Transversality and \mathbb{Z}_2 -Cohomology | 423 |
| 8.6 | Orientations and \mathbb{Z} -homology | 430 |
| 8.7 | Homotopies | 434 |
| 8.8 | Graph Flows | 439 |
| 8.9 | Orientations | 443 |
| 8.10 | The Morse Inequalities | 460 |
| 8.11 | The Palais–Smale Condition and the Existence of Closed Geodesics | 472 |
| | Exercises for Chap. 8 | 486 |
| 9 | Harmonic Maps Between Riemannian Manifolds | 489 |
| 9.1 | Definitions | 489 |
| 9.2 | Formulas for Harmonic Maps: The Bochner Technique | 497 |
| 9.3 | Definition and Lower Semicontinuity of the Energy Integral | 509 |
| 9.4 | Higher Regularity | 521 |
| 9.5 | Harmonic Maps into Manifolds of Nonpositive Sectional Curvature: Existence | 533 |
| 9.6 | Harmonic Maps into Manifolds of Nonpositive Sectional Curvature: Regularity | 540 |
| 9.7 | Harmonic Maps into Manifolds of Nonpositive Curvature: Uniqueness and Other Properties | 563 |
| | Basic Exercises for Chap. 9 | 569 |
| | Further Exercises for Chap. 9 | 570 |
| 10 | Harmonic Maps from Riemann Surfaces | 573 |
| 10.1 | Two-dimensional Harmonic Mappings and Holomorphic Quadratic Differentials | 573 |
| 10.2 | The Existence of Harmonic Maps in Two Dimensions | 588 |
| 10.3 | Regularity Results | 613 |
| | Basic Exercises for Chap. 10 | 628 |
| | Further Exercises for Chap. 10 | 629 |
| 11 | Variational Problems from Quantum Field Theory | 631 |
| 11.1 | The Ginzburg–Landau Functional | 631 |
| 11.2 | The Seiberg–Witten Functional | 640 |
| 11.3 | Dirac-Harmonic Maps | 647 |
| | Exercises for Chap. 11 | 655 |

A Linear Elliptic Partial Differential Equations 657

 A.1 Sobolev Spaces 657

 A.2 Existence and Regularity Theory for Solutions of Linear
 Elliptic Equations 662

 A.3 Existence and Regularity Theory for Solutions of Linear
 Parabolic Equations 666

B Fundamental Groups and Covering Spaces 669

Bibliography 675

Index 691
