

Martin Renilson

Submarine Hydrodynamics

Second Edition

Contents

1	Introduction	1
1.1	General	1
1.2	Geometry	1
1.3	Standard Submarine Geometries	3
1.3.1	Series 58	3
1.3.2	Myring Shape	4
1.3.3	DRDC Standard Submarine Model	5
1.3.4	DARPA Suboff Model	6
1.3.5	Iranian Hydrodynamic Series of Submarines (IHSS)	8
1.3.6	Joubert/BB1/BB2	9
	References	10
2	Hydrostatics and Control	13
2.1	Hydrostatics and Displacement	13
2.2	Static Control	15
2.2.1	Control in the Vertical Plane	15
2.2.2	Transverse Stability	17
2.2.3	Longitudinal Stability	19
2.3	Ballast Tanks	19
2.3.1	Categories of Ballast Tanks	19
2.3.2	Main Ballast Tanks	20
2.3.3	Trim and Compensation Ballast Tanks	20
2.4	Trim Polygon	21
2.5	Stability When Surfacing/Diving	24
2.6	Stability When Bottoming	26
2.7	Stability When Surfacing Through Ice	27
2.8	Stability Criteria	28

2.8.1	Introduction	28
2.8.2	Bureau Veritas Criteria	30
2.8.3	DNV-GL Criteria	32
	References	32
3	Manoeuvring and Control	33
3.1	Introduction	33
3.2	Equations of Motion	35
3.3	Hydrodynamic Forces—Steady State Assumption	36
3.3.1	Coefficient Based Model	36
3.3.2	Look-up Tables	40
3.3.3	Sensitivity of Individual Coefficients	40
3.4	Determination of Coefficients	42
3.4.1	Model Tests	42
3.4.2	Computational Fluid Dynamics	51
3.4.3	Approximation Techniques	54
3.5	Alternative Approach to Simulation of Manoeuvring	67
3.6	Manoeuvring in the Horizontal Plane	69
3.6.1	Turning	69
3.6.2	Stability in the Horizontal Plane	72
3.6.3	Pivot Point	72
3.6.4	Effective Rudder Angle	73
3.6.5	Heel in a Turn	74
3.6.6	Effect of Sail in a Turn	75
3.6.7	Centre of Lateral Resistance	78
3.7	Manoeuvring in the Vertical Plane	78
3.7.1	Stability in the Vertical Plane	78
3.7.2	Effective Plane Angles	79
3.7.3	Neutral Point	80
3.7.4	Critical Point	81
3.7.5	Influence of Neutral Point and Critical Point on Manoeuvring in the Vertical Plane	82
3.8	Manoeuvring Close to the Surface	85
3.8.1	Surface Suction	85
3.8.2	Manoeuvring in the Vertical Plane	92
3.8.3	Manoeuvring in the Horizontal Plane	95
3.9	Manoeuvring Criteria	95
3.10	Manoeuvring Limitations	97
3.10.1	Introduction	97
3.10.2	Safe Operating Envelopes	97
3.10.3	Generation of Safe Operating Envelopes	98
3.10.4	Aft Plane Jam	99
3.10.5	Flooding	100

3.10.6	Operating Constraints	100
3.11	Free Running Model Experiments	101
3.12	Submarine Manoeuvring Trials	107
3.12.1	Introduction	107
3.12.2	Definitive Manoeuvres	107
3.12.3	Preparation for the Trials	110
3.12.4	Conduct of the Trials	113
3.12.5	Analysis of the Trial Results	114
	References	115
4	Resistance and Flow	119
4.1	Introduction	119
4.2	Components of Resistance	120
4.3	Effect of Hull Form	122
4.4	Fore Body Shape	124
4.5	Parallel Middle Body (PMB)	126
4.6	Aft Body Shape	127
4.7	Appendages	128
4.7.1	Introduction	128
4.7.2	Appendages Aligned with the Flow	129
4.7.3	Appendages at an Angle to the Flow	132
4.8	Operating Close to the Surface	132
4.8.1	Hull	132
4.8.2	Masts	135
4.9	Prediction of Submarine Resistance	137
4.9.1	Model Testing	137
4.9.2	Computational Fluid Dynamics (CFD)	144
4.9.3	Approximation Techniques	144
	References	151
5	Propulsion	155
5.1	Propulsor/Hull Interaction	155
5.1.1	Introduction	155
5.1.2	Flow into the Propulsor	157
5.1.3	Wake	161
5.1.4	Thrust Deduction	162
5.1.5	Hull Efficiency	163
5.1.6	Relative Rotative Efficiency	164
5.1.7	Quasi Propulsive Coefficient	165
5.2	Axisymmetric Hull with Single Propeller	165
5.3	Axisymmetric Hull with Single Pumpjet	167
5.4	Other Configurations	172
5.4.1	Contra-rotating Propulsion	172
5.4.2	Twin Propellers	174

5.4.3	Podded Propulsion	174
5.4.4	Rim Driven Propulsion	174
5.5	Prediction of Propulsor Performance	176
5.5.1	Physical Model Tests	176
5.5.2	Computational Fluid Dynamics	181
	References	182
6	Appendage Design	183
6.1	General	183
6.2	Sail	185
6.3	Forward Control Surfaces	187
6.3.1	General	187
6.3.2	Midline Planes	188
6.3.3	Eye brow Planes	188
6.3.4	Sail Planes	190
6.4	Aft Control Surfaces	191
6.4.1	General	191
6.4.2	Cruciform Configuration	193
6.4.3	X-form Configuration	195
6.4.4	Alternative Configurations	201
	References	203
7	Hydro-acoustic Performance	205
7.1	General	205
	References	208
	Appendix	209
	Index	221
