

Primate Adaptation and Evolution

Third Edition

John G. Fleagle

Stony Brook University, Stony Brook, NY

AMSTERDAM • BOSTON • HEIDELBERG • LONDON • NEW YORK • OXFORD • PARIS
SAN DIEGO • SAN FRANCISCO • SINGAPORE • SYDNEY • TOKYO

Academic Press is an Imprint of Elsevier

Preface	ix	Habitat Use	38
		Activity Patterns	40
		A Primate Day	41
		Primate Diets	41
		Locomotion	43
		Social Life	45
		Social Organization	45
		Dispersal	47
		Why Primates Live in Groups	47
		Protection from Predators	48
		Improved Access to Food	48
		Access to Mates	49
		Assistance in Protecting and Rearing Offspring	49
		Polyspecific Groups	50
		Phylogeny	50
		Primate Life Histories	50
		General Patterns	51
		Primate Patterns	52
		Primate Communities	54
		References	54
1. Adaptation, Evolution, and Systematics	1	4. The Prosimians: Lemurs, Lorises, Galagos and Tarsiers	57
Adaptation	1	Strepsirrhines	57
Evolution	1	Malagasy Strepsirrhines	58
Phylogeny	2	Cheirogaleids	58
Taxonomy and Systematics	4	Lemurids	63
References	6	Lepilemurids	67
2. The Primate Body	9	Indriids	69
Primate Anatomy	9	Daubentoniids	72
Size	9	Subfossil Malagasy Strepsirrhines	73
Cranial Anatomy	10	Palaeopropithecines or Sloth Lemurs	74
Bones of the Skull	10	Archaeolemurines or Monkey Lemurs	76
Teeth and Chewing	12	Megaladapines, the Koala Lemurs	76
Tongue and Taste	13	Adaptive Radiation of Malagasy Primates	77
Muscles of Facial Expression	14	Galagos and Lorises	78
The Brain and Senses	14	Galagids	78
The Brain	15	Lorisids	81
Nasal Region and Olfaction	16	Adaptive Radiation of Galagos and Lorises	82
Eyes and Vision	18	Phyletic Relationships of Strepsirrhines	82
Ears and Hearing	19	Haplorhines	83
The Trunk and Limbs	21	Tarsiers	83
Axial Skeleton	22	References	86
Upper Limb	22		
Lower Limb	25		
Claws and Nails	26		
Limb Proportions	27		
Soft Tissues	28		
Digestive System	28		
Reproductive System	30		
Growth and Development	30		
References	33		
3. Primate Lives	35		
Primate Habitats	35		
Forest Habitats	35		
Habitats within the Forest	36		
Primates in Tropical Ecosystems	38		

5. New World Anthropoids	89	Adaptations to Diet	186
Primate Grades and Clades	89	Dental Adaptations	186
Anatomy Of Higher Primates	89	Other Oral Adaptations	188
Platyrrhines	91	Digestive Tract Adaptations	188
Pitheciids	93	Primate Sensory Adaptations	189
Callicebinae	93	Vision	189
Pitheciinae	95	Balance, Movement and Hearing	190
Atelids	98	Locomotor Adaptations	190
Cebids	103	Arboreal Quadrupeds	192
Cebinae	103	Terrestrial Quadrupeds	192
Aotines	106	Leapers	193
Callitrichines	109	Suspensory Primates	194
Tamarins	110	Bipeds	194
Marmosets	112	Locomotor Compromises	195
Adaptive Radiation of Platyrrhines	115	Locomotion, Posture, and Ecology	195
Phyletic Relationships of Platyrrhines	116	Anatomical Correlates of Social	
References	117	Organization	196
		Brains, Behavior, and Ecology	197
6. Old World Monkeys	119	Adaptation and Phylogeny	198
Catarrhine Anatomy	119	References	199
Cercopithecoids	119		
Cercopithecines	123	10. The Fossil Record	201
Colobines	135	Geological Time	201
Adaptive Radiation of		Molecular Dating of Phylogeny	203
Old World Monkeys	146	Plate Tectonics and Continental Drift	204
Phyletic Relationships of Old World		Paleoclimate	204
Monkeys	148	Fossils and Fossilization	205
References	148	Paleoenvironments	207
		Reconstructing Behavior	208
7. Apes and Humans	151	Paleobiogeography	209
Hominoids	151	References	209
Hylobatids	152		
Hominids	155	11. Primate Origins	211
Chimpanzees	160	Euarchontans – Primates and Other	
Adaptive Radiation of Hominoids	165	Mammals	212
Phyletic Relationships of Hominoids	166	Tree Shrews	212
References	166	Flying Lemurs	213
		Plesiadapiforms	213
8. Primate Communities and Biogeography	169	Purgatoriids	215
Primate Biogeography	170	Microsyopids	215
Ecology and Biogeography	172	Micromomyids	215
Comparing Primate Communities	174	Picromomyids	217
References	179	Paromomyids	217
		Palaechthonids	218
9. Primate Adaptations	181	Picrodontids	218
Effects of Size	181	Plesiadapids	219
Size and Diet	182	Carpolestids	220
Size and Locomotion	184	Saxonellids	220
Size and Life History	186	Adaptive Radiation of Plesiadapiforms	220
Size and Ecology	186	Plesiadapiforms and Primates	221
		Primates Among the Archonta	224
		The Adaptive Origin of Primates	224
		References	225

12. Fossil Prosimians	229	14. Fossil Platyrrhines	291
The First Modern Primates	230	The Platyrrhine Fossil Record	291
Adapoids	232	The Earliest Platyrrhines	291
Notharctids	235	The Patagonian Platyrrhines	293
Cercamoniids	237	A More Modern Community	298
Asiadapids	237	Late Miocene Amazonian Monkeys	301
Caenopithecids	238	Pleistocene Platyrrhines	301
Adapids	240	Caribbean Primates	302
Sivaladapids	242	Summary of Fossil Platyrrhines	304
Other Asian Adapoids	243	Platyrrhine Origins	304
Azibiids Djebellemurids, and <i>Plesiopithecus</i> :		References	307
North African Stem Strepsirrhines?	243		
Fossil Lorises and Galagos	244	15. Primitive Catarrhines and Fossil Apes	311
Adapoids and Strepsirrhines?	246	Miocene Epoch	311
Omomyoids	247	Middle-Late Oligocene Primitive	
Teilhardina and Baataromomys	249	Catarrhines from Arabia and Africa	313
Omomyids	250	Early and Middle Miocene 'Apes' from Africa	313
Anaptomorphines	251	Proconsulids	316
Omomyines	251	Later Miocene Hominoids	320
Microchoerids	253	Phyletic Relationships of Proconsuloids and	
Asian Omomyoids	255	Other African Miocene Apes	321
African Omomyoids?	255	Eurasian Pliopithecoids and Apes	322
Tarsiids	255	Pliopithecoids	322
Omomyoids, Tarsiers, and Haplorhines	256	Hominidae	326
Adaptive Radiations and Biogeography		Phylogenetic Relationships of Western	
of Fossil Prosimians	257	Eurasian Apes	333
Origin and Early Evolution of Primates	259	Phyletic Relationships of Asian Apes	336
References	260	The Evolution of Living Hominoids	337
13. Early Anthropoids	265	Evolution Of Gibbons	337
The Oligocene	265	Evolution of the Orangutan	338
Early Anthropoids from Africa and Arabia	265	Evolution of African Apes	338
Parapithecoids	266	The Biogeography of Ape Evolution	338
Proteopithecids	273	References	339
Propliopithecids	273		
Oligopithecids	276	16. Fossil Old World Monkeys	345
Phyletic Relationships	278	Victoriapithecids: The Earliest Old	
Nosmips	278	World Monkeys	345
Afrotarsius	279	Fossil Cercopithecids	348
Altatlasius	279	Fossil Cercopithecines	349
Eocene Anthropoids from Asia	279	Fossil Colobines	353
Eosimiids	279	Eurasian Colobines	355
Amphipithecids	281	Fossil Record of Cercopithecoids	356
Phylogenetic Relationships of		References	358
Amphipithecidae	283		
Early Anthropoid Adaptations	283	17. Fossil Hominins, the Bipedal	
Phyletic Relationships of Early		Primates	361
Anthropoids	284	Pliocene Epoch	361
Prosimian Origins of Anthropoids	284	<i>Sahelanthropus</i>	361
Tarsier Origins	284	<i>Orrorin</i>	362
Omomyoid Origins	285	<i>Ardipithecus</i>	362
Adapoid Origins	285	<i>Australopithecus</i>	364
References	286	<i>Paranthropus</i>	369

Early Hominin Adaptations and Hominin Orgins	371	Locomotor Diversity	397
Dental and Cranial Adaptations	371	Adaptation and Phylogeny	397
Postcranial Adaptations	371	Patterns in Primate Phylogeny	398
Tool Use in Early Hominins	371	Primate Evolution at the Species Level	400
Evolution of Bipedalism	373	Mosaic Evolution	403
Phyletic Relationships of Early Hominins	376	Primate Extinctions	404
Pleistocene Epoch	376	Climatic Changes	404
Early <i>Homo</i>	377	Competition	406
<i>Homo erectus</i>	379	Predation	406
Adaptations of <i>Homo erectus</i>	380	Limiting Primate Extinctions	406
<i>Homo floresiensis</i>	382	References	407
<i>Homo heidelbergensis</i>	382		
<i>Homo neanderthalensis</i>	383		
Denisova Hominins	384	Glossary	411
<i>Homo sapiens</i>	386	Classification of the Order Primates	415
<i>Homo sapiens</i> as an Adaptive Radiation	387	Bibliography	421
Human Phylogeny	387	Index	435
Hominin Evolution in Perspective	388
