# Microbes for Legume Improvement

Second Edition

 Springer

---

# Contents

<b>1</b>	<b>Current Status of the Taxonomy of Bacteria Able to Establish Nitrogen-Fixing Legume Symbiosis . . . . .</b>	<b>1</b>
	Encarna Velázquez, Paula García-Fraile, Martha-Helena Ramírez-Bahena, Raúl Rivas, and Eustoquio Martínez-Molina	
<b>2</b>	<b>Recent Advances in the Active Biomolecules Involved in Rhizobia-Legume Symbiosis . . . . .</b>	<b>45</b>
	Esther Menéndez, Pilar Martínez-Hidalgo, Luis R. Silva, Encarna Velázquez, Pedro F. Mateos, and Alvaro Peix	
<b>3</b>	<b>Flavonoids and Nod Factors: Importance in Legume-Microbe Interactions and Legume Improvement . . . . .</b>	<b>75</b>
	Anna Skorupska, Dominika Kidaj, and Jerzy Wielbo	
<b>4</b>	<b>Role of Ethylene and Bacterial ACC-Deaminase in Nodulation of Legumes . . . . .</b>	<b>95</b>
	Azeem Khalid, Zulfiqar Ahmad, Shahid Mahmood, Tariq Mahmood, and Muhammad Imran	
<b>5</b>	<b>Rhizobial Exopolysaccharides: A Novel Biopolymer for Legume-Rhizobia Symbiosis and Environmental Monitoring . . . . .</b>	<b>119</b>
	Rabindranath Bhattacharyya, Sandip Das, Raktim Bhattacharya, Madhurima Chatterjee, and Abhijit Dey	
<b>6</b>	<b>Rhizobial Diversity for Tropical Pulses and Forage and Tree Legumes in Brazil . . . . .</b>	<b>135</b>
	Mario Andrade Lira Junior, Giselle Gomes Monteiro Fracetto, Ademir Sérgio Ferreira Araújo, Felipe José Cury Fracetto, Rafaela Simão Abrahão Nóbrega, Krisle Silva, and Adeneide Candido Galdino	
<b>7</b>	<b>Potential of Rhizobia as Plant Growth-Promoting Rhizobacteria . . .</b>	<b>153</b>
	Luciano Kayser Vargas, Camila Gazolla Volpiano, Bruno Brito Lisboa, Adriana Giongo, Anelise Beneduzi, and Luciane Maria Pereira Passaglia	

<b>8</b>	<b>Role of Phosphate-Solubilizing Bacteria in Legume Improvement. . . . .</b>	<b>175</b>
	Almas Zaidi, Mohammad Saghir Khan, Asfa Rizvi, Saima Saif, Bilal Ahmad, and Mohd. Shahid	
<b>9</b>	<b>Mycorrhizosphere Interactions to Improve a Sustainable Production of Legumes . . . . .</b>	<b>199</b>
	José-Miguel Barea, Rosario Azcón, and Concepción Azcón-Aguilar	
<b>10</b>	<b>Legume Response to Arbuscular Mycorrhizal Fungi Inoculation in Sustainable Agriculture . . . . .</b>	<b>227</b>
	Diriba Muleta	
<b>11</b>	<b>Inoculation Effects of Associative Plant Growth-Promoting Rhizobacteria on the Performance of Legumes . . . . .</b>	<b>261</b>
	Mohd. Saghir Khan, Almas Zaidi, Asfa Rizvi, and Saima Saif	
<b>12</b>	<b>Perspectives of Using Endophytic Microbes for Legume Improvement. . . . .</b>	<b>277</b>
	Muhammad Naveed, Muhammad Zahir Aziz, and Muhammad Yaseen	
<b>13</b>	<b>Legume-Microbe Interactions Under Stressed Environments . . . . .</b>	<b>301</b>
	Hamdi H. Zahran	
<b>14</b>	<b>Rhizobial Amelioration of Drought Stress in Legumes . . . . .</b>	<b>341</b>
	Muhammad Naveed, M. Baqir Hussain, Ijaz Mehboob, and Zahir Ahmad Zahir	
<b>15</b>	<b>Metal-Legume-Microbe Interactions: Toxicity and Remediation. . . . .</b>	<b>367</b>
	Saima Saif, Almas Zaidi, Mohd. Saghir Khan, and Asfa Rizvi	
<b>16</b>	<b>Nonsymbiotic and Symbiotic Bacteria Efficiency for Legume Growth Under Different Stress Conditions . . . . .</b>	<b>387</b>
	Metin Turan, Nurgül Kitir, Erdal Elkoca, Deniz Uras, Ceren Ünek, Emrah Nikerel, Bahar Soğutalmaz Özdemir, Leyla Tarhan, Ahmet Eşitken, Ertan Yildirim, Negar Ebrahim Pour Mokhtari, Şefik Tüfenkçi, M. Rüştü Karaman, and Adem Güneş	
	<b>Index. . . . .</b>	<b>405</b>
