

**DDT IN INDOOR RESIDUAL  
SPRAYING: HUMAN HEALTH  
ASPECTS**

**World Health  
Organization**

# CONTENTS

ACRONYMS AND ABBREVIATIONS	vii
INTRODUCTION	1
<b>PART A—REPORT OF WHO EXPERT CONSULTATION ON DDT RISK CHARACTERIZATION</b>	<b>3</b>
<hr/>	
1. INTRODUCTION	4
2. CONSENSUS STATEMENT	5
2.1 Data considerations	5
2.2 Evaluation of studies post-dating the hazard assessment	5
2.2.1 Testicular cancer	6
2.2.2 Diabetes	6
2.3 Risk characterization	7
2.3.1 Exposures for use in risk characterization	7
2.3.2 Uncertainty factors	8
2.3.3 Conclusions on human health risks	9
2.3.3.1 Acute poisoning	9
2.3.3.2 Carcinogenicity	9
2.3.3.3 Developmental effects	11
2.3.3.4 Reproductive effects: males	13
2.3.3.5 Reproductive effects: females	15
2.3.4 Overall conclusions of the risk characterization	16
<b>PART B—HAZARD AND EXPOSURE ASSESSMENTS</b>	<b>19</b>
<hr/>	
1. SUMMARY AND CONCLUSIONS	20
1.1 Introduction	20
1.2 Hazard identification	20
1.3 Hazard characterization	24
1.4 Exposure assessment	25

2.	CHEMICAL IDENTITY	31
3.	EXPOSURE SOURCES AND METRICS	33
3.1	Sources of exposure	33
3.2	Metrics of exposure	34
4.	KINETICS AND METABOLISM	39
5.	HEPATIC EFFECTS AND ENZYME INDUCTION	44
5.1	Laboratory animals and in vitro systems	44
5.2	Humans	46
6.	NEUROTOXICITY	49
6.1	Laboratory animals and in vitro systems	49
6.2	Humans	50
7.	IMMUNOTOXICITY	52
7.1	Laboratory animals and in vitro systems	52
7.2	Humans	52
8.	CARCINOGENICITY	54
8.1	Laboratory animals	54
8.1.1	Mice	54
8.1.2	Rats	61
8.1.3	Other laboratory animals	63
8.1.4	Conclusions for laboratory animals	64
8.2	Humans	64
8.2.1	Ecological and cohort studies	64
8.2.2	Case-control and nested case-control studies	70
8.2.2.1	Breast cancer	70
8.2.2.2	Testicular cancer	74
8.2.2.3	Liver cancer	75
8.2.2.4	Lymphocytic cancers	77
8.2.2.5	Lung cancer	80
8.2.2.6	Pancreatic cancer	80
8.2.2.7	Other cancers	81
8.3	Mode of action	82

9. GENOTOXICITY	86
9.1 Summary of past studies	86
9.2 Recent studies	86
9.2.1 Laboratory animals and in vitro systems	86
9.2.2 Humans	86
10. ENDOCRINOLOGICAL AND REPRODUCTIVE EFFECTS	89
10.1 Diabetes mellitus	89
10.2 Thyroid effects	91
10.2.1 In vitro	91
10.2.2 Laboratory animals	91
10.2.3 Humans	92
10.3 Reproductive and developmental toxicity	95
10.3.1 In vitro	95
10.3.2 Laboratory animals	96
10.3.2.1 Multigeneration studies	96
10.3.2.2 Effects on fertility in males	98
10.3.2.3 Effects on fertility in females	100
10.3.2.4 Developmental toxicity	101
10.3.2.5 Reproductive endocrine effects	105
10.3.3 Humans	110
10.3.3.1 Male reproductive functions and hormone levels	110
10.3.3.2 Female reproductive functions	118
10.3.3.3 Developmental effects	125
11. HAZARD CHARACTERIZATION	144
11.1 Summary of hazard identification for use in hazard characterization	144
11.2 Dose-response assessment	147
11.2.1 Methods used for dose-response assessment	147
11.2.2 Non-cancer effects	151
11.2.2.1 Experimental animal studies	160
11.2.2.2 Human studies	162
11.2.3 Carcinogenicity	165
11.2.3.1 Experimental animal studies	165
11.2.3.2 Human studies	171

<b>12. EXPOSURE ASSESSMENT</b>	<b>172</b>
12.1 Introduction	172
12.2 DDT application by spray operators	173
12.3 Generic model for occupational and residential exposure	175
12.4 Occupational exposure	177
12.4.1 Adipose tissue	177
12.4.2 Blood	178
12.5 Residents in sprayed areas	188
12.5.1 Known residents of sprayed houses	188
12.5.2 General population living in areas using indoor residual spraying	194
12.6 Summary of adult occupational and residential exposure	210
12.7 Breast milk	214
12.7.1 Known residents of sprayed houses	215
12.7.2 General population living in areas using indoor residual spraying	220
12.8 Summary of infant exposure	229
12.9 Uncertainties	231
