

Written by one of the world's leading political geographers, this fully revised and updated textbook examines the dramatic changes wrought by ideological, economic, sociocultural, and demographic changes unleashed since the end of the Cold War. Saul Cohen considers these forces in the context of their human and physical settings and explores their geographical influence on foreign policy and international relations.

Presenting a global spatial scope, *Geopolitics* considers the entire hierarchy of geopolitical units—subnational, national states, and quasi states; geopolitical regions; and geostrategic realms. By emphasizing the interaction between geographical settings and changing ideological and economic forces, Cohen has succeeded in creating a new global geopolitical map.

SAUL BERNARD COHEN is University Professor of Geography emeritus at Hunter College, City University of New York, and past director of the Clark University Graduate School of Geography.
