Intelligent Distributed Computing XIII

Contents

Internet of Things, Cloud Computing and Big Data	
Using Blockchain for Reputation-Based Cooperation in Federated IoT Domains	3
Giancarlo Fortino, Fabrizio Messina, Domenico Rosaci, and Giuseppe M. L. Sarné	
Design of Fail-Safe Quadrocopter Configuration	13
Oleg V. Baranov, Nikolay V. Smirnov, Tatiana E. Smirnova, and Yefim V. Zholobov	
CAAVI-RICS Model for Analyzing the Security of Fog Computing Systems	23
Saša Pešić, Miloš Radovanović, Mirjana Ivanović, Costin Badica, Milenko Tošić, Ognjen Iković, and Dragan Bošković	
Conceptual Model of Digital Platform for Enterprises of Industry 5.0	35
Vladimir Gorodetsky, Vladimir Larukchin, and Petr Skobelev	
Conceptual Data Modeling Using Aggregates to Ensure Large-Scale Distributed Data Management Systems Security	41
Maria A. Poltavtseva and Maxim O. Kalinin	
Smart Topic Sharing in IoT Platform Based on a Social Inspired Broker	48
Vincenza Carchiolo, Alessandro Longheu, Michele Malgeri, and Giuseppe Mangioni	
Easy Development of Software for IoT Systems	56
Ichiro Satoh	

Data Analysis, Mining and Machine Learning

Privacy-Preserving LDA Classification over Horizontally Distributed Data	65
Fatemeh Khodaparast, Mina Sheikhalishahi, Hassan Haghighi, and Fabio Martinelli	
Improving Parallel Data Mining for Different Data Distributions in IoT Systems	75
Ivan Kholod, Andrey Shorov, and Sergei Gorlatch	
An Experiment on Automated Requirements Mapping Using Deep Learning Methods	86
Felix Petcuşin, Liana Stănescu, and Costin Bădică	
Using the Doc2Vec Algorithm to Detect Semantically Similar Jira Issues in the Process of Resolving Customer Requests	96
Artem Kovalev, Nikita Voinov, and Igor Nikiforov	
evoRF: An Evolutionary Approach to Random Forests	102
Diogo Ramos, Davide Carneiro, and Paulo Novais	
The Method of Fuzzy Logic and Data Mining for Monitoring Troposphere Parameters Using Ground-Based Radiometric Complex	108
S. I. Ivanov and G. N. Ilin	
Multi-agent and Service-Based Distributed Systems	
Actor-Network Approach to Self-organisation in Global Logistics Networks	117
Yury Iskanderov and Mikhail Pautov	
Multi-agent System for Simulation of Response to Supply Chain Disruptions	128
Jing Tan, Rongjun Xu, Kai Chen, Lars Braubach, Kai Jander, and Alexander Pokahr	
Data Warehouse Design for Security Applications Using Distributed Ontology-Based Knowledge Representation	140
Maria A. Butakova, Andrey V. Chernov, Ilias K. Savvas, and Georgia Garani	
Distributed Algorithms and Optimization	
Exploring the Space of Block Structured Scheduling Processes Using Constraint Logic Programming	149
Amelia Bădică, Costin Bădică, Mirjana Ivanović, and Doina Logofătu	

Global and Private Job-Flow Scheduling Optimization in Grid Virtual Organizations	160
Victor Toporkov, Anna Toporkova, and Dmitry Yemelyanov	
Type-Based Genetic Algorithms	170
Roman Sizov and Dan A. Simovici	
Distributed Construction of a Level Class Description in the Framework of Logic-Predicate Approach to AI Problems	177
Tatiana M. Kosovskaya	
On Approaches for Solving Nonlinear Optimal Control Problems	183
Alina V. Boiko and Nikolay V. Smirnov	
Modeling Operational Processes for Intelligent Distributed Computing	
Hierarchical Simulation of Onboard Networks	191
Valentin Olenev, Irina Lavrovskaya, Ilya Korobkov, Nikolay Sinyov, and Yuriy Sheynin	
Strategies Comparison in Link Building Problem	197
Vincenza Carchiolo, Marco Grassia, Alessandro Longheu, Michele Malgeri, and Giuseppe Mangioni	
Research of the Possibility of Hidden Embedding of a Digital Watermark Using Practical Methods of Channel Steganography	203
Pavel I. Sharikov, Andrey V. Krasov, Artem M. Gelfand, and Nikita A. Kosov	
A Highly Scalable Index Structure for Multicore In-Memory Database Systems	210
Hitoshi Mitake, Hiroshi Yamada, and Tatsuo Nakajima	
Applying the Split-Join Queuing System Model to Estimating the Efficiency of Detecting Contamination Content Process in Multimedia Objects Streams	218
Vladimir Lokhvickii, Yuri Ryzhikov, and Andry Dudkin	
On the Applicability of the Modernized Method of Latent-Semantic Analysis to Identify Negative Content in Multimedia Objects	224
Sergey Krasnov, Vladimir Lokhvickii, and Andry Dudkin	

**Advanced Methods for Social Network Analysis
and Inappropriate Content Counteraction**

Digital Subjects as New Power Actors: A Critical View on Political, Media-, and Digital Spaces Intersection	233
Dmitry Gavra, Vladislav Dekalov, and Ksenia Naumenko	
An Approach to Creating an Intelligent System for Detecting and Countering Inappropriate Information on the Internet	244
Lidiya Vitkova, Igor Saenko, and Olga Tushkanova	
A Note on Analysing the Attacker Aims Behind DDoS Attacks	255
Abhishta Abhishta, Marianne Junger, Reinoud Joosten, and Lambert J. M. Nieuwenhuis	
Formation of the System of Signs of Potentially Harmful Multimedia Objects	266
Sergey Pilkevich and Konstantin Gnidko	
Soft Estimates for Social Engineering Attack Propagation Probabilities Depending on Interaction Rates Among Instagram Users	272
Anastasiia O. Khlobystova, Maxim V. Abramov, and Alexander L. Tulupyev	
Development of the Complex Algorithm for Web Pages Classification to Detection Inappropriate Information on the Internet	278
Diana Gaifulina and Andrey Chechulin	
Approach to Identification and Analysis of Information Sources in Social Networks	285
Lidia Vitkova and Maxim Kolomeets	
The Architecture of Subsystem for Eliminating an Uncertainty in Assessment of Information Objects' Semantic Content Based on the Methods of Incomplete, Inconsistent and Fuzzy Knowledge Processing	294
Igor Parashchuk and Elena Doynikova	
The Common Approach to Determination of the Destructive Information Impacts and Negative Personal Tendencies of Young Generation Using the Neural Network Methods for the Internet Content Processing	302
Alexander Branitskiy, Elena Doynikova, Igor Kotenko, Natalia Krasilnikova, Dmitriy Levshun, Artem Tishkov, and Nina Vanchakova	

Intelligent Distributed Computing for Cyber-Physical Security and Safety

Authorize-then-Authenticate: Supporting Authorization Decisions Prior to Authentication in an Electronic Identity Infrastructure 313
Diana Berbecaru, Antonio Lioy, and Cesare Cameroni

Modeling and Evaluation of Battery Depletion Attacks on Unmanned Aerial Vehicles in Crisis Management Systems 323
Vasily Desnitsky, Nikolay Rudavin, and Igor Kotenko

The Integrated Model of Secure Cyber-Physical Systems for Their Design and Verification 333
Dmitry Levshun, Igor Kotenko, and Andrey Chechulin

Scalable Data Processing Approach and Anomaly Detection Method for User and Entity Behavior Analytics Platform 344
Alexey Lukashin, Mikhail Popov, Anatoliy Bolshakov, and Yuri Nikolashin

Approach to Detection of Denial-of-Sleep Attacks in Wireless Sensor Networks on the Base of Machine Learning 350
Anastasia Balueva, Vasily Desnitsky, and Igor Ushakov

Model of Smart Manufacturing System 356
Maria Usova, Sergey Chuprov, Ilya Viksnin, Ruslan Gataullin, Antonina Komarova, and Andrey Iuganson

Intelligent Distributed Decision Support Systems

Technology Resolution Criterion of Uncertainty in Intelligent Distributed Decision Support Systems 365
Alexsander N. Pavlov, Dmitry A. Pavlov, and Valerii V. Zakharov

Satellite Constellation Control Based on Inter-Satellite Information Interaction 374
Oleg Karsaev and Evgeniy Minakov

Load Balancing Cloud Computing with Web-Interface Using Multi-channel Queuing Systems with Warming up and Cooling 385
Maad M. Khalill, Anatoly D. Khomonenko, and Sergey I. Gindin

Application of Cyber-Physical System and Real-Time Control Construction Algorithm in Supply Chain Management Problem 394
Inna Trofimova, Boris Sokolov, Dmitry Nazarov, Semyon Potryasaev, Andrey Musaev, and Vladimir Kalinin

Method for Design of ‘smart’ Spacecraft Onboard Decision Making in Case of Limited Onboard Resources 404
Andrey Tyugashev and Sergei Orlov

Intelligent Technologies and Systems for Spatial Industrial Strategic Planning	414
Elena Serova	
Conceptual and Formal Models of Information Technologies Use for Decisions Support in Technological Systems	423
Alexander S. Geyda	
Role and Future of Standards in Development of Intelligent and Dependable Control Software in Russian Space Industry	430
Andrey Tyugashev, Alexander Kovalev, and Vjacheslav Pjatkov	
Improved Particle Swarm Medical Image Segmentation Algorithm for Decision Making	437
Samer El-Khatib, Yuri Skobtsov, and Sergey Rodzin	
Collecting and Processing Distributed Data for Decision Support in Social Ecology	443
Dmitry Verzilin, Tatyana Maximova, and Irina Sokolova	
Evaluation of the Dynamics of Phytomass in the Tundra Zone Using a Fuzzy-Opportunity Approach	449
V. V. Mikhailov, Alexandr V. Spesivtsev, and Andrey Yu. Perevaryukha	
Intelligent Human-Machine Interfaces	
Lower Limbs Exoskeleton Control System Based on Intelligent Human-Machine Interface	457
Ildar Kagiroy, Alexey Karpov, Irina Kipyatkova, Konstantin Klyuzhev, Alexander Kudryavcev, Igor Kudryavcev, and Dmitry Ryumin	
Central Audio-Library of the University of Novi Sad	467
Vlado Delić, Dragiša Mišković, Branislav Popović, Milan Sečujski, Siniša Suzić, Tijana Delić, and Nikša Jakovljević	
Applying Ensemble Learning Techniques and Neural Networks to Deceptive and Truthful Information Detection Task in the Flow of Speech	477
Alena Velichko, Viktor Budkov, Ildar Kagiroy, and Alexey Karpov	
Security for Intelligent Distributed Computing - Machine Learning vs. Chains of Trust	
Model Checking to Detect the Hummingbad Malware	485
Fabio Martinelli, Francesco Mercaldo, Vittoria Nardone, Antonella Santone, and Gigliola Vaglini	

**ECU-Secure: Characteristic Functions for In-Vehicle
Intrusion Detection** 495
Yannick Chevalier, Roland Rieke, Florian Fenzl, Andrey Chechulin,
and Igor Kotenko

**Experimenting with Machine Learning in Automated
Intrusion Response** 505
Andre Lopes and Andrew Hutchison

**Method of Several Information Spaces for Identification
of Anomalies** 515
Alexander Grusho, Nick Grusho, and Elena Timonina

**Gateway for Industrial Cyber-Physical Systems
with Hardware-Based Trust Anchors** 521
Diethelm Bienhaus, Lukas Jäger, Roland Rieke, and Christoph Krauß

Visual Analytics in Distributed Environment

**The Architecture of the System for Monitoring the Status
in Patients with Parkinson’s Disease Using Mobile Technologies** 531
Shichkina Yulia, Kataeva Galina, Irishina Yulia, and Stanevich Elizaveta

Approach to Association and Classification Rules Visualization 541
Yana Bekeneva, Vladimir Mochalov, and Andrey Shorov

**The Visualization-Driven Approach to the Analysis
of the HVAC Data** 547
Evgenia Novikova, Mikhail Bestuzhev, and Andrey Shorov
