

# **Genome-Scale Quantitative Biology of *Arabidopsis thaliana***

Dissertation

zur

Erlangung der naturwissenschaftlichen Doktorwürde  
(Dr. sc. nat.)

vorgelegt der

Mathematisch-naturwissenschaftlichen Fakultät

der

Universität Zürich

von

**Marc William Schmid**

von

Muttenz BL und Schaffhausen SH

Promotionskomitee

Prof. Dr. Ueli Grossniklaus (Vorsitz und Leitung der Dissertation)

Dr. Jörg Becker

Prof. Dr. Mark Robinson

Zürich, 2015

Contents

1 Prologue 1

2 The female gametophyte: An emerging model for cell type-specific systems biology in plant development 3

3 Polarized distribution of mRNA in the syncytial female gametophyte of *Arabidopsis thaliana* precedes cellularization and cell specification 39

4 A Powerful Method for Transcriptional Profiling of Specific Cell Types in Eukaryotes: Laser-Assisted Microdissection and RNA Sequencing 105

5 Rcount: simple and flexible RNA-Seq read counting 119

6 HiCdat: a fast and easy-to-use Hi-C data analysis tool 122

7 Epilogue 148

8 Appendix: Further contributions 149

8.1 Characterization of chromosomal architecture in *Arabidopsis* by chromosome conformation capture . . . . . 149

8.2 Hi-C Analysis in *Arabidopsis* Identifies the *KNOT*, a Structure with Similarities to the *flamenco* Locus of *Drosophila* . . . . . 169

8.3 Apomictic and Sexual Germline Development Differ with Respect to Cell Cycle, Transcriptional, Hormonal and Epigenetic Regulation . . . . . 186

8.4 Selection-driven evolution of sex-biased genes is consistent with sexual selection in *Arabidopsis thaliana* . . . . . 208

8.5 Analysis of plant germline development by high-throughput RNA profiling: technical advances and new insights . . . . . 219

8.6 Cell-specific expression profiling of rare cell types as exemplified by its impact on our understanding of female gametophyte development . . . . . 232

- 8.7 Plant germline formation: molecular insights define common concepts and illustrate developmental flexibility in apomictic and sexual reproduction . . 242
