<i>About the Authors</i>	xi
<i>Foundational Principles of Population Health Science</i>	xiii
1. An Introduction to Population Health Science	i
2. Conceptualizing and Evaluating Causes for Population Health Science	13
3. The Causes of Cases Versus Causes of Incidence	25
4. Population Health Across Levels, Systems, and the Life Course	45
5. Ubiquity and the Macrosocial Determinants of Population Health	67
6. Causal Architecture to Understand What Matters Most: Theory	85
7. Causal Architecture and What Matters Most: Quantitative Examples	99
8. Valuing Population Health Interventions: Measuring Return on Investment	111
9. Equity and Efficiency in Population Health Science	129
10. Prediction in Population Health Science	141

11. Case Study: Can We Reduce Obesity by Encouraging People to Eat Healthy Food?	157
12. Case Study: Simulating the Impact of High-Risk and Population Intervention Strategies for the Prevention of Disease	171
13. Tensions in Population Health Science	191
