## Figures

4.1	Plotted predicted probabilities of institutional effects on territorial representation	58
4.2	Plotted predicted probabilities of institutional effects on the focus of representation	60
5.1	Pre- and post-election spheres taken into account	72
8.1	Eigenvalues of factors for candidates	126
8.2	Eigenvalues of factors for citizens	126
9.1	Salience of the issue areas included in the study	144
9.2	Average individual distance on salient vs. non-salient issues	144
9.3	Congruence of Swiss parties with their electorates based on two different measures of congruence	145
10.1	Distribution of respondents over degrees of incongruence	161

## Tables

3.1	Categories, names, and descriptions of three distinctions	36
3.2	Schematic conceptual space of three distinctions	38
4.1	Representational role orientations in 13 European democracies (in percentages)	55
4.2	Probit regression of institutional effects on territorial representation	57
4.3	The percentage changes of institutional effects on the focus of representation	59
5.1	Proximity matrix (congruence) between smartvote answer and legislative behaviour (dependent variable)	73
5.2	Number of MPs and roll call votes per party in the dataset	73
5.3	Value range and mean positional congruence per MP and party (grouped by party, percentages), ordered by decreasing mean value	74
5.4	Logit predictions for positional congruence between pre- and post-election sphere	78

viii *List of illustrations*

7.1	Number of EUP and EES respondents per country	105
7.2	Factors that underlie the issue positions of European voters	109
7.3	Average positions on issue dimensions within countries	111
7.4	Countries with positive or negative correlations between orthogonal issue dimensions at the EU-level	112
8.1	The 13 policy questions and the mean answers of citizens and candidates to them	125
8.2	Loadings of the items on the three factors retained in the case of candidates	127
8.3	Correlation between factors after rotation	128
8.4	Loadings of the items on the four factors retained in the case of citizens	128
8.5	Correlation between factors after rotation	129
9.1	Ranking of parties based on congruence with their supporters	146
9.2	National values compared	146
10.1	Mean incongruence for party electorates, in 2003 and 2009	162
10.2	Results of independent sample t-tests comparing incongruence for various groups and election years	163
A.1	Response rates of the partirep mp survey in 13 European democracies	194
A.2	The effect of district magnitude on the focus of representation (interaction models)	195
A.3	The effect of population size on the focus of representation (interaction models)	196
A.4	The effect of district magnitude and population size on the focus of representation (restricted models)	197
B.1	Description of the 34 smartvote statements / legislative votes (Chapter 5)	198
C.1	Description of the 28 EU Profiler 2009 statements (Chapter 7)	201
D.1	SELECTS questions / saliency categories (Chapter 9)	203
E.1	List of issue statements	204
