

A Guide to Qualitative Field Research

Third Edition

Carol A. Bailey

Virginia Tech

Los Angeles | London | New Delhi
Singapore | Washington DC | Melbourne

CONTENTS

List of Tables, Figures, and Photographs	xii
Preface	xv
Acknowledgments	xvii
About the Author	xix
Chapter 1 • Introduction to Qualitative Field Research	1
Objectives	1
Overview	2
Examples of Field Research	3
Major Features of Field Research	4
Ethics	6
Natural Setting	6
Purpose of Research	7
Research Questions	8
Theory and Review of Literature	8
Paradigms	9
Research Design	9
Data	10
Analysis	10
Results	11
Final Paper	11
Putting It All Together	11
Conclusions	12
Chapter Highlights	13
Exercises	14
Online and Recommended Reading	14
Chapter 2 • Ethics	17
Objectives	17
Informed Consent	18
Deception	23
Confidentiality	24

Relationships	27
Ethics in Virtual Field Research	28
Covert and Overt Research and Deception	28
Distinctions Between Public and Private	29
Legal Restrictions	29
Confidentiality and Anonymity	29
Informed Consent	30
Conclusions	31
Chapter Highlights	31
Exercises	32
Online and Recommended Reading	32
Chapter 3 • Topic, Purpose, and Research Questions	33
Objectives	33
Research Topic	34
Ethical Issues	36
Practicality	38
Insider/Outsider	39
Purpose of Research	41
Research Questions	42
What Are Research Questions?	44
What Is the Structure of a Research Question?	44
What Level of Abstraction Should Research Questions Be?	45
How Many Research Questions Should I Have?	45
Where Do Research Questions Belong in My Final Paper?	45
May I Change My Research Questions?	45
When in the Process Do I Write the Research Question?	46
Putting It All Together	46
Conclusions	47
Chapter Highlights	47
Exercises	47
Online and Recommended Reading	48
Chapter 4 • Theory and Review of Literature	49
Objectives	49
Concepts	50
Theory	51
Uses of Theory	52
Pictorial Representation of Theory	52
Review of Literature	53
What Sources Should I Use?	54
How Do I Find Articles?	54

What Is the Most Important Thing Related to a Review of Literature?	54
What Should Be in a Review?	55
What Is a Common Mistake Made When Writing a Review?	56
When Do I Start Reading the Literature and When Do I Use It?	57
Are Diagrams, Figures, and Charts Helpful for Presenting a Review of Literature?	57
Putting It All Together	57
Conclusions	58
Chapter Highlights	59
Exercises	59
Online and Recommended Reading	60
 Chapter 5 • Paradigms, Research Design, and Introduction to Methodology	 61
Objectives	61
Proposal	62
Paradigms	63
Post-Positivist Paradigm	65
Interpretive Paradigm	66
Critical Paradigm	67
Research Design	69
Methodology	70
Conclusions	70
Chapter Highlights	71
Exercises	71
Online and Recommended Reading	71
 Chapter 6 • From Gaining Entrée to Exiting the Field	 73
Objectives	73
Gaining Entrée and Gatekeepers	74
Preparations	78
Arrival in the Field	79
Key Actors	80
Field Relationships	81
Time in the Field	84
Leaving the Field	85
Conclusions	86
Chapter Highlights	86
Exercises	87
Online and Recommended Reading	88

Chapter 7 • Observations	89
Objectives	89
Should I Conduct Covert or Overt Observations?	90
Should I Only Observe or Participate Fully When Observing?	91
Where Should I Observe?	92
Should My Observations Be Structured or Unstructured?	94
Structured and Semi-Structured Observations	94
Unstructured Observations	94
What Should I Observe?	95
Observations of the Setting	96
Observations of People	97
Observations of Activities in the Setting	98
Research Questions	99
Unit of Analysis	100
Ethics	101
Conclusions	101
Chapter Highlights	102
Exercises	102
Online and Recommended Reading	103
 Chapter 8 • Interviews	 105
Objectives	105
Types of Interviews	106
Unstructured Interviews	106
Structured Interviews	106
Semi-Structured Interviews	107
Focus Groups	107
Selecting the Appropriate Type of Interview	108
Question Construction	109
Interview Questions and Research Questions	110
Location of the Interview	112
Rapport	113
Ethics	114
Status Characteristics	115
Alternatives to Face-to-Face Interviews	116
After the Interview	118
Sampling	119
Conclusions	121
Chapter Highlights	122
Exercises	122
Online and Recommended Reading	123

Chapter 9 • Field Notes	125
Objectives	125
Purposes of Field Notes	125
Taking Field Notes	127
Field Note Content	132
Detailed Descriptions	132
<i>Things Previously Forgotten</i>	134
Analytic Ideas and Inferences	135
Memos	135
Personal Feelings	135
Things to Think About and Do	136
Reflexive Thoughts	136
Putting It All Together	137
Conclusions	140
Chapter Highlights	140
Exercises	141
Online and Recommend Reading	142
Chapter 10 • Procedures for Increasing Validity and Trustworthiness	143
Objectives	143
Validity and Trustworthiness	144
Internal Validity and Credibility	144
Reliability and Dependability	146
Generalizability and Transferability	146
Objectivity, Value Neutrality, and Confirmability	148
Summary	148
Strategies for Enhancing Validity and Trustworthiness	148
Member Checks	149
Audit Trail	152
Peer Debriefing and Expert Reviews	152
Triangulation	152
Mixed Methods	154
Conclusions	154
Chapter Highlights	156
Exercises	156
Online and Recommended Reading	157
Chapter 11 • Introduction to Analysis and Coding	159
Objectives	159
Analysis	159
Coding	161
Open Coding	162
Focused Coding	164

Practical Aspects of Coding	166
Coding and Grounded Theory	167
Computer-Assisted Qualitative Data Analysis Software	168
Putting It All Together	169
Conclusions	171
Chapter Highlights	171
Exercises	172
Online and Recommended Reading	173
Chapter 12 • Descriptions and Typologies	175
Objectives	175
Descriptions	175
Thick Descriptions	177
Ethics	179
Typologies	180
Conclusions	184
Chapter Highlights	184
Exercises	185
Online and Recommended Reading	185
Chapter 13 • Thematic Analysis	187
Objectives	187
Purposes of a Thematic Analysis	187
What Are Themes?	188
Identifying Versus Emerging Themes	189
Overarching Themes	190
How Do I Identify an Overarching Theme?	191
Should I Have Preconceived Overarching Themes?	192
How Many Overarching Themes Should I Have?	192
How Should I Present My Overarching Themes in My Final Paper?	193
Topical Themes	193
How Do I Code for Topical Themes	194
How Many Instances Are Needed to Be a Theme?	197
Should I Have Preconceived Topical Themes?	197
How Do I Present My Themes in the Final Paper?	198
Interpretation	199
Conclusions	200
Chapter Highlights	201
Exercises	201
Online and Recommended Reading	202

Chapter 14 • Research Stories and Critical Events and Cases	203
Objectives	203
Elements in a Research Story	204
Plot	205
Characters	206
Place	206
Time	207
Summaries and Scenes	207
Dialogue	208
Point of View	210
Themes	212
Theory and Concepts	213
Critical Events and Cases	214
Conclusions	216
Chapter Highlights	217
Exercises	217
Online and Recommend Reading	217
Chapter 15 • Writing and the Final Paper	219
Objectives	219
Writing Process	220
Writing Styles Used in Final Papers	221
Format of a Final Paper	222
Chapter Names	222
Introduction	222
Theory and Review of Literature	225
Methods	225
Results	226
Discussion and/or Interpretation	226
Conclusion	226
Putting It All Together	227
Conclusions	229
Chapter Highlights	230
Exercises	230
Online and Recommended Reading	231
References	233
Glossary	243
Index	247

LIST OF TABLES, FIGURES, AND PHOTOGRAPHS

List of Tables

Table 1.1	Major features of field research	5
Table 2.1	Requirements for an informed consent statement	19
Table 2.2	Template for an informed consent form	20
Table 2.3	Negative effects of engaging in deception	24
Table 3.1	From broad area of interest to fieldwork	34
Table 3.2	From activism to a research topic	36
Table 3.3	Examples of research topics	37
Table 3.4	General purpose statements	41
Table 3.5	Examples of specific purpose of research statements	42
Table 3.6	Examples of research questions	44
Table 4.1	Examples of theories, sensitizing concepts, and analytical lenses	51
Table 4.2	Google Scholar	55
Table 4.3	Organizing literature reviews thematically	57
Table 5.1	Parts of a research proposal	62
Table 5.2	Paradigmatic beliefs	64
Table 5.3	Brief description of a critical paradigm	69
Table 6.1	Examples of time in the field	85
Table 7.1	Researcher's role as observer and participant	91
Table 7.2	Wilson's semistructured observation guide	95
Table 7.3	Examples of characteristics to be observed	97
Table 8.1	Interview guide from Glass's dissertation on families with children with autism	111
Table 8.2	Interview guide from Darrow's dissertation on refugee resettlement policies	112
Table 8.3	Sampling procedures used by field researchers	120
Table 8.4	Number of interviews conducted during field research	121
Table 9.1	Suggested categories for field note content	132
Table 9.2	Example of Harrison's field notes with reflections	138
Table 10.1	Evaluative criteria for field research	145

Table 10.2	Forms of triangulation	153
Table 10.3	Questions researchers need to answer when using mixed methods	154
Table 10.4	Factors that contribute to validity and trustworthiness	155
Table 11.1	Line-by-line open coding	163
Table 11.2	Codes, categories, and subcategories	165
Table 11.3	Keeping track of codes, categories, and subcategories	167
Table 12.1	Creating a typology from 5 characteristics and 16 codes	182
Table 13.1	Purposes of a thematic analysis	188
Table 13.2	Examples of topical themes	195
Table 13.3	Example of confusing topics and codes with a theme	196
Table 14.1	Development of characters	206
Table 15.1	Examples of chapter names	223
Table 15.2	Example beginnings of final papers	224

List of Figures

Figure 4.1	Pictorial representation of a theory	53
Figure 6.1	Who you are and how you request entrée make a big difference in whether you will be given access.	83

Photographs

Photo 1.1	Each weekend, thousands of volunteers drive dogs that have been rescued to their forever homes in 1-hour legs. Research on the volunteers, the transport coordinators, and the rescue organizations would require the field researcher to go to multiple locations. (Photo by author)	7
Photo 3.1	Prior to and during my research about people who lived full time in their RVs and no longer had another home, I spent several months each year traveling in an RV with my husband and our dog Noell. Was I an insider or outsider? (Photo by William Snizek)	40
Photo 5.1	A researcher who holds a critical paradigm might study the devastation to a small community caused by people with economic and political power shutting down the local power plant with no concern about the people affected. (Photo by William Snizek)	68
Photos 7.1–7.3	Observations from different places and different distances tell a different story. (Photos by author)	93
Photo 8.1	Will you repeat that question? I am sorry that I have been so distracted. I am trying to find my wallet and worried because I do not see it. (Photo by author)	117

Photo 9.1	It is crucial that you expand your field notes shortly after taking them. (Photo by author)	129
Photo 10.1	A researcher studying day trading in stocks might find Rosecrance's (1990) research at race tracks provides insights into day traders.	147
Photo 10.2	Asking participants to respond to drafts can help improve the quality of your research. (Photo by author)	150
Photo 12.1	A good description does not give equal treatment to all that is occurring in a setting. Rather, it foregrounds who or what is most important.	176
Photo 12.2	A thick description is like a close-up photograph—details are seen that are not visible if the photo is taken from a distance.	177
Photo 13.1	You might have a theme when you see or hear the same or similar things multiple times.	194
Photo 14.1	A research story based on data from long-term engagement in an unfamiliar place is ideal for conveying the complexity of a setting.	205
Photo 14.2	In a study of carpooling, details about interpersonal conflict, social class, political activism, and policies related to distracted driving were brought to the fore by this critical event. (Photo by author)	215
Photo 15.1	Once upon a time, a field researcher met a unicorn. "Tell me, Mr. Unicorn, how do you feel about the intersection of postcolonial, discursive practices juxtaposed against the hermeneutic circle as articulated by Stevens in her liminal stage?" The unicorn paused a moment and said, "I don't!" and wandered away. The end. (Photo by Beth Mabry)	221
