Chapter 1 • Brief Introduction to Research in the Social, Behavioral, and Health Sciences	1
What Is the Purpose of Research?	1
How Is Research Done?	1
Scientific Method and Hypothesis Testing	2
Inductive Research	3
Deductive Research	4
Research Designs	5
Cross-Sectional Research Design	5
Longitudinal Research Design	5
<i>Repeated Cross-Sectional (Longitudinal) Research Design</i>	6
<i>Fixed Sample Panel (Longitudinal) Research Design</i>	6
<i>Cohort (Longitudinal) Research Design</i>	7
Terms	8
Reference	8
Chapter 2 • Variables and Measurement	9
Variables and Data	9
Variables and Hypotheses	9
Independent and Dependent Variables	10
Directional Relationships	11
Levels of Variable Measurement	12
Categorical Variables	12
<i>Nominal Variables</i>	12
<i>Dichotomous Variables</i>	13
<i>Ordinal Variables</i>	13
Quantitative (Interval/Ratio) Variables	14
The Zero-Point	15
Continuous and Discrete Quantitative Variables	15
<i>Transforming Variable Types</i>	16
Types of Relationships	17
Causal Relationships	17
Correlational Relationships	18

Research Design and Measurement Quality	18
Operationalization and Conceptualization	19
Internal and External Validity	19
<i>Internal Validity</i>	20
<i>External Validity</i>	23
Measurement Validity and Reliability	23
<i>Measurement Validity</i>	23
<i>Reliability</i>	24
<i>Testing for Reliability</i>	25
Conclusion	25
Terms	26
References	26

Chapter 3 • How to Sample and Collect Data for Analysis **27**

Why Use a Sample?	27
Probability Sampling Methods	27
Simple Random Sample	27
Systematic Random Sample	28
Systematic Random Sampling: Periodicity	28
Stratified Random Sample	29
<i>Proportionate Stratified Random Sample</i>	30
<i>Disproportionate Stratified Random Sample</i>	30
Cluster and Multistage Cluster Samples	30
Nonprobability Sampling Methods	31
Why Would Anyone Choose to Obtain a Nonprobability	
Sample Over a Probability Sample?	32
Convenience	32
Snowball	32
Respondent-Driven Sampling	33
Quota Sampling	34
Validating a Sample	34
Split Ballot Designs	35
How and Where Are Data Collected Today?	35
Terms	36
References	36

Chapter 4 • Data Frequencies and Distributions **37**

Univariate Frequencies and Relative Frequencies	37
Cumulative Percentages and Percentiles	40
Frequencies for Quantitative Data	42
Univariate Distributions	44

The Normal Distribution	45
Characteristics of the Normal Distribution	45
Normal Quantile-Quantile Plots	47
Non-Normal Distribution Characteristics	48
Bimodal and Multimodal Distributions	48
Skewness	48
Kurtosis	49
Data Transformations for Dealing With Non-Normal Distributions	50
Bivariate Frequencies	52
Conclusion	57
Terms	57

Chapter 5 • Using and Interpreting Univariate and Bivariate Visualizations **59**

Univariate Data Visualization	60
Bar Graphs	60
<i>Presentation and Interpretation Issues</i>	61
Pie Charts	61
<i>Presentation and Interpretation Issues</i>	64
Cumulative Frequency Polygons	66
<i>Presentation and Interpretation Issues</i>	67
Boxplots	67
<i>Presentation and Interpretation Issues</i>	69
Stem and Leaf Plots	70
<i>Presentation and Interpretation Issues</i>	71
Bivariate Data Visualization	72
Clustered Bar Graphs	73
<i>Presentation and Interpretation Issues</i>	74
Stacked Bar Graphs	75
<i>Presentation and Interpretation Issues</i>	77
Time Series Graphs	78
<i>Presentation and Interpretation Issues</i>	78
Scatterplots	79
<i>Presentation and Interpretation Issues</i>	82
Visual Presentation	83
Conclusion	83
Terms	84

Chapter 6 • Central Tendency and Variability **85**

Understanding How to Calculate and Interpret Measures of Central Tendency	85
---	----

What Is a Measure of Central Tendency?	85
Variables Measured at the Nominal Level	86
Variables Measured at the Ordinal Level	88
Variables Measured at the Interval or Ratio Level	88
Understanding How Individuals in a Distribution Vary Around a Central Tendency	92
Index of Qualitative Variation: Appropriateness, Calculation, Interpretation	92
Range: Appropriateness, Calculation, Interpretation	94
Interquartile Range: Appropriateness, Calculation, Interpretation	94
Variance: Appropriateness, Calculation, Interpretation	94
Standard Deviation: Appropriateness, Calculation, Interpretation	95
Answer to Chapter 6 Learning Check	96
Terms	96
Reference	96
Chapter 7 • What Are z Scores, and Why Are They Important?	97
What Is a z Score?	97
Why Are z Scores Important?	97
How to Calculate a z Score	98
How to Calculate a Raw Score From a z Score	99
The Standard Normal Table	100
Areas Under the Curve (Probabilities)	103
Working With the Standard Normal Distribution to Calculate z Scores, Raw Scores, and Percentiles	106
z Scores, Raw Scores	106
Percentiles	107
Confidence Intervals	107
Constructing a Confidence Interval	108
Standard Error	109
Calculating a Confidence Interval	109
Confidence Interval Width	110
Confidence Intervals for Proportions	110
Answer to Quick Learning Check	111
Terms	111
Chapter 8 • Hypothesis Testing and Statistical Significance	113
Null and Alternative Hypotheses	113
Determination About the Null Hypothesis	114
Statistical Significance	115
Type I and Type II Errors	115
Alpha	116

Test Statistic Distributions	117
Choosing a Test of Statistical Significance	118
The Chi-Square Test of Independence (χ^2)	119
Observed and Expected Frequencies	120
Chi-Square Test Statistic	121
Chi-Square Distribution and Degrees of Freedom	122
Chi-Square Table	122
Chi-Square Output and Interpretation	123
<i>Example 1: Gender and Family Stress</i>	123
<i>Example 2: Gender and Chore Stress</i>	125
<i>Example 3: Gender and Chore Stress by Age Group</i>	125
Chi-Square Overview	127
The Independent Samples <i>t</i> Test	127
Independent Samples <i>t</i> -Test Notation and Hypotheses	128
The Logic of the <i>t</i> -Test Statistic	129
One-Tailed and Two-Tailed <i>t</i> Tests	130
The <i>t</i> Distribution and Degrees of Freedom	131
The <i>t</i> Table	131
Independent Samples <i>t</i> -Test Output and Interpretation	132
<i>Example 1: Gender and Number of Friends (Nondirectional)</i>	132
<i>Example 2: Children and Friends (Directional)</i>	133
The <i>t</i> -Test Overview	135
One-Way Analysis of Variance	135
ANOVA Assumptions and Notation	135
ANOVA Hypotheses	136
ANOVA Test Statistic and Degrees of Freedom	136
ANOVA Table	139
ANOVA Output and Interpretation	141
<i>Example 1: Level of Education and Number of Close Friends</i>	141
<i>Example 2: Age Group and Number of Close Friends</i>	142
Post Hoc Analysis	144
ANOVA Overview	144
Conclusion	144
Terms	145

Chapter 9 • How to Measure the Relationship Between Nominal and Ordinal Variables	147
Choosing the Correct Measure of Association	147
Trying to Reduce Error (PRE Statistics)	147
Calculating and Interpreting Lambda	148
Calculating and Interpreting Gamma	149

In General	150
For This Specific Example	150
Calculating and Interpreting Somers' <i>d</i>	151
In General	151
For This Specific Example	151
Calculating and Interpreting Kendall's Tau- <i>b</i>	152
In General	152
For This Specific Example	153
Interpreting PRE Statistics Overview	153
Multivariate Analysis With PRE Statistics for Nominal and Ordinal Variables	154
Terms	155
References	156
Chapter 10 • Effect Size	157
Effect Size	158
Choosing an Effect Size	158
Effect Sizes for Chi-Square: ϕ and Cramér's <i>V</i>	159
Effect Size for <i>t</i> Test: Cohen's <i>d</i>	161
Effect Size for One-Way ANOVA: η^2	162
Conclusion	163
Terms	164
References	164
Chapter 11 • How to Interpret and Report Regression Results	165
What Is a Regression?	165
Correlation	166
Bivariate Regression	166
Coefficient of Determination (r^2)	168
Multiple Regression	170
Variables That Can Be Analyzed in Regression Analysis	170
Interaction Effects	172
Mediating and Moderating Effects	172
Logistic Regression	173
Preparing Variables for Logistic Regression Analysis	173
Creating a Set of Dummy Variables	173
Interpreting Odds Ratios	174
Step Models	175
Terms	175

Chapter 12 • Indices, Typologies, and Scales	177
Indices, Typologies, and Scales Defined and Explained	177
Indices	177
Typologies	178
Scales	178
Terms	179
References	180
 Appendix A • The Standard Normal Table	 181
Appendix B • Critical Values for t Statistic	189
Appendix C • Critical Values for Chi-Square	191
Appendix D • Critical Values for F Statistic	193
Appendix E • Glossary	199
About the Authors	213
