# Successful Decision-Making

A Systematic Approach  
to Complex Problems

Third Edition

Translated from German by Anthony Clark, Claire O'Dea  
and Maude Montani

 Springer

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
<b>Part I Decision Problems and Decision-Making Procedures</b>		
<b>2</b>	<b>Decision Problems</b>	<b>7</b>
2.1	Notion of Decision Problem	7
2.2	Types of Decision Problems	7
2.3	Ways to Solve Decision Problems	12
<b>3</b>	<b>Goal and Problem-Finding Systems as Requirements for the Discovery of Decision Problems</b>	<b>15</b>
3.1	The Functions of Goal and Problem-Finding Systems in the Discovery of Decision Problems	15
3.2	Goal Systems	16
3.3	Problem-Finding Systems	19
<b>4</b>	<b>Rational Decision-Making</b>	<b>23</b>
4.1	Sequence of Events in Decision-Making Procedures	23
4.2	Requirements of a Rational Decision-Making Process	28
4.3	Support of Rational Decision-Making by Management Science	30
<b>5</b>	<b>Decision-Making Procedures</b>	<b>33</b>
5.1	Notion of Decision-Making Procedure	33
5.2	Dimensions of Decision-Making Procedures and Their Values	34
5.3	Types of Decision-Making Procedures	34
5.4	Comparison of Heuristic and Analytic Decision-Making Procedures	35
5.5	Examples of the Different Types of Decision-Making Procedures	39
5.5.1	Introductory Remarks	39
5.5.2	Example of a Specific Heuristic Decision-Making Procedure	39
5.5.3	Example of a General Analytic Decision-Making Procedure	40

5.5.4	Example of a Specific Analytic Decision-Making Procedure . . . . .	43
5.5.5	Comparison of the Three Examples . . . . .	44

**Part II A General Heuristic Decision-Making Procedure**

<b>6</b>	<b>Overview of the Decision-Making Procedure . . . . .</b>	<b>49</b>
6.1	Value of a General Heuristic Decision-Making Procedure . . . . .	49
6.2	Proposed Sequence of Steps . . . . .	50
6.3	Brief Explanation of the Steps . . . . .	53
6.4	Basis of the Procedure . . . . .	54
<b>7</b>	<b>Problem Verification and Analysis . . . . .</b>	<b>59</b>
7.1	Overview of the Chapter . . . . .	59
7.2	Verifying the Discovered Decision Problem . . . . .	59
7.3	Analyzing the Decision Problem . . . . .	62
7.3.1	Introduction . . . . .	62
7.3.2	Defining and Structuring the Decision Problem . . . . .	63
7.3.3	Collecting the Relevant Data . . . . .	66
7.3.4	Determining the Problem Causes in the Case of Threat Problems . . . . .	68
7.3.5	Verifying the Opportunity in the Case of Opportunity Problems . . . . .	71
7.3.6	Defining Sub-problems and Determining Their Processing . . . . .	72
<b>8</b>	<b>Developing and Evaluating the Solution Options . . . . .</b>	<b>75</b>
8.1	Overview of the Chapter . . . . .	75
8.2	Developing Solution Options . . . . .	75
8.2.1	Introduction . . . . .	75
8.2.2	Determining the Boundary Conditions . . . . .	75
8.2.3	Determining the Solution Space . . . . .	77
8.2.4	Developing Options . . . . .	79
8.3	Determining the Decision Criteria . . . . .	81
8.3.1	Introduction . . . . .	81
8.3.2	Determining the Criteria . . . . .	82
8.3.3	Eliminating Overlapping . . . . .	82
8.3.4	Specifying the Use of the Criteria . . . . .	83
8.4	Determining Environmental Scenarios . . . . .	84
8.4.1	Introduction . . . . .	84
8.4.2	Deciding If Different Environmental Scenarios Are Needed . . . . .	84
8.4.3	Drawing Up the Scenarios . . . . .	85
8.4.4	Determining the Probabilities of the Scenarios . . . . .	89

8.5	Configuration of the Decision Problem as the Result of Steps 3, 4 and 5	89
8.6	Determining the Consequences of the Options	91
8.6.1	Introduction	91
8.6.2	Determining the Quality Level of the Consequences and the Procedure for Their Determination	92
8.6.3	Determining the Time Horizon	94
8.6.4	Determining the Consequence Values	95
9	<b>Decision Maxims for Establishing the Overall Consequences of the Options</b>	97
9.1	Introduction	97
9.2	Decision Maxims for Overcoming Polyvalence	98
9.2.1	Utility Value Maxim	98
9.2.2	Quasi-Univalent Decision Maxim	103
9.3	Decision Maxims for Overcoming Risk	104
9.3.1	Expectation Value Maxim	104
9.3.2	Utility Expectation Value Maxim	105
9.3.3	Problems with the Application of the Decision Maxims for Overcoming Risk	109
9.4	Decision Maxims for Overcoming Uncertainty	110
9.5	Combining Decision Maxims to Overcome Polyvalence and Risk or Polyvalence and Uncertainty	112
9.6	Evaluation of the Decision Maxims	116
10	<b>Overall Evaluation of the Options and Decision</b>	119
10.1	Introduction	119
10.2	Eliminating Irrelevant Options	119
10.3	Choosing Whether to Proceed Analytically Or Summarily	120
10.4	Determining the Overall Consequences of the Options When Proceeding Analytically	124
10.5	Considering the Advantages and Disadvantages of the Options When Proceeding Summarily	124
10.6	Coordinating the Proposed Solution Option with the Proposed Solutions to other Sub-problems	125
10.7	Deciding on the Option to Implement	125
11	<b>A Case Study Illustrating the Application of the Procedure</b>	127
11.1	Initial Situation	127
11.2	Verifying the Discovered Problem	129
11.3	Analyzing the Problem	130
11.3.1	Defining and Structuring the Decision Problem	130
11.3.2	Obtaining the Relevant Data	133
11.3.3	Determining the Problem Causes and Setting the Further Procedure	133

11.4	Developing Problem-Solving Options . . . . .	138
11.5	Evaluating the Options . . . . .	140
11.6	Making the Decision . . . . .	143
 <b>Part III Special Problems and Approaches to Solve Them</b>		
<b>12</b>	<b>Decision Sequences . . . . .</b>	<b>149</b>
12.1	Decision Sequences and Their Differentiation from Decisions with Several Sub-problems . . . . .	149
12.2	Visualizing Decision Sequences with the Help of Decision Trees . . . . .	150
12.3	Choosing the Best Option in a Decision Sequence . . . . .	150
12.4	Case Example of a Decision Sequence . . . . .	153
<b>13</b>	<b>Information Procurement Decisions . . . . .</b>	<b>159</b>
13.1	Information Procurement Decisions as Decisions at the Meta-Level . . . . .	159
13.2	Recommendations for Making Information Procurement Decisions . . . . .	160
<b>14</b>	<b>Collective Decisions . . . . .</b>	<b>169</b>
14.1	Collective Decisions and Their Importance in Companies . . . .	169
14.2	Group Goal Systems and Group Decision Behavior as Boundary Conditions for Collective Decisions . . . . .	170
14.2.1	Group Goal Systems . . . . .	170
14.2.2	Group Decision Behavior . . . . .	172
14.3	Rules for Making Collective Decisions . . . . .	175
14.3.1	Differing Individual Orders of Preference as a Starting Point . . . . .	175
14.3.2	Requirements for Forming a Collective Order of Preference . . . . .	176
14.3.3	Classic Rules for the Formation of a Collective Order of Preference or for Determining the Option Preferred by the Collective . . . . .	178
14.3.4	More Complex Procedures to Form the Collective Order of Preference . . . . .	180
<b>15</b>	<b>Final Remarks . . . . .</b>	<b>187</b>
 <b>Glossary . . . . .</b>		<b>189</b>
<b>Bibliography . . . . .</b>		<b>193</b>
<b>Index . . . . .</b>		<b>197</b>

# List of Figures

Fig. 1.1	Summary of the results of a study on decisions .....	2
Fig. 2.1	The dimensions of decision problems and the associated characteristics .....	8
Fig. 2.2	Causes of complex decision problems .....	9
Fig. 2.3	Connections between dimensions (1), (2) and (3) .....	11
Fig. 2.4	Combination of dimensions (8) and (9) .....	12
Fig. 3.1	Example of a goal system .....	17
Fig. 3.2	The advantages and disadvantages of the different types of problem-finding systems and problem indicators .....	20
Fig. 4.1	Years of use and financial effects of the three options .....	25
Fig. 4.2	Net present value calculations for options B and C .....	26
Fig. 4.3	Descriptive model of the decision-making process .....	28
Fig. 5.1	Dimensions of decision-making procedures and their characteristics .....	35
Fig. 5.2	Types of decision-making procedures .....	36
Fig. 5.3	Comparison of heuristic and analytic decision-making procedures .....	37
Fig. 5.4	Procedure for developing a corporate strategy .....	40
Fig. 5.5	General electrics and McKinsey portfolio for the Baer group .....	41
Fig. 5.6	Raw data to determine optimal sales and production programs ...	42
Fig. 5.7	Graphical determination of the optimal sales and production program .....	42
Fig. 5.8	Harris and Wilson's saw-tooth model of stock movements .....	43
Fig. 5.9	Cost function of the Harris-Wilson model .....	44
Fig. 6.1	Opportunities and limitations of a general heuristic decision-making procedure .....	50
Fig. 6.2	The general heuristic decision-making procedure in its basic form ...	51
Fig. 6.3	The general heuristic decision-making procedure when solving parallel sub-problems .....	52
Fig. 6.4	The general heuristic decision-making procedure when solving consecutive sub-problems .....	53
Fig. 6.5	Simple example to illustrate the sequence of events in the general heuristic decision-making procedure .....	55
Fig. 6.6	Basis of the general heuristic decision-making procedure .....	56

Fig. 7.1	Steps 1 and 2 in the general heuristic decision-making procedure .....	60
Fig. 7.2	Problem discovery on the basis of target cumulated turnover ....	61
Fig. 7.3	Sub-steps of problem analysis .....	63
Fig. 7.4	Representation of a decision problem as an iceberg .....	64
Fig. 7.5	Frame for the staffing problem of service provider X .....	65
Fig. 7.6	Frame for the acquisition of a manufacturer of photovoltaic systems .....	66
Fig. 7.7	Possible problem structures of two sub-problems .....	74
Fig. 8.1	Steps 3–6 in the general heuristic decision-making process .....	76
Fig. 8.2	Sub-steps for developing the solution options .....	77
Fig. 8.3	Good and poor coverage of the solution space with options ....	80
Fig. 8.4	Sub-steps for determining the decision criteria and the types of consequences .....	82
Fig. 8.5	Sub-steps for determining the environmental scenarios .....	85
Fig. 8.6	Example of a decision matrix .....	90
Fig. 8.7	The six decision constellations .....	91
Fig. 8.8	The central place of consequences in the decision-making process	92
Fig. 8.9	Sub-steps for determining the consequences of the options .....	92
Fig. 8.10	Sequence of the decision-making process, the implementation of the decision and the decision consequences .....	94
Fig. 9.1	The decision maxims and their application .....	98
Fig. 9.2	Starting point of the example on the application of the utility value maxim .....	102
Fig. 9.3	Example of the application of the utility value maxim .....	102
Fig. 9.4	Example of expectation values .....	104
Fig. 9.5	Starting point of the example on the utility expectation value maxim .....	105
Fig. 9.6	Curve for the transformation of consequence values into utility values .....	106
Fig. 9.7	Calculation of the utility expectation values in the example ....	106
Fig. 9.8	Starting point for the application of the maxims for overcoming uncertainty .....	112
Fig. 9.9	Application of the minimax-risk rule .....	112
Fig. 9.10	Evaluation of the decision maxims .....	116
Fig. 9.11	Example of a decision situation in which the minimax rule should not be applied .....	116
Fig. 10.1	Step 7 in the general heuristic decision-making procedure .....	120
Fig. 10.2	Example of a decision matrix .....	121
Fig. 10.3	Sub-steps for evaluating the options overall and making the decision .....	122
Fig. 10.4	Example of a natural order in a polyvalent certain decision problem .....	122
Fig. 10.5	Example of a natural order in a polyvalent uncertain decision problem .....	123

Fig. 10.6	Example of a decision matrix for a univalent certain decision ...	123
Fig. 11.1	Organigram of Special Vehicles Inc. ....	128
Fig. 11.2	Frame for the unsatisfactory result of Special Vehicles Inc. ....	134
Fig. 11.3	Cost analysis of Special Vehicles Inc. ....	135
Fig. 11.4	Contribution margin I of the cost carriers of Utility Vehicle Chassis Inc. for the year 20XX .....	137
Fig. 11.5	The five options .....	139
Fig. 11.6	The financial effects of the five options .....	141
Fig. 11.7	The effects of the five options on the market position .....	144
Fig. 11.8	Decision matrix .....	145
Fig. 12.1	Two examples of decision trees .....	151
Fig. 12.2	Decision tree under uncertainty .....	153
Fig. 12.3	Development of the order volume of Obelix .....	154
Fig. 12.4	The decision tree of Mr. Kessler .....	156
Fig. 13.1	Procedure for making information procurement decisions .....	161
Fig. 14.1	Dimensions and values of collective decisions .....	170
Fig. 14.2	Example of a goal system for an actor composed of several people .....	171
Fig. 14.3	Tendency towards poorer decisions by a group compared to an individual .....	173

## List of Insets

Inset 2.1	Prescriptive Decision Theory, Descriptive Decision Theory and Decision Logic .....	13
Inset 3.1	Study by Raffée and Fritz on Pursued Goals .....	17
Inset 3.2	Early Warning Systems of Parfitt and Collins .....	20
Inset 4.1	Three Lines of Research in Management Science and Their Evaluation .....	31
Inset 5.1	Well-Structured Problems as a Prerequisite for the use of Analytic Decision-Making Procedures .....	37
Inset 6.1	The Most Important Heuristic Principles and Their Application in the Proposed General Heuristic Decision-Making Procedure ...	57
Inset 7.1	Methods for Backward-Moving Problem Indication .....	69
Inset 8.1	Example of a Morphological Box .....	78
Inset 8.2	Determining Environmental Scenarios as a Basis for Evaluating a Chair and Ski Lift Project .....	86
Inset 9.1	Transforming Consequence Values into Utility Values .....	99
Inset 9.2	Determining Utility Values by Means of a Fictive Game .....	107
Inset 9.3	Distorted Recording of the Attitude to Risk Through Framing Effects .....	108
Inset 9.4	Determining the Overall Consequences in a Polyvalent and Uncertain Decision Problem .....	113
Inset 13.1	Bayes's Approach for Establishing the Value of Additional Information .....	162
Inset 14.1	Asch's Experiment on Group Members' Pursuit of Conformity .....	175
Inset 14.2	The Independence of Irrelevant Options as a Requirement of Rule Systems for Forming Collective Orders of Preference .....	177
Inset 14.3	Condorcet's Voting Paradox .....	179
Inset 14.4	Blin and Whinston's Preference Intensities .....	180
Inset 14.5	Saaty's Analytical Hierarchical Process .....	183
