

World Scientific Series in Economic Theory – Vol. 2

ROBUST MECHANISM DESIGN

The Role of Private Information
and Higher Order Beliefs

Robust Mechanism Design: An Introduction	1
1 Introduction	1
2 Leading Example: Allocating a Private Good with Interdependent Values	4
3 Type Spaces	7
4 Robust Foundations for Dominant and Ex Post Incentive Compatibility	15
5 Full Implementation	21
5.1 Ex Post Implementation	22
5.2 Robust Implementation in the Direct Mechanism	23
5.3 The Robustness of Robust Implementation	32
5.4 Robust Implementation in the General Mechanism	33
5.5 Rationalizable Implementation	34
5.6 The Role of the Common Prior	36
5.7 Dynamic Mechanisms	37
5.8 Virtual Implementation	38
6 Open Issues	42
References	43
Chapter 1 Robust Mechanism Design	49
1 Introduction	50
2 Setup	54
2.1 Payoff Environment	54
2.2 Type Spaces	55
2.3 Solution Concepts	56
2.4 Questions	58
2.5 Implicit versus Explicit Modelling of Higher Order Uncertainty and the Universal Type Space	59

3	Examples	62
3.1	F is Interim Implementable on All Type Spaces But not Ex Post Implementable	63
3.2	F is Interim Implementable on All Payoff Type Spaces But not Interim Implementable on All Type Spaces	67
4	Separable Environments	72
4.1	Separable Environments	73
4.2	Full Support Conditions	77
5	The Quasilinear Environment with Budget Balance	81
6	Discussion	90
6.1	A Classical Debate	90
6.2	Genericity	92
6.3	Augmented Ex Post Equivalence	92
	References	93
	Chapter 2 Ex Post Implementation	97
1	Introduction	97
2	Model	103
3	Monotonicity	105
3.1	Ex Post Monotonicity	105
3.2	Maskin Monotonicity	107
3.3	Public Good Example	109
4	Ex Post Implementation	111
4.1	Necessary Conditions	112
4.2	Sufficient Conditions in Economic Environments	114
4.3	Sufficiency Conditions in Non-economic Environments	117
5	Single Crossing Environment	121
6	Direct Mechanisms	126
7	Single Unit Auction	129
7.1	Model	130
7.2	Monotonicity and the VCG Mechanism	130
7.3	Private Versus Interdependent Values	135
8	Social Choice Sets	137
8.1	Pareto Correspondence	137
8.2	Functions, Sets and Correspondences	141
9	Mixed Strategy Implementation	142
10	Conclusion	147

Appendix A	148
A.1. Private values	148
A.2. Ex post monotonicity no veto for sets	148
References	150

Chapter 3	Robust Implementation in Direct Mechanisms	153
-----------	--	-----

1	Introduction	154
2	Setup	159
3	A Public Good Example	161
4	Robust Implementation	164
5	Necessity of Contraction Property	170
6	The Linear Model	175
7	Single Unit Auction	178
8	Discussion	179
	8.1 Dimensionality and Aggregation	179
	8.2 Relation to Partial and Ex Post Implementation	183
	8.3 Robust and Virtual Implementation in General Environments	183
	8.4 Social Choice Correspondences and Sets	185
	8.5 The Common Prior Assumption and Strategic Substitutes/Complements	186
	8.6 Informational Foundation of Interdependence	187
9	Appendix	187
	References	192

Chapter 4	Robust Implementation in General Mechanisms	195
-----------	---	-----

1	Introduction	195
2	Setup	200
	2.1 The Payoff Environment	200
	2.2 Type Spaces	201
	2.3 Mechanisms	201
	2.4 Solution Concepts	201
	2.5 Implementation	204
3	Finite Mechanisms	206
	3.1 Ex Post Incentive Compatibility	207
	3.2 Robust Monotonicity	208
	3.3 Robust Measurability	212

3.4	Single Crossing Aggregator Environments	214
3.5	Robust Virtual Implementation	216
3.6	A Coordination Example	216
4	Rationalizable and Robust Implementation in Infinite Mechanisms	218
4.1	Best Response	218
4.2	Material Implementation	221
5	Infinite Mechanisms	223
6	Extensions, Variations and Discussion	230
6.1	Lotteries, Pure Strategies and Bayesian Implementation	230
6.2	Ex Post and Robust Implementation	232
6.3	Extensions	234
7	Appendix	234
7.1	Robust Monotonicity and Dual Robust Monotonicity	234
7.2	A Badly Behaved Mechanism	235
7.3	Coordination Example Continued	236
	References	238
 Chapter 5 The Role of the Common Prior in Robust Implementation		241
1	Introduction	241
2	Setup	243
3	A Public Good Example	245
4	Discussion	249
	References	250
 Chapter 6 An Ascending Auction for Interdependent Values: Uniqueness and Robustness to Strategic Uncertainty		253
1	Model	255
2	Static Auction	256
3	Dynamic Auction	258
4	Discussion	260
5	Conclusion	261
	References	262

Chapter 7	Robust Virtual Implementation	263
1	Introduction	264
2	Setting	270
2.1	Environment	270
2.2	Mechanisms and Solution Concept	271
2.3	Separability	272
3	An Environment with Interdependent Values for a Single Good	274
4	Strategic Distinguishability	277
4.1	Main Result	277
4.2	The Maximally Revealing Mechanism	279
4.2.1	A class of maximally revealing mechanisms	279
4.2.2	Characterizing rationalizable behavior for small ε	280
4.3	Constructing a Rich Enough Test Set	285
5	Robust Virtual Implementation	286
5.1	Definitions	286
5.2	Necessity	287
5.3	Sufficiency	289
6	Discussion	293
6.1	Abreu–Matsushima Measurability	293
6.2	Interdependence and Pairwise Separability	295
6.3	Intermediate Robustness Notions	296
6.4	Rationalizability and All Equilibria on All Type Spaces	298
6.5	Iterated Deletion of Weakly Dominated Strategies	299
6.6	Implementation in a Direct Mechanism	301
6.7	Exact Implementation and Integer Games	302
7	Appendix	303
	References	315
Chapter 8	Multidimensional Private Value Auctions	319
1	Introduction	319
2	The Model	324
3	Seller’s Expected Revenue	326
3.1	Second-Price Auction	326
3.2	First-Price Auction	327
3.3	Revenue Non-Equivalence	328

4	Efficiency	331
5	Equilibrium Existence	333
6	Discussion: Revenue and Information Acquisition	334
6.1	Revenue	334
6.2	Information Acquisition	336
7	Conclusion	339
	Appendix A. Proofs	340
	Appendix B	353
	References	354
Chapter 9	The Robustness of Robust Implementation	357
1	Introduction	357
1.1	Literature	359
2	Setup	360
3	Baseline payoff environments	362
3.1	Approximate Common Knowledge	362
3.2	Payoff Environment Solution Concept	363
3.3	One-Dimensional, Contractive, Supermodular Payoff Type Environments	364
4	Main Result	366
5	Discussion	368
	Appendix A	369
	References	372
Chapter 10	Rationalizable Implementation	375
1	Introduction	375
2	Setup	377
3	Main Result	380
4	The Non-Responsive Case	391
5	Concluding Remarks	397
	References	403
Chapter 11	Pricing without Priors	405
1	Introduction	405
2	Model	408
3	Pricing Without Priors	410
4	Discussion	413
	References	415

Chapter 12	Robust Monopoly Pricing	417
1	Introduction	417
2	Model	421
3	Maximin Utility	425
4	Minimax Regret	428
5	Discussion	434
	Appendix A	436
	References	440
	Author Index	443
	Subject Index	447
